Government pay bill set to rise 25 pc this year

David Blake Economics Editor The Chancellor of the Excurrent financial year than in the financial year 1979-80.

Sir Geoffrey Howe defended the Government's record by pointing our that much of the increase was caused by the delayed effect of increases under the Clegg comparability study set up last year. He said that, according to new figures in the months up to March since the start of a new pay round last July, settlements in the public sector had averaged 14 per cent, compared with 18) per cent in the private

The clash over public sector pay stole the spotlight at what was meant to be a more general questioning by the Treasury and Civil Service Select Commitree of the Government's

Budger and medium term financial strategy.

Committee members raised questions over a number of important elements in the government plan, particularly whether improvements in nationalized industry performance and cuts in housing sub-sidies were possible and whether the Treasury were underestimating likely revenue from North Sea oil.

Treasury officials conceded that their estimates may have "erred on the side of caution". The figure for the government pay increase emerged during questioning of Treasury offi cials at a morning session of the committee, set up to moni-tor the Government's handling of the economy.

-A number of MPs, most of them Conservatives, expressed concern at the shap increase in the amount of cash being provided for civil service pay this

The argued that the increase was inconsistent with the Government's statement that a 14 per cent cash limit was being applied to civil service pay this applied to civil service pay this year. Treasury officials said the actual increase in the central Government pay bill would be 25 per cent, but pointed out that this was consistent with the Government's cash limit.

The 14 per cent figure refers

only to new money being ne-gotiated during the current pay-round and does not take account of pay rises still coming through under the Clegg comparability award.
The MPs returned to the

marter at an afternuon session with Sir Geoffrey. This time they concentrated on claiming that, whatever the technical

Mixed response on pay from teachers

By Diana Geddes Education Correspondent

The Clegg commission's recommendations of pay increases averaging 18.2 per cent for 600,000 school and further edu-cation teachers in England, Wales and Scotland has received a mixed response from

The commission's report, published yesterday, recommends increases on April, 1979, salaries ranging from 17 per cent for the lowest-paid class-room teacher and college lecturer to 25 per cent for the highest-paid headteacher and college principal.

college principal.

The recommendations are not binding on the Government, the local authorities or the unions. The Burnham committee, the The Burnaum commutee, the national negotiating body on teachers' pay, will decide whether to adopt, reject or modify the commission's pro-

posals.

If adopted in full, the increases would add £755m a year to the total bill for teachers.

The teachers had asked for 38.7 per cent on March, 1979 salaries, which they said would restore their salaries to the position established by the Houghton Report in 197g. The increases recommended by the Cleag report represent an aver-Clegg report represent an average rise of 29.2 per cent on

paid scale 1 and scale 2 classroom teacher and the lowestpaid college lecturer would the proposed increases be sufficient restore salaries to their Houghton levels, the report

shows.
The National Association of The National Association of Schoolmasters and Union of Women Teachers, the second largest teachers' union, said that it was disappointed. The Clegg recommendation was about 3 per cent less than what it believed teachers could have got a year ego if they had gone to arbitration. Teachers had lost about £1,000 each because of the delay.

It was reileved, however, that

the report was not "contro-versial" on the question of

"too many holidays" and she proposed to consult other political leaders on the whole subject of work-free days.

Some other countries, she said, had only eight public holidays. India last wear had 12 versial on the question of conditions of service.

The report states that the commission's proposals take into account the wide range of extra-curricular activities which are part of the professional obligation of teachers. The union said it would not account the professional country accounted to the control of the professional obligation of teachers. days. India last year had 12 official holidays and more are persistently sought ways to have Dr Ambedkar honoured on accept the report's recommendations and that it was determined to see the Houghton scale of

relativity restored in full. The National Union of Teachers, the largest union,

gave the report a guarded but much more favourable recep-tion. The report indicated that about 96 per cent of teachers would have their salaries restored to within 5 per cent of the Houghton award, Mr Frederick Jarvis, general secre-

tary, said.. Teachers on the average salary of 55,184 in March, 1979, would get \$6,669 after Clegg. It had given teachers a lot more than going to arbitration would have done, he said.

He welcomed the fact that the Clegg report made no attempt to tie its recommendations to alterations in teachers' conditions of service, and that it had not proposed separate scales for primary and secondary teachers.

The National Association of Head Teachers, representing two-thirds of head teachers, said it was disappointed by the report, which did almost nothing to restore differentials. But the Secondary Heads' Association, which represents a majority of secondary school majority of secondary school heads, gave the report a broad welcome and said that it went a substantial way to restoring the Houghton terms.

The teachers have made claim from April Only in the case of the lowest-aid scale 1 and scale 2 class-bom teacher and the lowest-the Clegg recommendations, to cover the increased cost of living since March, 1979.

Professor Hugh Clegg: Rises averaging 18 per cent urged.

Go ahead given for **British reactors** By Nicholas Hirst

Energy Correspondent Mr David Howe David Howell. Secretary of State for Energy. industry the go-shead to build the phase of the Government's nuclear programme announced in December.

Orders for the harrdware for two British-designed advanced as-cooled reactors (AGR), are now expected to be placed in the summer and the nuclear component industry will be extremely relieved.

The British designed secbeen under threat of cancella-tion or severe delay since the Central Policy Review Staff, the Government's "think tank" was called in to review the orders

Re dundancies would have been inevitable if work had been delayed for long on either the station for the South of Scotland Electricity Board at Torness or the planned second station at Heysbem, in Lancashire, for the Central Electricity Generating Board.

If both had been cancelled the boiler-making plant at the Gateshead works of Northern Engineering Industries might have closed with the total loss of more than 1,000 jobs. Delay or cancellation would have or cancellation would have to be strong but Mr Howell's affected many companies in the advice that it would be unwise nuclear industry. Until Hey-sham and Torness were planned yet to be accepted in Britain they had been without an order for a decade. The National Nuclear Cor-

poration (NNC), which is the main contractor for the stations, now has an estimated total of £2,450m at March, 1980, prices, to award contracts to the component industry including NEI, GEC, Whessoe and Sabcock Power Engineer-

With the decision to go ahead with the AGR orders, the way is now clear for a successor to be appointed to

ed Aldington as chairman of

NNC.
The NNC is to be reorganized and appointment of a chairman will allow this to go ahead. The Central Electricity Generating Board is then expected to send a letter of intent asking for a licence from Westinghouse in the United States to build the first pressurized water reactor (PWR) in the United Kingdom. This will start the second phase of the Government's nuclear programme which is to

nuclear programme which is to order approximately one nuclear station a year for the next 10 years. The first two are to be of British design.

The future of the AGR programme was thrown into doubt after the Central Electricity Generating Roard admitted it Generating Board admitted it would overshoot its cash limit, imposed for 1979-80 by the Government and sharply reduced its estimate of future growth in electricity demand.
A strong campaign was mounted within the Department of Energy to keep the AGR orders alive. Cancellation only

three months after Mr Howell had announced his programme would have been a heavy political blow. At one time the Prime Minister seemed determined to cancel; opposition to the Brit-ish design at No 10 is thought

Mr Howell told the House of Commons that the spending of £2,450m between now and 1986-88 when the two stations were to be commissioned had been included both within the limits awarded to the electricity authorities for 1980-81 and within the medium term plans in the White Paper on Public Spending. The English boards have had their over-

BL package strike will halt Mini production line today

Midlands Industrial

Managing directors from all BL Cars subsidiaries met at Oxford yesterday to formulate the company's response to the official backing given by the Transport and General Workers' Union to "bush fire" strikes at

BL plants. The number on strike in protest at the imposition of a new pay and conditions package had risen to 13,500 last night and affected nine plants, all in the

Production of the Range Rover, Land Rover, Rover sal-cons. TR7 convertible, Jaguar saloons and Sherpa vans was at a standstill. The latest to suffer from strike were the Castle Bromwich body plant and the works at Acocks Green, Birmingham, which supplies engines to Rover.

The strike by 1,300 men at Castle Bromwich has cut supplies of Mini body panels to Longbridge. As a result pro-ducetion of the Mini, BL's best selling car, will be halted today

with 800 men laid off. Mr Ray Horrocks, managing director of BL Cars, took the chair at yesterday's meeting, which was called originally as a routine meeting of BL Cars' executive committee. However, the latest threat to the group's recovery hopes took precedence over all other business.

No statement was issued after the meeting, but it is under-stood that Mr Horrocks reported on informal talks during the weekend between Mr Mostyn (Moss) Evans, general secretary of the transport union, and Mr Pat Lowry, BL's senior industrial relations expert.

Neither side would confirm reports last night that attempts

600 to lose jobs

laggers' dispute

About 600 construction wor-

kers are set to lose their jobs this month in the first wave of redundancies caused by the six months old dispute involving 27 laggers at the Isle of Grain power station site in Kent.

Redundancy notices to the men run out on April 25 and the Central Electricity Generat-

ing Board made clear last night

that even if the dispute over

honus payments is resolved be-

fore then nothing can prevent the men losing their jobs.

Although most of the laggers, members of the General and

Municipal Workers Union, are believed to have found alterna-

tive work, their job, that of insulating boilers and other equipment, has been "blacked"

Relfast

his predecessor.

The last Dublin and West minster top-level exchanges were between Mr Lynch and Mrs Margaret Thatcher in London in October, when secret cross-border security arrange-ments were concluded in the wake of the murder of Lord Mountbatten of Burms, and the killing on the same day of 18 soldiers at Warren Point, on the south-eastern corner of the Ulster border.

British unease about the future of the pact, which included giving authority to British Army helicopters to cross the border without prior permission when in hot pursuit, has not been justified. Mr Haughey says he proposes no changes in the agreement.

Talks on economic cooperation will include the prospects for EEC money to help the border area and to boost tourism, which has a clear cross-border aspect.

In the most general terms terms there will be discussion of the political situation, Mr Lenihan has mentioned to Irish journalists that he proposes to tell Mr Atkins that the constitutional guarantee to the Unionists of Northern Ireland should be ended. But observers doubt that

such an issue will get much of an airing. And there is cer-tainly no prospect of Mr Atkins giving any detailed explanation of the Government's thoughts on how it might attempt to achieve political change in Northern Ireland; that is a matter for the House of Commons, which seems likely to receive a report next month.

Man and dog: Lord Hailsham of Marylebone, the Lord Chancellor, with Mini, his Jack Russell terrier, at the House of Lords yesterday for the swearing-in of three judges and

Ulster unions close ranks to rebuke hospital strikers

Belfast The trade union movement in Northern Ireland yesterday closed ranks in opposition to the unofficial strike by 1,300 ancillary workers at the Royal Victoria Hospital, west Belfast.

The porters, cooks and cleaners were continuing to defy their union, the National Union of Public Employees. which condemned them for not

providing emergency cover. Despite acute difficulties, the 1,100-bed hospital was still managing to provide an almost normal service to Breakfasts were cooked and served by nurses, and doctors could be seen with mops and

brooms in the corridors Nupe is incensed at the involvement of politicians, who claim the strike is being manipulated by the Provisional IRA. Mr John Coulthard, Nupe's Northern Ireland officer, criticized the politicians for exacerbating a highly charged situa-

Eighr other health unions met in Belfast under the aegis of the Irish Congress of Trade Unions and unanimously sup-ported a weekend decision by Nupe's national executive in London to condemn the action. As they met, the strike So far emergency servilenders sent a message that not been interrupted.

From Our Own Correspondent they would recommend a return if the union's health service roup would set up an independent inquiry into the dispute, and to establish who should neectiate for the workers in future.

The strikers insist that the inquiry should exclude the two fulltime Nupe officers. The plea was rejected. Mr Coulthard and his col-

league have been repudiated by the strikers. He said last night: "What saddens me is the furility of the action. Our members must know that if they stayed out until Christmas if would not make a whit of dif-ference to the Army presence". The strikers had allowed them selves to be led by "hotheads" The declared reason for the

strike, which is also affecting sister hospitals, is the "exces sive" security presence of the Army. There have been some ugly terrorist incidents at the hospital, and security measures have been stepped up. These include closed cricuit television.

The picket lines at the hospital were fairly peaceful vester-day, but there were two clashes as food vane were surrounded by pickets. The driver of one, a senior catering officer, was forced to turn away. But earlier a van carrying urgent food supplies was allowed through. So far emergency services have

Crown Estate Commissioners in 44 log cabins at Dalavich, Argyll, has upset the Associa-tion of Scotland's Self Caterers. The association says that the commissioners' direct foray into the leisure field is unfair com-petition by the stare in a difficult, overcrowded market.

result of the strength of the petrol. Most of our operators have

put a lit of their resources into their developments, it said yesterday, "With the cost of land and the high interestrates, they are naturally upset when they see the Crown Estate Commissioners moving in with the Forestry Commission and

For a private developer each cabin could cost £20,000. When loan interest had been repaid and all services covered, only a thin margin of profit remained if bookings were slack.

The Crown Estate Commissioners were "very surprised" that their cabins were looked upon as unfair competition, The £500,000 was not tax revenue but Crown Estate liquid capital seeking a sensible investment.

Pay increases averaging 18% recommended for teachers?

By Diana Geddes Education Correspondent

Salary increases ranging from 17 to 25 per cent for 600,000 school and further education teachers in England, Wales and Scotland are recommended in the seventh report of the stand-ing commission on pay com-parability, whose chairman is Professor Hugh Clegg

The increases, which average 18.2 per cent, are based on the April, 1979, salary rates and do not include the 9 per cent paid to teachers from April 1, 1979, in anticipation of the Clegg report. The teachers had asked for 37.7 per cent on March, 1979, salaries. The recommendation represents a 29.2 per cent increase on those salaries.

The award, if paid in full, would add £755m to the total bill of £4,148m for teachers salaries, pensions and national insurance contributions. However, the Clegg report

only makes recommendations it will be for the teachers and employers to decide what to do:

That would mean for example, that most reachers and lecturers at the bottom of the salary scales, for whom a 17 per cent increase is proposed, would get an extra 1 per cent immediately, backdated to January, and a further 8.5 per cent from

Head teachers and principals et the top of the salary scales, for whom a 25 per cent increase is proposed, would get an extra 5 per cent immediately and 12.5

per cent from September. The Clegg commission was asked by the Government last July to undertake a pay com-parability study for teachers after pay talks between the employers and the teachers'

unions collapsed The report says little about conditions of service. The key paragraph, over which there will be much debate both in-side and outside the Burnham Committee, says: "Throughout our assessment of the work of teachers we have taken into account the wide range of extra-curricular activities which are par tof the professional obligation of teachers to pupils. parents and schools". It adds that a substantial part of their work has to be done outside the classroom and overlaps into holidays.

commission broadly

Move to halve motor cycle and lorry noise levels

By Michael Baily

Transport Correspondent Moves to halve the noise level of lorries and large motor cycles within 10 years were set in motion yesterday by Mr Norman Fowler, Minister of Transport.

In a public consultation document views are sought from interested parties such as the motor industry on a new maxi-mum vehicle notise level of 80 decibels, the level at which, according to previous surveys, most people regard a vehicle as constituting a noise nuisance.

That is eight decibels below he new "quiet" limits for lorries and motor cycles, tre two main noise culprits, already due to come into force in 1983 under an EEC directive issued in 1978. A reduction from 88 to 80

decibels would almost halve the noise level as perceived by the human car, and bring it down to that of the new quiet." cars due to start coming on the market this year

under the same EEC directive. The ministry paper says that traffic is the main source of noise in the community, and that despite some limitations already introduced it has increased an dwill continue to do so in the absence of further measures.

Some relief is being gained from a variety of measures such as by-pass roads round towns and villages, traffic management schemes, and land-use measures to exclude heavy traffic from sensitive areas. But while such measures can mitigate noise, they are no substitute for control at source, by ensuring that vehicles are designed and manufactured to emit no more than an accept-

The Government's "quiet heavy vehicle" research pro-ject has established the technical feasibility of reducing Tear

a detailed assessment of the extra manufacturing and rumning rosts of making vehicles quieter remains to be comple-

"Clearly considerations cost ore important in deter-mining the extent of the reductions to be made", the paper says, "but the capital cost of new vehicles oculd well be offset, at least in part, by increased operational effiincreased operational effi-ciency in the case of commer-cial vehicles, and the effect on haulage rates and hence prices would be phased over a considerable period.

" Moreover, if there is to be a wider international trend towards quieter vehicles, British moto manufacturing industry must be able to take advantage of this: it cannot afford to fall behind its main competitors in developing and marketing quieter vehicles."

The prime requirement to keep noise at acceptable levels. with rising traffic is to keep noise down to 80-83 decibels for the heaviest vehicles and 80 for the rest. The case for introducing lower limits than 80 for cars and other lighter vehicles is not clears the paper says, because the cost might outweight the benefit

The case for further action on motor cycles is much stronger. Those rank (with heavy lorries as the principal turgets of public complaint, and there seems scope for further reductions for heavy machines, and electric power might point the way to quicter

Whitehall brief: Inner workings remain incomprehensible mystery

When an MP ranks behind a foreign visitor

By Peter Hennessy To most MPs without minis-terial experience the inner-workings of Whitehall remain an incomprehensible mystery. Collectively in Parliament MPs may be sovereign, but when it comes to securing a departmental briefing on a matter of policy from a civil servant, they rank some distance behind a foreign visitor or a journalist.

Elected MPs, with a constitutional duty to scrutinize the executive usually find their

executive, usually find their way blocked to routine sessions regularly available to, say. American PhD students or lobby correspondents: blocked what a Civil Service Department spokesman described as the unwritten "code of etiquette governing the way an approaches a department for information"

Only on the most secretive ureaucracy in the western bureaucracy in the western world would the irony of such a

position be lost.

Last week the Royal Institute of Public Administration ran a two-day experimental seminar at its London headquarters in Birdcage Walk, Westminster, on "the workings of Whitehall". attended by a dozen back-benchers from the two major parties. Funded by the Gatsby Charitable Foundation, part of the Sainsbury's retail chain, it sought to remedy some of the deficiencies caused by that un-

Mr Bruce George: " Appalled at conspiracy of silence."

The collection of former Whitehall insiders assembled to conduct MPs on their "Cook's tour", as one described it, were left in no doubt about the rage endured by backbenchers when insulted by meaningless replies to letters sent to ministers. Mr Nigel Spearing, Labour MP for Newham, South, spoke for many when he said:

Once I had a long correspon-dence with a junior minister on the subject of inland waterways.

senior Civil Service,

In one of three departmental case studies on the foreign and defence ministries (the others dealt with the Treasury and the Department of the Environ-ment), the MPs learnt more about the way Whitehall has been preparing over the past eight years for a third generanuclear deterrent to replace the Polaris Submarine troller of RTE-1 (Television), Squadron in the 1990s than the Irish state broadcasting ministers have yet been pre-pared to tell Parliament.

After listening to Professor Peter Nailor, of the Royal Naval Staff College, Greenwich, and Mr William Wallace, of the Royal Institute of International Affairs, on the subject, Mr Bruce George, Labour MP for Walsall, South, and a member of the Commons Select Committee on Defence, commented that the recent White Paper on defence offered exactly one sentence on Polaris replacement.

in long, convoluted sentences and refused to take the issue. I left like shaking them by the neck and shouting at them if I ever saw them which, of course, I did not." The depressing analysis of the rumbs and evasions offered to For their part, the former insiders left the MPs with few backbenchers by departments, however, did not engender a illusions about the contempt much of Whitehall feels for sense of defeatism. The MPs were told how seriously the new system of select committees is being taken in Whitehall, how The sins of what one called "the executive mentality" were listed at length—its concentraa committee with a good chairtion on the avoidance of embarman and a clear sense of direcrassment, its cynicism about change, its pessimism—and ser tion, can exert a powerful

Exploitation of Celts by TV attacked

By Neil Munro of The Times Educational Supplement

The alleged exploitation of Celtic communities by national broadcasting services was strongly attacked yesterday by Mr Muiris MacConghail, Con-

He told the first International Festival of Cehic Film at South Uist, Western Isles, that those living in the Western Isles, Anglesey, Brittany or West Kerry had to accept both the dominance of the life styles of those living at the centre and the central view of the lives of those living on the periphery. "Slow Celtic tragic music

over an enveloping mist, while an ancient and grizzly farmer wearing old Wellingtons trud-ges his weaven way over a sodden landscape may be very amusing and, indeed, moving in the drawingrooms of west London, but it is hardly rele vant to those who have to live in the areas portrayed," he

Films such as Rean's Daugh ter and Whisky Galore were made chiefly in Ireland and in to use cheap local labour.

Making programmes for pe ple belonging to peripheral culance of dancing, ancient crafts and folk music. They should also involve drama, current affairs news urban sociology and education.

The festival, which will run until the end of the week throughout the Western Isles, has attracted film makers and broadcasters from France, Wales, Ireland and Scotland.

"Sorry, I've got my own family to think about."

The little boy in the middle doesn't go to school. Some families are so poor and hungry they have to send their children out on the streets to beg. It's unthinkable but true.

Of course we all want to give our children the best of everything. But shouldn't we also think of the children who

have nothing? We think so. That's why we want to tell you how Oxfam is helping people who are so much less fortimate than we are.

Please post the coupon now It could be quite an education.

I would like more information about Oxfam's work.

I would like to send a donation.

Address

I enclose a donation of £_ T12, Oxfam, 274 Banbury Rd., Oxford OX2 7DZ.

Severe hardship expected to result from benefit cuts

Strikers, old and injured people and the unemployed will sufter severe hardship because of the cuts in benefits outlined in the Government's social security Bill, welfare pressure

groups said vesterday.

In a briefing paper to MPs, the Child Poverty Action Group says the Bill, due for its second reading today, represents "a further erosion of the basic principles of the welfare state."

About 1,750,000 claimants will suffer because benefits for unemployment, sickness and maternity are being increased by 5 per cent less than the rate of inflation this year, it

Unemployment benefit for a couple will be cut by £1.50 a week in real terms and invalidity benefit, paid to the chronically sick, by at least £1.85.

"If the Government does the thing next year, as the allows, unemployment

benefit for a couple will have been cut by a total of £3.15 a week and invalidity benefit by £3.95 by 1982."

most backbenchers

Mr Nigel Spearing: "I felt

The injury benefit, paid for six months after an industrial injury, is to suffer an even bigger cut than other benefits. CPAG says. It will rise by only 10.1 per cent, which, after inflation, means a weekly loss of £1.95 a couple.

Those with children will have greater losses. Unemployment benefit for a couple with two

children will be cut in real terms by £2.80 a week and invalidity pensions by £3.35 a week. "The larger the family, week. The larger the bigger the cut.

Age Concern, another pressure group, says old people will suffer because of the carnings

The CPAG dismisses the Government's argument that the cuts are aimed at increasing work incentives. "Only a tiny minority are better off out of

Mrs Thatcher reaffirms support for American policy on hostages in ment. Will she impress on our European alles who have so long sheltered under the umbrelia of the United States' military strength that they must be prepared to share the burdens as well as he benefits of the alliance. Mrs. Thatcher—That is another thing else to fall. Mrs. Thatcher—That is another thing else to fall. Mrs. Thatcher—That is another thing else to fall. Mrs. Thatcher—That is another that with Robert Kilroy-Silk (Ormskirk, factor we have so consider. But the important that Mrs. Thatcher does everything possible in this situation is not inexheust to meet the reasonable demands ible. Diplomatic action has so far of the President of the United States in the action to proposes control of the hostages to the against International terrorisis.

Mrs Margaret Thatcher, the Prime Minister, in an interim statement on the situation in Iran, said: President Carter has asked the friends and alties of the United States for their help and support in the serious situation over the con-tinued illegal detention of the American hostages in Tehran. This illegal act by Iran is now in its sixth month. The United

States administration and the American people have exercised remarkable patience and restraint in the face of the greatest provo-cation. Time and again their reasonable hopes of progress have been dashed.

It has become clear that the prospects for the early release of the hostages through diplomatic action have markedly diminished. The United States Administration have put up with the flouting of international law and established diplomatic practice by Iran for several months in the hope of securing the release of the hos-

But naturally they now feel sut naturally mey now itel obliged to demonstrate that the continued detenden of their people will carry increasing penalties. They understandably expect solidarity from their allies and we, for our part, have been giving and will continue to give them our utmost

support.

At an early stage in the crisis we agreed on certain measures in the financial and commercial fields, on which we have been cooperating with the United States. These

No arms or defence equipment has been sent from this country to has been sent from this country to Iran since the hostage crisis arose in early November. In December we made a substantial reduction in the size of our Embassy in Tehran. The European Foreign Ministers met in Lisbon last week. The Foreign Ministers of the Nine expressed their solidarity with the United States and the American people and instructed their Ambassadors to make an immediate sadors to make an immediate approach to the President of Iran to urge the release of the hostages and to seek precise assurances about the dates and methods by which their release would take place and then to report back in person. Our Ambassador. Sir John Graham, is due to arrive in London this afternoon.

These include applying the economic senctions which the Russians vetoed at the United Nations in

tant that whatever we do should be effective and should be capable of commanding a broad measure of international support.

We are now in close and urgent consultation with our European partners as well as with the other friendly countries agout tow best we can together respond to Fresident Carter's appeal to us to inten-

When the Foreign Ministers of the EEC meet on Monday of next week, I hope the necessary deci-sions will be taken. This therefore can only be an interim statement and a further report will be made to the House after next week's meeting or sooner if required.

meeting or sooner it required.

Mr James Callaghan, Leader of the Opposition (Cardiff, South-East, Lab)—This is an increasingly serious situation. Let it be made absolutely clear from this House that the holding of these hostages, innocent men and women in the employment of the United States, by the militarity in Tehran is a by the militants in Tehran is a violation of international law. It is in defiance of an order of the International Court of Justice and it ignores the resolution of the United Nations.

There can be no acceptance by us of any situation short of the release of these men and women. (Cheers.) I am glad to learn there is now a strong proposal for further discus-sions in the light of the President's message. I do not question Mrs
message. I do not question Mrs
Thather on whether any time
limit has been put for a reply to
the President's message for that is
a matter of minor significance
against the issues we have to
resolve here.

resolve here.

What is necessary is solidarity not only between European countries but also between European and other like-minded countries outside Europe and the United States. If there is to be coordination of our tactics that demands the maximum of consultation between us all. It may mean that we shall not be able to follow certain courses others would like.

It is important we should get the highest common factor. That means giving the ulmost support to the United States in this matter.

The United States in this matter.

The United Nations resolution also called upon the United States and Iran not to resort to military action. That would be no solution, it would give noist to the most they do not contomilate the use of

January.

They also include an eventual and Iran not to resort to military break in relations with Iran if there is no progress. It is important that whatever and should be do solution. It would give point to the most children comments and the most children comments and the most children comments. chilling comment made by Chan-cellor Schmidt over the weekend when he said that in some respects the present situation was not dissimilar to that which existed immediately prior to Sarajevo when no one wanted war but we

drifted into it. irrited into it.

If we are to avoid that, as we must, it is necessary that there should be the maximum coordi-nation between European countries, like-minded countries, and the United States.

T would not rule out—and neither would mot rule out—and if the foreign ministers are unable to come to a satisfactory agreement next Monday there will be an opportunity a week later for the heads of government to take it up and for there to be a suamir conference at an even higher level involving the President of the United States if necessary.

I ask Mrs Thatcher to pursue the course she seems to be pursuing.

We should not be seen, as apparently we are, to be reacting to the situation. There should be a to the situation. There should be a positive policy agreed between us. We should decide on the limits—of action in economic and diplomatic fields. They should be made known clearly to the United States and all those concerned.

I hope that her statement and other comments in the House will

other comments in the House will reassure the American people and administration, which is under great strain, that we fully understand the strain and (rusuration they may feel and that we will do our best to remove it. (Cheers.) Mrs Thatcher—I am grateful to Mr Callaghan. Our objective is to show our support for the American people and President Carter and to do exercitive and strain of the American people and president carter and to do exercitive. people and rresident Carter and to do everything possible to secure the release of the hostages. It is plain that so far diplomatic action has not worked. Therefore after his hopes have been dashed on a number of occasions the President feels we must now 20 2 on a number of occasions the President feels we must now go a stage further in political and economic action. We are auxious

to get the maximum international

they do not contemplate the use of force now. Asking us to go further in political and economic matters and measures is designed to avoid anothing in that regard. I agree that any contemplation of that would be an extremely serious

I hope the foreign ministers will I mope the toreign ministers will be able to reach a decision next Monday. There will be urgent consultations in the meantime. The following Monday is the European summit. We would not rule out any steps for further consultation designed to achieve the two-fold objective of our support for the American people and the release of the hostages.

American people and the resease of the hostages.

Mr David Steel, leader of the Liberal Party (Roxburgh, Selkirk and Peebles)—I agree with the artitude she has adopted. It is unfortunate that President Carter has had to ask the European countries. had to ask the European countries to intensify their efforts in this

matter.

Diplomatic relations cannot be maintained without the absolute acceptance: of the principle of diplomatic immunity. If this precedent is allowed without an additional and additional additional and additional additional additional additional and additional additiona quate response from the inter-national community it is an open invitation to all dictatorships of the right or left to use diplomats

as hostages.
Mrs Thatcher—His comments are a little unjustified. There had been a number of diplomatic moves between the United States and Iran which had aroused great hopes that first the hostages would be removed from the custody of the students into the custody of the programment. government.

When those falled and there did not seem to be any reasonable hope of getting a solution within a reasonable time. President Carter naturally turned and asked his friends to consider futher action. That further request came comparatively recently. It is our wish to respond recently. It is our wish to respond to it as definitely and as soon as

Mr Geoffrey Rippon (Hexham, C)

—I velcome the firm and positive
language in Mrs Thatcher's state-

must do our utmost to respond because of our triendship and

alliance with them, but also because of the appalling situation in which diplomats are still hostages in Iran after six months. Mr Enoch Powell (South Down, Off UU)—Will she make perfectly clear that the Foreign ministers of the EEC collectively have no right or power whatever to issue instruc-tions to ambassadors, and the communique to that effect was wrongly phrased, and that right rests wholly with national govern-

Mrs Thatcher-But they can agree. that each will issue instructions to embassadors. That is what they did.

Mr Raymond Whitney (Wycomb C)—The totality of the collective western response to the situation posed to international peace and security in Iran and Afghanutan have been inadequate and unsatis factory so for.

Will she therefore consider the possibility of proposing an early small summit meeting between the

President of the United States and four or five representatives of western nations because the need is for speedy and positive action Mrs Thatcher—The statement I made was in particular about Iran. We have been extremely active in urging a more definite and more coordinated response in the matter of Afghanistan. This Government has not been backward about giving a lead about what we should do shout Afghanistan. do about Afghanistan.
On the smaller summit: we are meeting in Venice in June in what is normally called the economic summit, but we all feel this time summit, but we all feel this time that we must consider world events, particularly on the first day. If that is not soon enough, none of us would rule out the possibility of an earlier meeting. Mr Tam Dalyeli (West Lothian. Lab)—May I ask the question put to President Carter last night by Mr Fred Emery but really not enswered. Does not any kind of

what next to do end that must be political or economical action, or both.

Mr Eldon Griffiths (Bury St Edmunds, C)—President Carter proposed some time ago precisely the measures he is now asking the the measures he is now asking the measures he desisted from applying them because the allies asked him not to so that his first point.

There are very few Iranian nationals, about 28 or 30. That is nationals, about 28 or 30. That is

Mr Bani-Sadr, the Iran President, who is in these circumstances the best hope, and deprostrate to the United States that in dis-matter we stand together because spart we shall undoubtedly fall. Mrs Thatcher—It is true that after the United Nations resolution was vetoed it was hoped that diplo-matic initiatives would secure furtherance of the cause of the hostages and their release: The Waldheim initiative was not suc-cessful. We must vetom to con-

sider the proposals for which many of us voted in the Security Coun-cil on the resolution which was There have been people in the There have been people in the Covernment in Iran who have seemed anxious to help, believing, as they do, that to keep hostages is not the way to conduct international relations and who do not wish to flout international law. Their hands are not totally free. I agree that we must show solidarity with the United States in this matter.

Mr David Price (Eastleigh, C)— Due to the highly religious nature of the Iranian revolution would Mrs Thather consider inviting someone of high standing within Islam to act as an emissary to Ayatoliah Khomeini before we resort to sanctions?

Mrs Thatcher-Some people in

Islam have been active in this matter and so far have not yet secured any result. I do not think

not least to avoid the likelihood of the United States feeling compelled to take military action.

As an interim measure will she consider expelling from this country those Iranian nationals currently undergoing military training here?

In these circumstances, may I a factor we will have to consider.

In these circumstances, may I a factor we will have to consider.

We also be prime Minister at Mr Robert McCrindle (Brentwood vanishe and Ongar, C)—in the emotional can in strengthen the position of circumstances of a religious revolution is it not just conceivable in these circumstances. revolution is it not just conceivsauctions might prove counter productive? Will she note Mr Price's suggestion?

If a leading member of Islam were not called on to mediate would she note the initiative by

the Pope and, remembering that we are dealing with a religious aspect, perhaps suggest that before the politicians so too far there should be an initiative on a basis like that? Mrs Thatcher-I think it would be wrong to assume that members of Islam have not been active

because, naturally, they are con-cerned that people should not conclude that what has been happening is characteristic of Islam. Many prominent Islamic people would say it is not. I know some people are doubtful about sauctions. But all other methods have so far failed. It would seem that this is the only next step possibly to take. Mr Robert Cryer (Keighley, Lab)
—We all want to see the hostages released. But there is another factor in this delicate situation. ractor in this delicate situation. With the American elections looming close there could be unacceptable pressure put on the Government to make decisions which might prove untenable subsequently. Before decisions are taken, will she get the approval of the House for them?

Government approves **Heysham and Torness** nuclear power plants

Having reviewed the proposals, existing agr reactors, will the Government had decided it Government monitor the new conthe Government had decided it would be right to proceed with the construction of advanced gas cooled reactor power stations at Heysham and Torness, Mr David Howell, Secretary of State for Energy, amounced at question time. The generating boards had, he said, made clear their wish to proceed with the stations.

Mr Frank Hooley (Sheffield, Heeley, Lab) had asked what action the Secretary of State proposed to take on the Government's nuclear power programme prior to the receipt of the report of the Central Policy Review Staff on the nuclear power stations at Heysham and Torness.

Mr Howell (Guildford, C), in making his announcement, added that work was in hand on all the measures announced in his statement on December 18 which provided a framework for the development of the nuclear

Mr Booley-ls it not ridiculous to suppose that the Government's programme is in any way practicable? In the light of the fall in demand for electricity, is he not going to lumber this country not with one white elephant but a whole herd of white elephants?

Mr Howeu-No. He has got it that while we are not going for a crash programme, a massive programme, of nuclear generation capacity increase, we are proposing a steady programme over the coming years which will build up the steady programme over the coming years which will build up the steady programme over the coming years which will build up nur electricity generation from nuclear sources to a reasonable

Even then the amount of elec-tricity from nuclear power which this nation will have by the year 2000 will be less than that avail-able to the French, the Japanese or the Germans in 1985. Since nuclear generated electricity from all present experience is lower cost, the consumer will be the lower. he the loser if we do not build

Mr Arthur Palmer (Bristol, North-liast, Lab)—In practical terms there is a clash between the ex-punsion of the nuclear power pro-trainme and the cash limits being imposed by the Government on the electricity supply industry.

The Cabinet hopes to get out of the dilemma by getting the Central Policy Review Staff to decide in favour of postponing until the appropriate pressurized water reactor is ready. Will be deny these runtours, if they are rumours? Air Howelf-They are rumours. There is no conflict between the Cash limit restraints placed upon the electricity industry and the decision to go shead with the building of these stations. The

cost of these stations is fully reflected in the public expenditure The available technology at the moment is the advanced gas-cooled reactor. The Government's objec-

tive is to move towards the aim of seeking to build pressurized water reactors in due course. In the meantine, here is the opportunity to build nuclear. That is what the hoards will do and they will keep within their cash limits in doing so.

Mr Peter Rost (South-East Derbyshire. C)—Taking account of the delayed time-scale, as well as the unsatisfactory performance of the coal-fired stations.

West, Lab) asked why the Home

Socretary had only reappointed nine of the 14 members of the

Commission for Racial Equality and what were his reasons for not

reappointing each of the remaining five members.

Mr Timothy Raison, Minister of State, Home Office, in a written

reply, said—It is usual to make changes on a regular basis in the

membership of statutory bodies such as the Commission for Racial

Equality and we consider the com-

mission's work should be guided

Race commission changes

struction programme so that it keeps even within the unaccept-able high cost and proposed time-scale proposed of six years per

Mr Howell—There is a strong need, widely recognized, to strengthen the nuclear construction capacity in this country. For that reason, I announced before Christmas the Government's plan to reorganize the NNC and strengthen it to meet the demands which will fall upon it from build-ing nuclear power stations in the coming years.

The performance has not been good in the past. It is essential that the industry should be reorganized, becoming more efficient with righter control of costs.

Mr John Evans (Newton, Lab)— The industry has been bedevilled over the years by the doubt and indecision shown by the Government in general and the Department of Energy in particular. Does today's announcement mean that the industry can get on with the job without further interference from the Prime Minister?

Mr Howell-My announcement also made clear before Christmas that we are setting out a basic programme around which the in-dustry can work with confidence. No one in the industry expects any such programme, stretching ahead over the years, to be completely free from uncertainties and questions as time goes on, but the fundamental point is that the basic programme is there which

gives the industry confidence. Mr Albert Contain (Folkestone and Hythe, C) asked the Secretary of State to visit Dungeness B to have explained to him all the problems of the long building programme

there.

Air Howell—Even despite the de-lays, the prospect is that this station will produce electricity at a highly competitive price. This gives an indication of the strong economic benefits there are from nuclear electricity, which is cheaper even where there are considerable delays and difficul-

Would it not be wise to go straight to the PWR? Mr Howell—The Hinckley B com-pares favourably in cost, taking all into account, with the fossif fuel stations. We have the caparuel stations. We have the capa-city and technology and oppor-tuoity to build the agr stations now. Before we seek to build the PWR, full safety considerations have to be taken into account and there has to be a full and thorough public inquiry.

Dr David Owner, chief Opposition spokesman on energy (Plymouth, Devonport, Lab) said he welcomed the decision without which the industry would not have been able to have the steady ordering pro-gramme vital if the industry was to be viable throughout the next decade and beyond.

Could the Secretary of State give any information about any fall in demand for electricity? Mr Howell—There have been re-cent electricity supply industry figures revising demand down-wards to a growth rate of just under i per cent.

There is an economic case for building nuclear power stations because all the evidence is, and is increasing, that electricity from nuclear power is cheaper even at present prices, let alone with the possible price changes in the dan-gerous world ahead for oil and

by members with experience in

many walks of life.

There have been only two changes in the composition of the Commission since it was first appointed in 1877 and the Home

ecretary decided that the time

had come to introduce more new

been interpreted by some people as

made by the retiring members.

The Government is grateful to them for the time and effort they have given to the work of the Commission in the last three years.

We regret that this decision has

N Sea oil exploration shows signs of growing

The Government's policies to The Government's policies to encourage North Sea gas and oil exploration were already showing sign of stimulating an improvement in the level of exploration and it was proposed that these policies would continue, Mr David Rowell, Secretary of State for Energy, said during questions. Mr Trevor Skeet (Bedford, C) had asked-Does he think that increas-

cent in one year is an incentive or reserving to BNOC 51 per cent of the oil and gas available? Does he agree, too, that giving small operators no special incen-tive to operate in the North Sea will be in their interest? Mr Howell (Guildford, C)-None of the points he makes has got in

the way of the increased momentum we are seeing in exploration. I am confident that when the announcement of the seventh ther momentum and that we will see a considerable stepping up in exploration and development

Mr Martin Flannery (Sheffield, Hillsborough, Lab)—We have sufficient exploration now to show there is ample oil coming from the North Sea, sufficient to stop us worrying unduly about the Middle East.

Grovelling apologies to Saudi Arabia are no longer necessary from the Foreign Secretary (Lord Carrington) because we have enough oil coming from the North

Mr Howell-He is mixing things up. Exploration now means oil in eight, nine or 10 years because it makes time to develop an explora-tion well. We bave to think ahead about supplies.

On availability, the quality of the nil we produce, the match, and the need to enter into world oil trade involves us in exporting and im-porting oil.

So it is in our interest to see a scable world oil market, stable prices, stable trade and good relations with other countries.

Parliamentary notices HOUSE OF COMMONS

HOUSE OF LORDS Today at 2.30: Social Security Bill. committee.

laws within which to do so Alr George Younger, secretary of State for Scotland, said in moving the second reading of the Criminal Justice (Scotland; Bill. If criminal suspects were to be liable to such detention and questioning, they should benefit from knowing what their rights were and he better able to seek a remedy if the powers were abused and they felt they had a legitimate

Mr Younger (Ayr, C) said the question of police powers had aroused most controversy both in public debate. In the media and in the House of Lords. Many of the arguments so far adduced in criti-cism of the Bill were very wide of

The maintenance of law and order (he said) is a prime interest of all of us, and is of particular need to the weaker and underprivi-leged sections of the population. Those who live in good housing in good areas of town or country can afford to theorise about crime and criminology—it is often not, to them, a real daily terror, or even

People suffer grievously from the growing crime rate in our citie and housing schemes, and we shall and nousing schemes, and we shall fail them in a most real way if we fail to equip the forces of law and order with every reasonable means we can devize, to tilt the balance against the criminal and in favour of his victim and innocent people The House should ensure there

was full protection for the-innocent so that the new police powers either did not affect them at all, or if they did, did so in a way that minimized any inconvenience and ensured no hardship or injustice.

If in the process this made life more difficult for the criminal, so much the better. If it reduced the number of wrongdooers who " get away with it " that was surely good news for all. Some less well informed critics had seen the provisions on police powers as an attempt by the Government to pre-empt the work of the Royal Commission on Criminal Procedure which was expected to report within the next year. That criticism was quite unjustified. It was, of course, the case that the Royal Commission was looking at similar questions in English law to those that faced the Thomson Committee in Scots law. However, the basic differences in the legal

system necessarily implied a difference in the remedies.

The recommendations of the Royal Commission, when they emerged, would require to be examined on their merits and in the proper context, as did the their high standing with the community should be enhanced by these powers, which will enable them to be more effective in protecting the ordinary citizen from crime.

The Bill revived the procedure of judicial examination, at which the

Making life more difficult for criminals: Scots Overs police powers to stop and detain defended he basis of the Bill. One fundamental difference was

If police needed to detain and question, they should have proper particularly significant. In Scot-land, apart from certain limited statutory exceptions, there existed no power for the police to arrest a suspect for questioning before charge and, once a parson was

charge and, once a person was charged, answers to questions would be inadmissible at the trial. In England the police might arrest someone before they were in position to charge him and hold him in custody even in minor cases for up to 24 hours for questioning before he was charged.

There were differences between the two legal systems. The question to be asked therefore of the Bill's proxisions was "Are they right for Scotland?" I Labour cries of "No," I It was the Government's contention that they were. The Bill provided a police The Bill provided a police officer might detain a person at a police station or elsewhere if, but only if, he had reasonable grounds to suspect that person of an offence punishable by imprison-The suspect might be detained

whichever was the shorter time. As a result of a Lords amendment be could not thereafter be detained again on the same grounds of suspicion or on any grounds arising out of the same circumstances. There were further safeguards for the suspect in that the Bill required the police to inform him of the reason for his detention and to keep a record of the time, place and purpose of the deternation. It was, therefore, a very limited and

circumscribed power for the police

to hold someone in legal custody and question him. That a similar but wider power already existed in England suggested that it was not the intoler-able assault on civil libernes which some people had suggested.
It had been suggested that to It had been suggested that to give the police the powers contained in Part 1 of the Bill generally would damage their relationship with the community. That view was not justified. Nobody was more aware of the need for good police/public relationships than the Scottish police force themselves. They had shown a sensible restraint in the exercise of their substantial evisities onwer which substantial existing power, which included the power to search for various items, such as dangerous

I am confident the said) that I am confident the said that they will use these new powers with similar moderation; indeed their high standing with the community should be enhanced by these powers, which will enable them to be more effective in protecting the ordinary citizen from crime.

prosecution might put to an accused questions designed to elicit any explanation he might have to offer of the circumstances giving rise to the charge.

The accused would have the opportunity to comment on anything of an incriminating nature which he might have said extrajudicially. Nothing in the Bill removed—as had been alleged—the right to silence. right to silence.

If would remain the accused's right to offer no statement either iudicial examination or at the at judicial examination of at the trial and to challenge the Crown to prove its case beyond reasonable doubt. He might therefore exercise his right to silence throughout the proceedings from the examination to the mal

In the light of criticism in the Lords, the Government had amended the relevant clause to include various safeguards and restrictions. Formal questioning at judicial examination was to be carried out by the prosecutor but the aims, scope and manner of questioning were strictly limited, and the sheriff was entrusted with an able to use new powers of determined of the control of the c aims, scope and manner of questioning were strictly limited, and the sheriff was entrusted with an overall duty to ensure that all questions were fairly put to and station, and it would be possible to The accused had a right to be represented by a solicitor at a

judicial examination and the accused would be told by the sheriff that he might consult his solicinor before offering a reply to any question. The Government believed revival of judicial examination would be of great benefit in improving the efficiency of the judicial process and allowing the accused an early

opportunity, in a legal setting, of putting forward his explanation of the alleged offence.
The Bill offered a fair balance between the powers of the police and the rights of the individual, between justice and efficiency. It some Opposition MPs. Mr Bruce Millam, chief Opposition spokesman on Scotland (Glasgow, Craigton, Lab) moved: ((That this House declines to give a second reading to a Bill which will damage

relationships between the police and public in Scotland by giving excessive powers of deterrior to the p'olice and by providing them with n ew powers to stop and search for offensive weapons." He said parts of the Bill were of He said parts of the Bill were of considerable concern, particularly in the first part dealing with stop and search powers for offensive weapons and with the police powers of detention.

The Government had done nothing since publication of the Bill which had in any way allayed the concern of many people in Scotland. These included perfectly approach by bodies the Law

respectable bodies like the Law Society of Scotland.

and search powers with the poten-tiality for abuse could seriously damage relations between police and public in Scotland and that there could be a serious infringe-ment of civil liberties. That argument, which the Gov-

I that argument, which the Gov-ernment had accepted then, was equally valid today. It was even more valid because if one took account of other provisions, perti-cularly for detention, it was by no means clear that the power in the clause on searching for offensive weapons was necessary. There, were circumstance in dealing with the commission or suspected com-mission of an offence with an mission of an offence with an offensive weapon where a police consuble had a power of airest. That continued, whatever was said in the Bill buff it the clause on detention and questioning at a

search him there... If it would not make much dif-

ference the power sought was a redundant provision, but it would make a difference, it could nonly be in the sense that it would be widely used for searches in the street. That was precisely what they were objecting to and where the danger arose—the power of a police constable to seach in the

Admittedly there are provisions admittedly there are provisions about reaconable grounds for suspicion (He said) but in practice we know that it is the kind of power which could easily be abused. If the power is continued with and used so any extent, it will prejudice relations between the police and young people, and do serious damage to relations between plice and foublic, quite apart from the fact that the action itself is an ivasion of privacy and of civil

Mr Younger.—Why does Mr Millau think it acceptable for a person to be tearched for dangerous drugs and not dangerous weepons.
Mr Millan—The question of drugs is not open to abuse in the way, that a search for dangerous weapons is because the dirumstatices in which the searches can take place are more restricted and hulted than those for offensive

There was 2 gap in the law on detention, and although he did not agree with the present provisions, they should provide in the law for that gap. He wanted the law regularised so that the police knew their rights and so did individual

Gibraltar agreement strengthens ties between Britain and Spain

ord Carrington, Secretary of State for Foreign and Commonwealth Affairs, in a statement reported that the Spanish Foreign Muister and himself reached agreement on April 10 on the reestablishment of direct communications between Spain It is envisaged (he went on) that

the practical preparations will be completed not later than June 1 which will then allow the agree ment to be speedily implemented. This is a very important step, and one I am sure you will wish to welcome, though I should eraphasize that this is only the beginning of what is likely to be a very long The Spanish decision represents

another milestone for democratic spain and I pay tribute to Senor Oreja's statesmanship and the goodwill which he has shown in his approach to this problem. Our agreement makes a signifi-cant contribution towards the strengthening of the United King-dom's bilateral relations with

of the European Community we look forward.

It is also a move of great significance for the people of Gibraltar, who have been cut off from Spain for eleven years. I discussed the implications with the Chief Minis-ter and Leader of the Opposition of Gibraltar in London earlier

Spain, to whose early membership

today.
I should like to stress that the Anglo-Spanish statement reaffirms the Covernment's commitment never to enter into arrangements under which the people of Gibraltar would pass under the sovereig-filty of another state against their

Lord Goronwy-Roberts (Lah) for the Opposition, congratulated Lord Corringion on the results of his efforts in enforcing the age-old friendship between this country and Spain, and particularly on his success in getting a constructive dialogue on the important question of movement by land and air between Gibraltar and Spain. We hope the said) that, although this might be a long baul,

there will be an as speedy as pos-sible termination of the vexacious and mutally damaging restrictions—damaging to trade and damaging psychologically.

I endorse what he said about the riews of the Gibraltarians being the final deciding factor in any possibility of constitutional change

Lord Gladwyn (L1 accepted that negotiations were going to con-tinue for a considerable time. l am not quite certain (he added) what the negotiations will be about. We agree nothing should he done against Gibraltar's wishes. I imagine from the Spanish point of view that the objective will be to achieve some kind of condo-minium, some kind of joint responsibility for Gibraltar. Lord Carrington—I think that is hypothetical. I do not think I

hypothetical. I do not think I would care to answer that. The negotiations will naturally consist of anything anyone wants to talk about. It is all subject to that Important qualification and provise which I made in the last sentence of the statement. It is an important step that the Spanish Government should be a matter of law and also as being prepared to lift the restrictions. I hope as a result of this we shall see Sir Ian Gilmour — The Spanish

some practical cooperation between Gibraltar and Spain.

After Sir Ian Gilmour, Lord Privy Scal (Chesham and Amer-Privy Seal (Chesham and Amer-sham, C) had repeated the state-ment on Gibraliar in the Com-mons, Mr Peter Shore, Chief Oppusition spokesman on foreign and Commonwealth affairs (Tower Hamlets, Stepney and Poplar, Lab) said the House would wel-come the removal of restrictions come the removal of restrictions on movement and the opening of the horder between Spain and Chraltar, all the more so since the 11-year siege of Gibraltar had been wholly unjustified from

We welcome the Government's commitment never the said) to enter into arrangements under which the people of Gibraltor would pass under the sovereignty of another sales against their would pass under the sovereignty of another state against their freely and democratically expressed wishes—that is right.

What subjects are to be covered in the negotiations or talks?

Will be confirm that they will not include the question of the sovereignty of Gibraltar? Sir Ian Gilmour-We agreed to

Sir Ian Gilmour—We agreed to talk about anything. That is a part of the agreement. Nothing is barred; we would discuss anything. That has to be read in the context of our firm commitment to the people of Gibraltar.

Sir Derek Walker-Smith (East Herifordshire, C1—Are the Spaniarts, still intisting that under the iards still insisting that under the correct interpretation of the Treaty of Utrecht any change in the status of Gibraltar would necessarily involve a reversion to Spanish sovereignty? Do the Government accept or reject that as a matter of law and also as being

covernment stated in the talks tar; therefore, the question that they believe that Gibraltar does not arise. Any change in the constitutional arrangements in grity of Spain. We do not take that view and our position is, as I have stated, that there can be no change in the position of Gibraltar in giving up to tar can only take place as a rebe of Gibraltar without the freely and democratically stated wishes of the people of Gibraltar.

Mr Stephen Ross (161-Mr Stephen Ross (Isle of Wight, L) — Can he say anything about lifting the restrictions on the flight paths into the airfield there and also about

the employment situation in the dockyards where Moroccansi have replaced Spanish workers? Sir Ian Gilmour — Naturally the restrictions on the air paths would be one of the restrictions referred to in the statement and should come to an end. This would be beneficial to anybody flying into the area or out of it. The dockward is a matter that will be discussed in the negotiations — as he rightly says.

Spanish workers have been replaced by Moroccan workers,
but the future employment is tiations.

Nr Geoffrey Rippon (Hexham, C) — I do not think he has fully answered the question put by Sir Derek Walker-Smith about the effect of the Treaty of Utrecht. While there is no question of while there is no duestion of unilaterally abrogating British sovereignty or doing anything without the approval of the people, if for any reason we were to leave Gibraltar then the overeignty of Gibraltar would revert to Spain?

Edmunds, C)—In the light of what he has announced, there can be no case for the high air fares which are impeding the tourist development of Gibraltar. There is British sovereignty; there is Spanish sovereignty; but there is a third option called independence. What is his position on that?

Sir lan Gilmour-I have siready stated that. There is British sovereignly, and that will not be altered without the democratically expressed wishes of the Gibraliarians. I cannot go farther than

On the unacceptably high air fares to Gibraltar, with which I entirely agree, this is a matter for the Secretary of State for Trade (Mr John Nott). I hope one of the beneficial results of this agreement will be that they will go

Mr Michael Shersby (Hillingdon, Context of this ag Uxbridge, C)—Have the Government in mind that a referendum should take place to determine the wishes of the people of Gibraltar concerned for their Curves status?

Start. It must context of this ag context of this ag context of this ag context of the agree with reising whatever must be a perfect to do.

We have discuss Chief Executive 2-Gibraltar concerned for their future status?

Sir Ian Gilmour—There was a referendant some time ago. To sansfied. It is

referendum some time ago. To have another would be rushing things very much indeed. There is a long way to go before there is any question of that Sir lan Glimour — We have is any question of that. said later) the Gil no intention of leaving Gibral- Mr William van Straubenzee selves would be re

Just society promised by Liberia's new leader

OVERSEAS.

Liberia's now ruler, Army Master Sergeant Samuel Doc. said vesterday his People's Re-demption Council which took power in a coup on Saturday, was committed to building a society based on justice and human dignity.

In a 14-minute breadcast to the Liberian people, munitored in Britain by the BEC, Sergeant Doe sad the council had toppled the previous Government of President William Tolbert because it was coirupt.

"We know that we cannot do everything for the people at all times, but the people expect the Government to do its best for them." he said in his speech broadcast by Radio Elwa, a Liberian missionary station.

Sergeant Doe was installed as head of state after the coup, in which President William Tolbert was assassinated. Although the new Govern-

ment has made preparations to put members of President Tolbert's administration on trial, it has reappointed three members of the Tolbert Government. Sergeant Doe told a press conference that all Cabinet Ministers in the previous administration not associated

with corruption would be considered for participation in the new Government, Radio Elwa reported. The Redemption Council's aim was to heal the Government rather t han overthrow it, Sergeant Doe said. The re-appointed ministers were those against whom there was insuf-ficient evidence to justify a

trial, Radio Elwa reported. Trials of other former offi-cials were due to have begun late yesterday before a six-man tribunal. Charges were said to have included high treason, rampant corruption of public office and gross violation of civil and human rights.

Radio Elwa reported that Mr E. Reginald Townsend, chairman of Liberia's True Whig Party, the dominant political force in the country before Saturday's coup, was among the officials arrested. bu- it gave no other names. United States plea: The United States and several other nations asked the new Liberian Governmen yesterday to delay the trials of officials serving Presi-

dent Tolbert.
Joyful Liberians packed the streets surrounding Monrovia's main barracks yesterday as the officials were escorted inside to face a military tribunal. Soldiers had difficulty control-ling the crowds as the accused, some of whom had been arres-ted only shortly before, were manhandled into the barracks.

The new Government has assured the United States in wants good relations and will live up to existing agreements, State Department officials in Washington said yesterday.— Agence France-Press, UPI and AP.

Western scientists take part in unofficial Moscow seminar

Moscow, April 14

in a cramped two-room flat in a drab Moscow housing estate some 50 scientists, includwestern Europe, have spent the past two days in tensive scienti-fic discussion while the KGB (the Soviet secret police) have

kept watch from afar. The seminar, unofficial, un-authorized and unwelcome to the Soviet authorities, is an attempt by leading Soviet Jewish scientists who have been refused emigration visas but have lost their jobs, to keep abreast of the latest develop-

abreast of the latest developments in their disciplines. The three-day meeting, which ends tomorrow, is being held in the home of Mr Viktor Brailovsky, a cyberneticist associated with the underground Samizdat journal, Jeus in the USSR. On Thursday plainciothes KGB police broke down the door of his flat, arrested Mr Brailovsky and interrogated him for five hours. He was warned against allow-He was warned against allowing the seminar to take place and then released. But since then the authorities have made no attempt to stop the proceedings.

The foreign participants, mainly Jewish, come from Britain, France, Mexico, Norway and the United States. Most have come here on tourist visas, but a number from Scan-dinavia openly stated on their application forms that they were going to attend the semi-

attempt by Soviet Refuseniks to are plans to publish the pro-keep up their scientific contacts ceedings and in about two and have their work evaluated months the papers from the last by colleagues from overseas. The first, in 1974, was broken op by the KGB. The other two have been allowed to go ahead, the last being in December,

Among the papers presented this time was one from Dr Andrei Sakharov, the dissident Academician now exiled in Gorkiy, and one from Dr Juri Orlov, a physicist who founded the Helsinki human rights monitoring group in the Soviet Union and was sentenced to prison and exile in 1978. In their absence, their papers were presented by colleagues.

Mr Brallovsky said he did not know why the KGB released him and allowed the seminar to take place. But, he added, "It is a great spiritual help to us. We have not only the words but the physical support of the international scientific community."

He said that all the Soviet contributions—presented in English—were purely theoretical, as no scientist had been able to do any laboratory work since losing his job. "Our maximum facility is the pocket calculator," he added. "The international seminar

of collective phenomena", as Czech philosopher, the meeting is entitled to know. The Foreign Office believes has won widespread support from scientific bodies, especi-ally in America, and has an im-

The seminar is the fourth such ners among its sponsors. There seminar will be on sale.

Dr Joel Lebowitz, a past president of the New York Academy of Sciences, who has attended the last three seminars, said the Soviet work pre-sensed was of a high quality considering the constraints placed on the scientists. The only limitation was the result of a lack of daily contact with new developments and other scientists, so they had to con-fine their work to the field in which they had already been working before applying to emigrate.

Czechs accused: Dr Anthony Kenny, the Master of Ballio College, Oxford, accused the Czechoslovak authorities of trying to smash the "Oxford-Prague connexion". He added that British philosophers would continue to visit Czechoslovakia to lecture students and exchange views.

Dr Kenny and his wife, Nancy, were arrested and ex-pelled from Czechoslovakia at the weekend.

Britain is demanding an ex-

planation why Dr Kenny was strested while he was deliver-ing a philosophy lecture to a group of students in the Prague flat of Dr Julius Tomin, the

- although he served less than a quarter of his sentence. For his silence he earned the nick-name of "The Sphinx".

In a preface to his book, he explains that he has decided Karl Carstens and Dr Helmut Kohl, the Christian Democratic Union leader. The talks with Herr Kohl were "friendly and

to speak now partly because the statute of limitations on watergate has expired and his story can therefore, no longer cause legal problems for his former colleagues. He also claims he "owes a debt to history". One small point he overlooks is that he still has to pay off part of \$40,000 (£19,000) fine and about \$300,000 in legal fees.

After tracing his early childhood, which seems to have been characterized first by fear and shame and then by admiration for Adolf Hitler and a determination to become a "strong, fearless man", Mr Liddy joined the FBI in 1957. His two passions as a federal law

passions as a federal law enforcement officer were fire-arms and "defensive tactics". He writes: "I learnt how to take a gun away from a man and to tear off his trigger finger into the bargain. earnt to kill a man with no than a pencil-to maim,

to blind.". Recruited to the White House in June, 1971, he was assigned to a secret group which was to become known as the "Plumbers.". Their role was to secure the reelection of President Nixon at any cost. One of his first tasks was to discredit Mr Daniel Ellsberg, whose release of the so-called

Pentagon Papers", a secret

study of American involvement in Vietnam, had infuriated Mr Nixon. Mr Liddy says that he and Mr Howard Hunt, another Watergate burglar, conceived a plan to lace Mr Ellsberg soup with the drug LSD at an official fund-raising dinner in Washing-

fund-raising dinner in Washington.

The idea was to try to befuddle Mr Ellsberg in public and make him appear a near burnt-out drug case. The plan was finally approved by Mr Charles Colson, special counsel to President Nixon, but the decision came too late for the plan to be put into action, Mr Liddy says.

A few months later, Mr Liddy and Mr Hunt were working on a few plan, this time to discredit Mr Jack Anderson, the syndicated newspaper columnist. rounding the scandal which finally toppled President In his autobiography entitled Will, excerpts of which were published in Time magazine today, he emerges as a ruthless, unrepentant former agent of the Federal Bureau of Investigation, who will do anything he can, including assassination, to stop those he considers to be the enemies of the United States.

States.

Because of his long-standing refusal to discuss his role in the burglary of the Democratic National Committee offices in the Watergate hotel in Washington he was sent to prison for 20 years — a longer term than any of his co-conspirators — although he served less than syndicated newspaper columnist, who, the White House claimed, had compromised an important American intelligence official working abroad. Mr Liddy was told that the intelligence agent's life had been endangered by Mr

Anderson's revelations. "I took the position". Mr Liddy writes, "that, in a hypo-therical case in which the target (Mr Anderson) had been the direct cause of the identification and execution of one of our agents abroad, halfway measures were not appropriate. I urged as the logical and just solution that the target be killed, quickly?

Mr Liddy says that his sug-gestion was approved immedi-ately and that he offered to kill Mr Anderson himself and make the death look like a Washing-ton street crime. However, the plan was later dropped.

After describing in great detail the break in at the Water-gate hotel, Mr Liddy explains how the White House cover-up operation was set in motion.
During a meeting with Mr John
Dean, legal counsel to President
Nixon, Mr Liddy explains how he agreed to take the blame for the burglary. According to Mr Liddy, Mr

Dean replied after some stam-mering: "I don't think we've

gotten there yet Gordon." Needless to say Mr Liddy's

offer was never taken up. Later when he was in jail Mr Lindy says he tentatively arranged for his fellow conspi-rator Mr Hunt to be assassinated when it seemed that the latter was about to cooperate with the Watergate prosecutors. He explains that he was waiting for orders from the White House which never came.

France unimpressed by Carter plea on Iran

From Ian Murray

Paris, April 14
President Carter's thinly veiled ultimatum to Europe that he must have greater support in his dealing with Iran in the near future has made little impression on the French Gov-ernment—and what impression it has made has been unfavour-

The unnamed " specific date by which the President said he is expecting committed European support is believed to be some time in mid-May. But whenever it may be, France is at the moment not disposed to break off diplomatic relations with Iran, or do anything more than maintain its condemnation of the continued detention of

M Raoul Delaye, the French Ambassador in Tehran, is due in Paris tomorrow to report, but he is expected to return to his post soon afterwards. His report is to help the Govern-ment to prepare its position for the European foreign ministers' meeting in Luxem-bourg on April 21, when a joint approach to the Irunian prob-lem may be put forward.

France has enjoyed better re-lations than most European countries with Iran since the fall of the Shab, because it gave refuge to the Aystollah Khomeini in the last days of his exile. There is understandable French reluctance to do any-thing to endanger this privileged position with a big oil producer, and indeed with the

Islamic world in general. France is also traditionally wary of following an American lead in foreign policies, stick-ing out for an independent French and European line, in. the belief that this is the way of breaking the grip of the superpowers on world affairs. Moreover France regards the hostage problem as essentially American, having been created by past Washington policies in Iran and now involving only American citizens. The French view is that it really is up to America to find the solution on

Signor Cossiga, the Prime Minister, told Parliament that Italy bad tried to understand the Iranian revolution and had not wanted to aggravate the situation. It also wanted to defend Italian interests.

"But there is the fullest solidarity with the people and government of the United States and the firmest determined to the states. mination to contribute, inter-nationally, multilaterally and bilaterally, towards the safety and liberation of the unjustly detained bastages", he added. Bonn: West Germany said to-day it would strive for a united response by EEC countries to President Carter's call for action against Iran. The Goverument spokesman, Herr Klaus Bölling, told a press conference that West Germany recognized the need for urgency. "We will do everything in our power to ensure a common EEC posi-tion", Herr Bölling said. West Germany, Iran's biggest Western trade partner and heavy consumer of Iranian oil.

has already declared readiness in principle to join America Canberra: The Autsralian Government today decided to cut back the level of its diplomatic representation in Lean, and will not appoint a new ambassador to Iran for so long as the hostage question remains unresolved. Washington warns Japan cooperation needed to make sanctions whists

day a delightful range of dresses

which cram into no space, are

original, flattering and fun, and are ideal holiday clothes. They

I hate to be without it, but those drums take up so much space and then the top comes off and the me powder is always all over that: crucial little black number.

One of the therapeutic not on the markdown rail. So it was with particular pleasure that I viewed a very high style line with Mrs Joan Ponting, who has her own business in Birmingham, Since experiences for a fashion journalist is to sit with a buyer selecting from a collection. While writers may gasp at the little number with the plastic nip-off fringe, buyers are making a near rote of the blue, tacifully cut, which will do fince in a size 14. I intend to review the collection next week I am going to keep mum about the designer and just tell you what Mrs Ponting finds about fashion today.

In other words they are thinking about you and not about how it is going to look on page three, because all that really matters is not that the garment is on page three but that it is

Good news for the less-than-confident. She must have been dumpy, indubitably saucy, but that bosom would have been at her waist would have been at her waist by now. No wonder Goya painted her with her arms up over lier head. In early years he was such a flatterer. Those horrible kings with fat legs, but he ought to have improved on the horses' legs. Pasterns were

the horses legs. Pasterns were never like that.

But to return to the lady. I speak of the Naked Meja because this note was written on Sunday morning in Madrid and I was observing the said female. All it made me sure of was that the Americans are right in introducing a logging by rather a spoil sport, I suppose
—and that Howard Hughes with
his cantelever efforts for Jane
Russell arrived too late on the

Madrid on Sunday morning.
The bells for Mass, the formality of dress; Balenciaga lives on. The neat suit, double-face coat, tidy shoes and bag. Everyone seems to be elderly on one seems to be elderly on Sunday. In the quiet restaurant, again it is formality. Camel hair coats, black jackets. French hause courure copies from ten years back.

Not copied from French conture 10 years back is the collection I went out to see. It is lovely, modern, supreme quality and eminently covetable and it was made by Loewe, a firm which, after a few hassles with my accent, I would advise you to pronounce approximately

as Leervy. Confronted with leathers as fine as silk, with furs as supple as satin and with just those little dresses that you pop on when unsure what else to wear. Just below the knee, soft pleats, gently bloused tops. The mens wear is very strong too. Hand-some leathers and suedes.

But what tower in my estimation are the accessories. Lovely gloves (back in fastion, you realise), charming handbags of every shape and size.

of every shape and size.

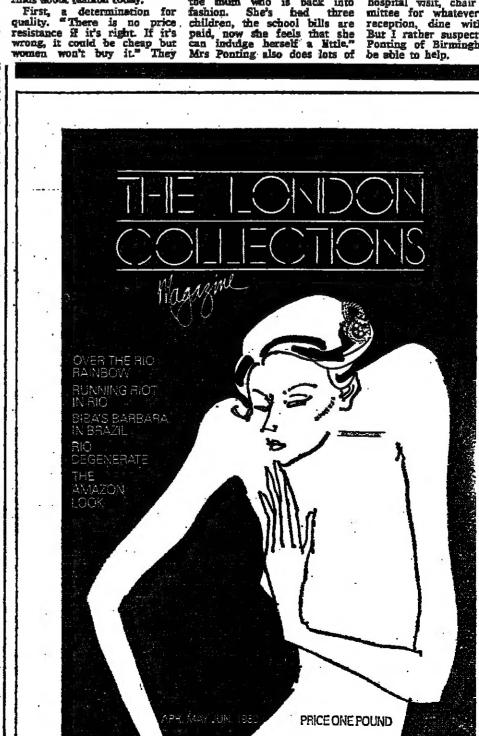

And you can pack the whole lot in the prettiest suitcase. My suitcases get regularly bashed around the world. Last week an interesting piece of wire debouched from my sad baggage and stopped the machinery at Charles de Gaulle airport. Obviously it was " Non " again.

look at the make, they look at teeny sizes, 8 and 10, which is the finish. What is the price well worth knowing.

stopping-off point? "Around There is a real lack of stopping-off point? "Around £200 to £250 for day wear. Maybe up to £300 for something grand for the evening."

Lacking? A really good cotton dress—after all, her ladies travel. A dress for a woman who is now size 16. And the mem who is back into fashion. She's had three children, the school bills are paid now the fash that the

There is a real lack of simple, well cut day dresses. The particularly for a woman who wants to be comfortable, wants to be comfortable, covertly smart and be able to go the whole day in public and in private life. And I do mean the whole day—mayoral lunch, hospital visit, chair the continuitee for whatever, grace by reception, dine with friends! But I rather suspect that Mr. Ponting of Birmingham might be able to help.

Cricket

Nat West is new name to bank on in cup

By John Woodcock Cricket Correspondent For financial reasons the Gilette company are to withdraw their sponsorship of the oldest and most coveted of course cricket's one-day competitions.

Their place will be taken, from 1981, by the National Westminster Bank, whose initial involve-cent is for five years.

First of all, a word of gratitude to Gillette. In the event they backed a winner in 1963, when, as pioneers, they entered the field of cricket sponsorship; bur they were not to know that but they were not to know that at the time. From what Mr Demis Sanan, their managing director (United Kingdom), said resterday, their competition has. become so much a part of the English summer scene that it is no longer identified as widely as Gillette would like it to be with their products.

The Gillette Cup, he believes. is now more a generic cricketing term than a title which conjures up thoughts of sumptuosly smoo shaves. All this, no doubt, is difficult to quantify: I find it, even so, hard to think that any sponsor of a sporting event ever got more mileage for their money than Gillette. They were prepared to go to £140,000 (index-linked for in go to £140,000 (index-linked for three years) to extend their sponsorship, but not to the £250,000 which will be the National Westminster's imital contribution.

So, from 1981 onwards, we shall have to get used to calling the Gillette Cup the Nat West Bank. Gillette Cup the Nat West Bank Trophy. As the National Westminster must know, this, to start rith, will not be easy, any more than it comes easily to talk of the Schweppes county championship or the Sun Alliance Ryder cup or the Sun Grand National. But the name will be there, before the public eye, and no-one for a while will mistake it for a "genetic cricketing term."

ing term."

National Westminster were not without opposition in landing their prize. Only because of that, of course, were the Test and County Cricket Board able to extract such a handsome prize. In 1963 Gillette's "block grant" amounted to 56,500. In the next five years, which is the extent of National Westminister's first "inflation proof" contract, cricket will benefit by £1.5m.

With the cost of running the

benefit by £1.5m.

With the cost of running the county game increasing at an alarming rate, this is wonderfully good news. It will be cricket's largest single sponsorship and follows an obviously much smaller investment by the National Westminister Bank in the Lord's indoor cricket school. For those capable of comprehending these things, the banking group's pre-tax profit for the last financial year was £442 million.

Ballesteros' victory does not mean a shift in the balance of power

Augusta, April 14

We are tack to square one, but with a new subject for debate. What conclusions, we are all asking on a damp, threatening morning on a damp, threatening morning after, are to be drawn from the result of the United States Masters golf tournament? European delight, almost to the noint of smugness, at Severiano Ballesteros's victory, can easily lead to a certain amount of self-deception, to the heliof that the balance of to the belief that the balance of power is shifting, that the United States is possibly losing its domin-

ating grip on the game.

Nobody, of course, sees things in quite those black-and-white terms, but the underlying current terms, but the underlying current of opinion moves in that direction. It would be all very well did it not destroy. To some extent, another argument prevalent in Britain, that a comparison of the results of the four most important golf events in the world—the British and United States Opens and the United States Masters and FGA champlonship—shows the superiority of the one Bridsh tournament. Of all the four, only the British Open consistently produces a great champion. The others too often throw up nonentities.

It hardly becomes a newcomes to the scene at this level to pontificate on such weighty matters, but an examination of the various issues against the background of recent history is an avenue of re-

issues against the background of rerecent history is an avenue of research open to all.

It may be recalled that before
the tournament started it was
noted here that Tom Watson, the
most successful American player
these last three years, prophesied
a winning score of 278. But for
Ballesteros's blioding tour de
force over three rounds and a
half, he would have been about
right. When the tunult of the last
hour or so had died down Jack
Newton, of Australia, and Gibby
Gilbert, of the United States, were
on 279, with Ballesteros four
strokes ahead, a more distinguished American, Hubert Green,
a stroke behind them, and a more
distinguished Australian, David
Graham, two behind. Thus there
were only two home players in the
top four.

On the face of it, this does not top four.

On the face of it, this does not suggest any startling drop in American standards, but where were their men who really counted? Some, like Hale Irwin, failed to survive the cut at 146 after two rounds: Jack Nicklaus was reduced to the role, which he clearly did not relish, of supporting player to Arnold Palmer in a sentimental journey into the past; Warson immself never got in a serious blow; John Milier, for whom many foresee a resurgence, was anonymous; and Lee Trevino justified the contention that he is unsuited to a course that favours the draw rather than the fade. But we cannot dismiss so lightly the huge American victory over Europe in the Ryder Cup as recently as last September. Much more evidence is needed before we begin to question the pastesent merit of the American game.

The palpitations Ballesteros

game.

The palpitations Ballesteros suffered in the few holes after the turn yesterday, when at one time his lead fell from 10 strokes to two, led to whoops of delight among the American press and to increased suspicion on their part that he had not got the sufficient strength of character, for which the Spanish have an expression which is, alas, unrepeatable here, certainly not in its translated form. Here surely was proof at last that his victory at Lytham last year was a gigantic fluke.

Not surprisingly, Ballesteros sees it differently. At the substiquent press conference, during

sees it differently. At the sub-sequent press conference, during which he scored birdie after birdie in his improving English, he said that the way he pulled himself together over the last few holes shows he must have a big heart. He had been angry rather than

Ballesteros wins. Now he can throw caution to the winds.

alarmed. This had been the hardest tournament for him to win because of the "big pressure all week".

Newton, an agreeable playing partner for the Spanish hero, confirmed that what might have been a killer blow, the tee shot into the water at the short 12th, was not water at the short 12m, was not Ballesteros's fault because a gust of wind came out of nowhere on an otherwise still day and caused the shot to be blocked. Two strokes went there and another at the next when Ballesteros played what he himself admitted was a wretched three-iron. "I hit it that much "and a spread of wretched three-iron. "I hit it that much "—and a spread of forefinger and thumb indicated four or five inches—" behind the hill." he said

He was then unlucky, he said. when a good drive at the next hit the branches of a tree. An Ameri-can reporter was daring enough to claim that the ball had hit, not tiain that the ball had hit, hot the branches, but the trunk, and he was cut down to size by Ballesteros's reply, which may seem cruel in the light of day but went down like a bomb at the time: "You have four eyes and I have only two". The reporter wears meetacles.

In any case a six-iron, which be described as a great shot, put him on the green and his troubles were behind him, though for a time Gilbert's putter and Newton's all-round strength enabled them to peck away at his lead. Newton's disgust with the American press for the way they tried to deny Ballesteros his due was muted when he faced them, but he had held nothing back in as interview. held nothing back in an interview the day before. "I've heard some pretty sinde remarks from some of the players that have been completely uncalled for, that he's lucky and a one-potting jessie and all that business ".

There was, he thought, a bit of both jealousy and envy in the American reaction. "America's generally considered to be the tops generally considered to be the tops in professional golf and here comes a 23-year-old and takes some of the highlights away from their superstars. I don't think some resentment and jealousy would be uncommon in any sport, but you know, it's about time people here realized he's a world-class player." They probably do now.

On a lower level it was disappointing to find Sandy Lyle, the last British survivor, finishing with a 78 and a total of 294. He was well out of the first 24 who receive well out of the lifst 24 who receive automatic entry next year. On the other hand, perhaps Britain can take some comfort from the fact that the inwest amateur was Jay Sigel on 289. He came over to win our Amateur championship

Wheeler awaits all-clear for Twickenham

Peter Wheeler, the Leicester captain, expects to be fit for the John Player Cup Final against London Irish at Twickenham on Saturday. The British Lions and England hooker strained his back last week and missed his club's against Bristol last weekend.

treatment in London and hope to be given the all-clear to join my team in training," he said yesterday.

"Our long-term strategy il be to employ all our gifted backs as much as possible. We know only one way to play."

Irish attempting to become the first London side to lift the cup, are also committed to 15-man rugby. Their coach. Par Parfrey, said: "Some Pat Parfrey, said: "Some time ago we decided that we could not beat the likes of Moseley and Gloucester by playing restricted ten-man rugby. Since expanding our came by design we have run away with the London merit table and it is this sort of rugby we want to show on the big day."

Leicester's following will 7,000 from the around club alone, plus a few thousand more from the city

conditions on the White Lady run were sunny and still for the men's slaiom event. In the first run, the Simpson, from Glasgow (100.75) and Alan Stewart, the Scot who captained the Lake Placid Olympic best time was recorded by Christian Orlainsky, of Austria, whose chance of the combined title had anished with Saturday's fall in the giant statom second run, after the first race had seen him neck and neck with the day's avenue. tcam, (102.67).

Italians pick Silvester Milan. April 14.—Mike Silvester, the United States baskethall player who has turned Italian through ancestry, was the surprise selection in the Italian national team for the Olympic qualifying tournament in Lugaro next month. The Italians meet West Germany, Ireland, Holland and Bulgaria in their group.

Rees as replacement

War, had a bad reputation—not for rough play but for dull play. They won their matches through a heaty, hard pack and penalty goals. This is unsurprising now, even under the new laws, but it was frowned upon then. Big forwards and a reliable kicker, that was the Bath recipe. They had livelier periods, for instance when Kendall-Carpenter was captain, and later when Sibley was, but that was still the general pattern in the early 1970s.

Peter Sibley was a wing three-quarter, a fast runner, short-sighted Bath were playing Bristol, always a nerve-straining match, and Bristol were narrowly ahead at The Rec, with little time to go. Sibley's old Oxford friend, Jim Glover, was playing for Bristol and put up a high kick towards Sibley's wing, knowing that there was no chance that it would be caught. But Sibley plucked it casually out of the air and ran over for the winning try. Glover did not know that Sibley had adopted contact lenses.

As the 1970s advanced Bath's style gradually berame more

adopted contact lenses.

As the 1970s advanced Bath's style gradually became more adventurous. They had always been hard to beat, at least at home. John Sterens, the rugby correspondent of the Both and lyest Channiele has written that

" one of the earliest pieces of Beth rugby folklore I ever heard was that they had two distinct teams—one that won on the Rec

and another very different one, often rounded up from the pubs

on Friday night, which went away and took a thrashing ". This was,

Athletics

Sponsors to give £100.000 over three years

British athletics received a £190,000 boost from the Taibot Motor company yesterday. The money, to be paid out over three years, will include support for the Southern Counties AAA international invitation meeting at Crystal Palace, on June 27, a coaching course a day later, and an annual athlete of the year scheme.

A male and female athlete will each be loaned a new Talbot car for a year to help them travel to training and competition facilities. The invitation meeting, the Talbot International Games, will be the first important invitation meeting for athletes this season.

he says, specially noticeable when they had to travel to Wales— though their relations with Welsh clubs have usually been happy.

clubs have usually been happy.

For many years the Rag Doli match has been played against Llanelli. The doll (to be strictly truthful, a succession of dolls) is dressed in the colours of the club who possess it and nied to the defenders' crossbar when the teams meet. In recent years it has usually been wearing red and white, but Bath usually play well against Llanelli, and it cannot be more than a couple of seasons

against Lianelli, and it cannot be more than a couple of seasons since I saw the Bath women proudly stitching on the blue, white and black garments.

The away record has improved, even in Wales, but more remarkably Bath have become known as a running side to an extent not. I think, known before. Even back in the 1930s their most famous

in the 1930s their most famous three-quarter, R. A. Gerrard (who played in the first England side to beat the All Blacks, in 1935-6) was renowned more for his defence than his attack. It there was not have here

his defence than his attack. I doubt if they can ever have had a collection of attacking backs to match Murphy, Horton. Wyatt. Palmer. Beese and company of the present side. And there is the astonishing, young winger David Trick, still a Bryanston schoolboy. He is fast, raw but learning all the time. There is no telling what he might become: another Duckham? We shall know more about that when he goes up to Cambridge in the autumn, an event which Oxford men await with andery.

Leopards may not change their spots, but elephants may show a tendency to turn into cheetahs

Badminton

England in hunt, but they must improve

From a Special Correspondent Grongingen, Netherlands April 14

England stayed in the bunt for England stayed in the bunt for the ream title at the European badminton championships here today, but were fully stretched in beating Sweden. After three team changes, there was a perceptible improvement from the previous day in England's Play. They will have to touch higher peaks if they are to beat Denmark in their final the tomorrow. The big setback to England's hopes was the defeat England's hopes was the defeat today in the men's doubles of Ray Stevens and Michael Tredgett by Thomas Kihlström and Beagt Fro-

Although England were pushed back on their heels by Kevin Jolly Josing the opening rubber to Sture Johnsson, England led 2—1. But they were prevented from clinching the match by the surprise loss of Stevens and Tredgen. In retrospect, the de that proved absolutely vital was the women's singles in which Jane Webster got the better of Anette Borjesson. Although she raced through the first game, Miss Webster played quite nervously in the second and had to come back from 1—6 to win it after setting. Although England were push

win it after setting.

In the men's singles, earlier, kevin Jolly had just one purple patch against Johnsson, who at 34 is 14 years his semor. Using hit reach, Johnsson cut the shuttle oft early, played defity at the net and smashed with power to outplay the Englishman.

England were given the lead by England were given the lead by the women's doubles win of Nora Perry and Karen Chapman who replaced Miss Webster. The English girls seemed to combine effordessly, but their potential might have been exaggerated by the lack of quality in the opnosition. Lem Axelsson and Karin Lindquist.

The Swedes Kihlström and Fröman were 9—0 ahead in the men's doubles before Tredgett and Stevens made any impression. No sooner had they come into the

and Scerens made any impression.

No sconer had they come into the fight than Stevens lost the accuracy of his service an othe Swedea quickly reestablished their ascendency. On the evidence of the two days' play here, Stevens looks as if the season has been too long

for him.

After only a 10-minute break, Tredgert was back to do battle in the deciding mixed doubles rubber. For the first part of it, his play was tentative and careworn, But the brave Mrs Perry held the fort until the blonde West Countyman came into his own.

BESULTS: Grant one: England 4.

Good and bad news for West ! playing after being clear by an X-ra that revealed his

ments of the FA cup semi-final round matches tomorrow follow-ing the two bruising draws on-Saturday, West Ham's Paul Holland is the most doubtful. John Lyall, the West Ham

nanager, yesterday virtually ruled Holland out of the side for the replay against Everton at Elland Road, Leeds. After the player had gone for an X-ray examination on his twisted right ankle, Lyall with There is not to no change. said "There is next to no chance of Pat playing." There was better news, however,

of West Ham's full-back Lampard who missed Saturday's 1-1 draw with a hip injury. Lampard took part in a full training session and it fit to play. Lall is also confident that Pearson and Brush will recover from injuries in time. Pearson, suffering from shoulder and knee trouble, and Brush who has an injured ankle, took part in a light training session. Lyalisaid, "We kept them away from physical contract, but they will both be back in full training tomorrow.

Pezrson, who scored his side's equalizer at Villa Park, said from the club's crowded medical room,

world record

Tickets for the Rugby League Chailenge Cup final at Wembley on Saturday, May 3, have been sold out for the fourth time since 1966. The derby game between Hull and Hull Kingston Rovers will have a limit of 95,000 spectators and receives of well ones. tors and receipts of well over \$400,000 will once again establish a world record for a single Rugby League game. The other finals to attract capacity crowds were St Helens 9 Wigan in 1966, Castleford v Wigan

in 1970 and Leeds v St Helens in 1978. A Rugby League spokesman said yesterday that the attendance could easily have topped 100,000 had such a figure been allowed. There is enormous interest in the Here is enormous interest in the Huli ares, and many would-be supporters who have failed to get tickets are looking around desperately in the hope of procuring one. Contrary to some predictions, the prospect of a local derby has fired enthusiasm throughout the same rather than dampened it.

Cup final receipts All change for coach the musical chairs ga

Musical managerial chairs, or a multi-jerseyed swap shop, will be the name of the game in Rugby be the name of the game in Kugby League in the next month, as several coaching positions will become vacant or be filled.

The process begins today when Ray Batten, the former Leads loose forward, is expected to be confirmed as Wakefield Trinity's coach to succession to Bill Kirkbride. Next week St Helens are expected to announce the succession.

bride. Next week St Helens are expected to announce the successor to Eric Ashton, who is resigning at the end of the season, and it is here that a host of intriguing possibilities arise. Many contenders are being moosed for this plum job, some perhaps to their own surprise. Kel. Coslett. a former St. Helens and Wales player, is the current favourite for the post; but there are several other strong Jobbies being mounted. One is for Alex Murphy, the peopery and aggressive

Yet my vote sull goes to Fash 'n'
Thunder, who has changer stables
since last season and is not trained
by Barry Hills, Flash 'n' Thundar
is preferred in the belie that he
is the faster and that his sharpness
Can be decisive over over a mile

stone where he had won his only previous race a nonth earlier. Naturally there i no knowing whether Fla h 'n' Thunder is up to beating Tyrnayos, but i do know that his traiter is more than just hopeful while the ground is still riding fast.

I have seen llash 'n' Thunder out at exercise his spring and he certainly moved like a decent athlete. As for Tyrnayos, being by the Derby winner Blakeney he looks the sort who will come into his own wher he has even further this own wher he has even further to race. His older half-bruthers, Taxiarchos and Tromos, have both been placed in the Craven stakes and a place maybe the best that his owner, George Cambanis, can have the heart has owner and afternoon when

ne is accorded no such favour now and it goes against the grain to go for him on these terms.

Canto, Star Way and World Leader all met last season in the Champagne Stakes at Doncaster. On that occasion they finished third and fourth and fifth with barely the length of a borse blanket covering them. Clearly there was not much between them then and there should not be much

w. Abinadon was fancied for the Abingdon was fancied for the Middle Park Stakes on the strength of his easy victory in the Granville Stakes at Ascot in July. But a bout of coughing ruled him nut on the eve of the race. He remains something of an unknown quantity. Today's race should tell us whether he has any pretentions to Jasting a mile or whether sprinting will be his game, as his pediaree subgests — he is by the Stewards' Cup winner, Jukebox, and out of a grand-daughter of Horama.

Horama.

As hard as iron after a winter's hurdling, Shaftesbury could easily be good enough to win the Ladiroke Racing Handicap, provided that his enthusiasm has not suffered. He was disappointing this winter, but there is a feeling afoor that he will do better again now that the ground has dried.

Twelve months ago Henry Cecil Twelve months ago Henry Cecil saddled Chalet to win the Crawfurd Handicap, which is for horses who did not make the Free Handicap. This time he is relying on Prince of Padua, who must have been hard to assess with only one race behind him. Our Newmarket correspondent is inclined to think that the handicapper has underrated the handicapper has underrated him. In which case Prince of Padua shoud be good enough to thwart a group comprising Chance, Flying Dolphiu, Socks Up, and Numas.

start was a false one as well

Wolverhampton's new Flat season began yesterday with a false start, despite the presence of starting stalls. Eleven of the 20 two-year-olds declared for the Ryon Maiden Stakes, including the well backed favourite Violino Fandango, covered the full five furlongs at racing pace, while the

furlongs at racing pace, while the starter frantically shouted and waved his red flag, and the commentator did his best to tell them. All if were consequently withdrawn when the race was officially off 28 minutes late. Sir John Guise, the starter, said that, as he mounted his rostrum the vibration triggered the starting switch, which is evidently quite sensitive. The stewards were satisfied that the incident was due to a technical rather than a human error. Reports are being sent both error. Reports are being sent both to the stewards of the Jockey Club and to Racecourse Technical Ser-vices, who are responsible for the

vices, who are responsible for the requipment.

The 11 withdrawn horses did not come under starters orders and hets on them are void, but winning backers who took a hoard price for the false race have 40p in the pound deducted. When the face was re-run, Another Rumbu beat the odds-an Royal Blood.

Jockeys who rode out the false race, included Steve Cauthen, Willie Carson, Trevor Rogers, George Duffield and Geoff Baxter. All are very experienced riders, and admitted that they felt worried as the stalls had opened so quickly, taking them by surprise, but no one wanted to be first to pull up.

When a Flat | Astrantia to break ice | You too can have a bat for Pritchard-Gordon

By Michael Seely

Gavin Pritchard-Gordon enjoyed his best ever season in 1979. saddling the winners of 58 races worth nearly £120,000. This afternoon at Wolverhampton this much-liked and energetic Newblow of the current campaign by winning the first division of the Spring Maiden Stakes with Spring Astrantia

Astrantia.

Owned by Major Michael Wyatt, the Deputy Senior Steward of the Jockey Club, Astrantia cost 10,000 guiness as a foal. On her only appearance as a two-year-old the Gay Fandango filly was beaten haif a length by Annt Bessie at Cutterick Bridge. Astrantia is bred for speed as her dam finished second in the Queen Mary Stakes at Royal Ascot. Wulverhampton's sharp five furlongs should suit her down to the ground.

If Astrantia is bred for speed

her down to the ground.

If Astrantia is bred for speed her principal rival, Nuppence, should be a flying machine judged on gedigree alone. Foaled at the Holland-Martins's Overbury Stud, Nuppence is out of Money for Nothing. The filly is therefore a half sister to such fast sprinters as Mummy's Pet, Arch Sculpture and Parsimony, who won the July Cup in 1972.

There is little horseen the most

There is little between the pair on form, as Nuppence was also runner up on her only outling last season benind Grove Mill at Windsor. Neither stable has yet the peak form, but both fillies have been working well at home. Astrantia is just preferred. The second division of this race may fall to Quiet Touch. Trained by Jeremy Tree, who won this race last year with Nest Builder, the Decoy Boy gelding showed promise last season and ran well for four furlongs behind Shayboob

at Nottingham. Quiet Tooch has Mother Flutter and Stepping Gaily to overcome.

Apart from Newmarket the other

Apart from Newmarket the other racing today takes place at Hamilton Park. The best bet of the Scottish course should be Oyston Estates in the Middleward Handicap, Hamilton is a course which notice certain horses and Patrick Haslam's four-year-old has also won four times on the circuit. Oyston Estates ran exceptionally well when third to Queen's Pride in the Ladbroke Sprint Handicap at Ayr and is 2 firm selection.

Sir Mark Prescott is also a suc-cessful raider north of the border. CESSIN Fainter norm of the border. The Newmarket trainer can land a double with Chimaera and Spindrifter. Chimaera has Teesport Boy and Ramboro Again to beat in the Dechmont Maiden Stakes. Our Newmarket man says that Spindrifter has shown enough promise and the hearth to be capable of on the heath to be capable of ulnning the Campale Maiden Stakes.

Runaway Runnett: Folkestone's Privy Councillor Stakes yesterday was won in fine style by Runnett the colt, who moved to John Dunlop in January from Willie Hastings Bass's Newmarket yard, had eight lengths to spare at the post over Khedive, with Helexian a head away third.

Joe Mercer pushed Runnett into the lead at the two furlong marker and the partnership went steadily clear of their toiling rivals. Dunlop's assistant, Authony Couch, could not outline any immediate plans for the colt, but Runnett could be a force in valuable sprints this year.

like mine, Hilton says

John Hilton exploded the myth surrounding black-faced rubber table tennis bats when he arrived in London yesterday after winning the European championship with one in Berne. "Apart from hard work there is no secret", he said. "You can go into a high street sports shop right now and buy a bat exact! like mine. It has been on sale for at least ten years".

The bat, with an anti-loop sur-

on sale for at least ten years."

The bat, with an anti-loop surface on one side an dattacking rubber on the other, was given most of the credit for Hilton's achievement in becoming the first Englishman to win the European tirle. Bur the 32-year-old Manchester insurance agent said: "Five years ago I decided to use the har in attack rather than approach.
"Because of my work I don't have time to prepare properly, but this time my firm gave me a whole month off fore the championships. That made all the difference; and the praparations were perfect. I know the bat hilped, but I had something to do with it as well".

Hilton, ranked only third in Europea and

Hitton, ranked only third to England, nowhere in Europe and unseeded in Switzerland, has still to digest the magnitude of his triumph. "It never entered my head that I could win in Berne",

For the record

up the game seriously only seven years ago, he will earn a maximum of £3,000 from sport this season. But already sponsorship offers from equipment companies are flooding in and, with a guaranteed increase from 2,000 to 55,000 by the English Table Tennis Association, he should receive five times as much next season.

Even though as European champion he is an automatic entry, he still has to receive permission from his employers to play in the Norwich Union Masters tournament at Preston this month.

ment at Preston this month.

Peter Simpson, the England team captain, endorsed the view that it was not only the bat that won the title for Hilton. "The Chinese have used different surfaces for years. Yet when they win titles it is the person and not the equipment. Now it is an English player, everyone is looking for reasons."

Iill Hammersley. England's

ing for reasons."

Jill Hammersley, England's former European women's champion, who confirmed that she has played her last competitive game, said: "I have never seen John play better. He was a completely different person, Normally he makes unforced errors, but there were none from him this time."

Weegee Photographers' Gallery

Robert Frank

ICA

But Weegee is such a nice photographer; cosy, you might almost say, Certainly in comporison with Robert Frank. And porison with Robert Fronk. And yet it is not all that easy to work out exactly why one feels this. The happenings he reflects are mostly pretty nasty. He has a cheery interest in the slain, lying in gutters in pools of their own blood. Car accidents are his meat and drink. And he has a very special affection ford fires—apparently nurtured by the extra rate of pay he could get for a really good fire, when he was moonlighting as a freelance news photographer from his news photographer from his obscure job in the darkroom of Acme Newspictures during the early 1930s. Image after image of firemen climbing into build-

ings, victims climbing out, the bereft and bereaved bewailing their losses in the street below, all attest to his amazing instinct for arriving on the scene of the drama moments before the authorities—hence his profes-sional name, acquired when a policeman asked him how did he do it, with a ouija board? It seems as though it should

be very noir; there will be no the world. But somehow it is It is rather like film non made by Howard Hawks: If it is by Hawks it is not going to the very noir; there will be no nermanic wallowing, as buoyancy keeps breaking through. And Weegee is endlessly buoyant, humane, inquisitive. Like such Holly-ward chesical as Months and wood classics as Hawks and Ford, he took no notice at all of the idea of art; he just did what he did, and left others, if they would, to classify it. His view of New York in the 1930s view of New York in the 1930s and 1940s is very much the equivalent of Brassar's Paris. He adores pimps and prostitutes and drags. He feels really at home in Bowery bars and grimy East Side tenements. He enjoys ugliness, not in the tense neurotic way that Diane Arbus does, but because, it has been plausibly suggested, he empathized completely with it. He was himself a strange, solitary nightbird of a man, who lived alone for most of his life, concentrating wholly on his work and, it seems, com-

from an oversurned fruit truck? All these people are so alive and immediate, reflecting a belief not only in the Family pletely happy. The era in which he lived and his personal background must also have something to do with his pervasive cheeriness.
Born Arthur Fellig in Austria
in 1899, he went to America
with his family when he was 10,
and belonged to that generalistic photographs, the sort which made up his first book. Naked City, and ignores his later, rather whimsical studies in optical distortion. It also tion of immigrants for whom America really was the land of promise, who never got over their first devotion and delight. And this was much more a matter of people than us more than we have nor-melly seen before, in that the of places: he hardly ever, as far as I know, took a picture in which people were nor the centre of interest. What fas-cinates him above all his reaction: the amazed and rather disapproving woman passing the embracing lovers in a midtown bar; the scrawny and furious "critic" hissing dis-gust at the rich old ladies showing off their jewels; the bereaved women at a fire, mourning like something out

And his character studies are so civeting. Who can forget Norms, the small time Sophie Fucker in billowing sating whom he loved to photograph?

Stanley Sadie

Festival Hall/Radio 3

concert a kind and degree of

orchestral virtuosity unfamiliar

It was again clear why Mr

Celibidache needs unusual re-

hearsal time: without it, what be

does would be appallingly risky. For example, where a

sustained dissonance resolves

he often teases our ears by holding it minutely longer than expected; or he demands new

refinements of balance; or-above all—he varies the tempo in highly individual ways and

expects the orchestra to follow.

The first and last of those were characteristics of his reading of Kodály's Dances of Galanta: a performance distinguished by the ripe rone and sensuous phrasing of the clarimetrist (whom I take to be one

nettist (whom I take to be one of the joint principals, Roy Jowitt), by the sweet and smooth string playing in the npening section, and by the rhythmic vitality of the final one, where Mr Celibidache seemed to be conducting with his knees, his elbows and his test besides more conventional

sear besides more conventional

As on Thursday, much was

is an advantage; it is certainly quite interesting to see what Weegee, in his own lifetime, for his own purposes, cropped out. But I am a bit worried about the full-plate principle, if dogmanically applied. Some photographers do their final compositon in the camera. Others treat the contact sheet as a sort of sketchbook, from as a sort of sketchbook, from which they will select what they want and discard the rest. See ing the full originals like this. we are getting a valuable in-sight into the workings of Weegee's mind, but we are not slow. But in Ravel's Ma mère l'oye this allowed time for the

self-dramatizing

most delicate nuance exqui-sitely poetic rhythmic shaping in the Pavane (especially its last bars) and "Perit Poucet for the most precisely defined and glittering textures through-On the eve of their departure to Japan and Korea with Sergiu Celibidache, the LSO showed in the first helf of Sunday's out. I have never enjoyed the piece more. Brahms however is another matter; his symphonic logic im-poses constraints of a kind that mutes the individuality of Mr these days in London. It is unfamiliar partly but not vholly because few conductors Celibidache's muse. Or ought to Where it did not, notably in ask of an orchestra the kind of thing Mr Celibidacha.asks, and fewer still get it.

the Allegretto, the results were somewhat eccentric, for in spite of beautiful clarinet playing (this time Jack Brymer) the excessively relaxed first tempo, the not quite convincing changes of pace, and the oddi-ties of balance (like the over loud bassoon in the coda) hin-ted at a certain arbitrariness. So too did the great emotional weight assigned to what is realnot much more than a tran ritional passage near the begin-ning of the Andante: gorgeously done but damaging to the whole, The playing here was less

consistently responsive; habits die hard in so familiar a work.
One or two things went awry in
the finale, though it had plenty
of power too. The one movement that I found wholly persuasive was the first, done with strong, seamless phrasing and a sumptuous lyricism at every orchestral level that put many of Brahms's ideas in a fresh without lessening the music's tension or turbulence. The diminuendo-cum-railen-tando of the coda provided an aptly rich valediction.

Sir John in Love St John's

Judith Nagley

Shakespeare's Merry Wives of Windsor has long held a fascination for composers, and Vaughan Williams was no exception. Drawn to it as early as 1913, when he wrote incidental music (now lost) for Benson's Stratford production, he determined to deal more fully with Sir John Falstaff and, undeterred by Verdi's masterpiece, he worked inter-mittently on The Fat Knight for four years from 1924. After a change of title. Sir John in Love was first given in 1929, with amateur forces, at the Royal College of Music.

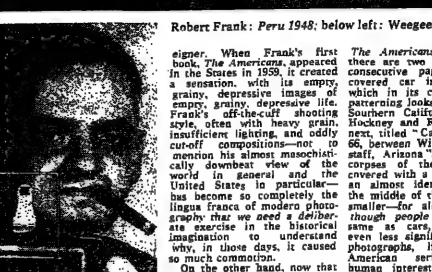

The title change is significant. Vaughan Williams clearly had a soft spot for the fat knight. and though he keeps more closely to Shakespeare than Verdi did, his score highlights Palstaff's romantic escapades while Verdi's concentrates on buffoonery and comic inter-change, A rich blend of Elizabethan lyrics and English folksong, welded by the tools of a modern harmonist and orchescrator, makes for an evocative work of ebullience and charm Some of the reviews on this page are reprinted from yester-

day's later editions.

-not fully deserving of the neglect it has received.

Sunday's enterprising concert performance by Abbey Opera under Antony Shelley went some way to explaining that neglect. The work requires a strong and versatile company: the number of solo parts is large and their music demanding; moods and tempos change quickly and contrast exposed in much of the resemble. strongly; much of the ensemble music is humorous, lightly scored and fast-moving, while the love music needs a warm lyricism that must avoid sentimentality.

On the whole Abbey Opera surmounted those difficulties successfully. Piero Maffei made a strong, bombastic but endearing Falstaff, well supported by an amusing trio of followers Lawrence Reed's Master Ford. alternately consumed by jealousy and self-pity, was particularly touching, and Christine Batty (Mrs Ford), Diana Munn (Mrs Page) and Celia Marchisio (Anne) gave powerful, convincing performances. Though John Walton's Fenton scarcely met the demands of his part, most of the minor roles were well done. Antony Shelley's direc-tion was authoritative, but more flexibility of tempo would have been welcome and the orchestra was generally much too loud.

finally seeing the pictures the way he meant them to be seen. He published what he meant, and the rest should be regarded only as additional documentation, not necessarily as works of art newly restored

eigner. When Frank's first The Americans, for example, book, The Americans, appeared there are two photographs on consecutive pages, one of a covered car in Long Beaco, the coolly schematic grainy, depressive images of empry, grainy, depressive life. Philharmonia/Rattle Maltings, Snape

Paul Griffiths

Snape's concert hall comes always as a surprise. Between festivals one forgets the full marvel of the sweet, nourishing maketer's bloom this building adds to musical sound, for opportunities to hear music there are not as frequent as the ball's acoustic qualities would merit. But perhaps that will change. Certainly a welcome and important initiative was taken on Sunday, when the Philharmonia under Simon Ratrie gave the first of five occasional concerts in the Malt-ings by the major London orchestras, all sponsored by Capital Radio and the Suffolk station Radio Orwell.

Capital's interest in live classical music is of course not new, but the Maltings project is an extension of support and confidence that is bound to give one cause for hope, not only for the greater use of a superb concert hall but also, and much more significantly, for the whole future of per-formed music in times of financial difficulty.

The programme was devoted to Mabler and to an intelligently planued survey of his creative life, beginning at the end with the Adagio from the

In the song cycle Mr Rattle was more dramatically insistent in his drive, forceful not only pressing his tempestuous view of the third number but throughout the set. As a result Ann Murray, the soloist, was sometimes placed under strain and obliged in the rush to snatch at a breathless speechsong. She did, in the first and last songs particularly, find room for some beautifully floated phrases, but for the most part this was a perform-ance that showed how much Mahler was learning from the more anguished side of Wagner. sive meaning, and the distinct and in that respect it was not without interest.

Where Mr Rattle's athletic impulse really told, however, was in the fourth symphony, whose ascent to heavenly bliss was desperately willed. Right at the start the sleighbells, rather coarse in sound, brought a note of frantic urgency along with their simplicity, and the work developed movingly as a search for a resting-place that could never be fully accepted. Yer this approach was entirely musical, not at all melodrany ntic, and gained consummate justification in the finale when Miss Murray's pure tales of paradise could be questioned by an orchestra playing throughout this concert at peak

London debuts

tal included many of the usual items, like Schumann's Fantasy Pieces, Brahms's F minor Son-Preludes, but there were also several wanders off the beaten track. A British premiere was claimed for Ellion Carter's Pastoral, a pleasant if loquacious essay in the composer's neoclassical manner with more than a nod in the direction of Copland's prairies, and a second British performance for the imaccompanied concerto by Valentino Bucchi, a useful display piece. Then there was a brand new work. Interplay, by Dino Castro, whose utterly conven-tional handling of some flims: ideas was not to be expected from its title.

Despite this unfortunate premiere, Mr Bennett's programme displayed a taste for navely that was encouraging, but that may have caused him to overstretch his reserves. Too much of the recital was done in monochrome, with little thought given to the shaping of phrases or the possibilities of timbre. And this was all the more dismaying because Mr Bennert showed himself at times to be fully aware of his instrument's capabilities. In the slow movement of the Brahms, for instance, he produced an excepdonally smooth, inward plants simo, and the Lurnslawski pieces were neatly turned in brighter tones.

Stephen Benneu's clariner reci- clans of the week were both more dependable, Martin Rennert, an American-born guitarmade the mistake of ata and the Lutos awski Dance choosing a great deal of music not written for his instrument including Scarlatti sonatas, a Dowland group and a Bach lute suite. These provided some successful moments, like the beautifully dark, hollow opening to "Tarleton's Resurrection" by Dowland or the light, leaves rough of the Pack furnished. clever touch of the Bach fugue but there were also times when the music's uncomfortableness on the guitar showed true, and could not be disguised even by Mr Rennert's careful attentions. His fluency and his command of colour were thus most im-pressive when he was playing true guitar work, the passa-caglia by Franz Burkhart emerging as a masterpiece of clashing musical planes.

The pianist Joseph Smith, also American, brought with him the fine Griffes sorata and a piece by his teacher, Seymour Bernstein, but centred his recital on Schumann, whose C major fantasy demonstrated his strengths and his weaknesses. Nothing in the performance was maladroit, but Mr Smith's techexpertise was viriated rather by his earnest desire to please. One wanted more personality, a feeling for the big-ness of the work, but nerhous the dirmally small audience was a dempener. At any rese. both in Schumann and in Men-The other two young musi- delssohn he contented himself

with the tidier virtues of meaningful, mobile phrasing, a nice sense of balance in dense f balance in dense and strong finger chords

control.

Paul Griffiths

Musica Intima's members, Sybil Michelaw (contralto), Christo-pher Wellington (viola) and Benjamin Kaplan (piano), al-ready have well-established solo careers and reputations, so this ensemble debut was able to relect greater performing experience and musical maturity than is normally encountered in a debut event. The repertory for such a group cannot be vast, but it is certainly varied, not to say diffuse, ranging from arias with viola obbligato from two of Bach's cantatas, warmly projected by Miss Mich elow in a manner that recalled her fine solo performances in Bach's larger choral works, to two darkly coloured and characterful Sonnets by Rubbra. Solo or duet items included piano pieces by Franz Reizenstein, brilliantly executed by Mr Kaplan, and three songs Mr Kaplan, and three songs called A Curse on a Closed Gate by Norman Peterkin, which I found posturing and pretentions but which clearly suited Mr Wellington's tastes. rother better than a Hummel sonara had done. Miss Michelow's rad ant reading of Schumann's Frauenliebe und leben was the evening's highlight.

Why the American people do not want to go to the brink over the hostages

I should like to enter a note sent. It is being said, and widely reported, that the American people are becoming so angry about the continued detention of the hostages that President Carter is forced to take some action, even if unwise, to appease that anger. I do not believe

In the first place it is difficult to what it means. Does it mean that American people in their millions would like to see the President take some imspecified form of military action against Iran? Or does it simply mean that some leader writers and gossips at Washington cocktail parties are saving that the President cannot hold a line of moderation? I very much suspect that this is the public opinion that is in evidence, and that the genuine and broad American public opinion is more self confident, more rational and more restrained.
It is true that a Newsweek poll

shows a narrow majority—51 per cent —for tougher action, but polls are bad at measuring intensity and worse at ussessing options.

I was in the United States for most of last mouth. I visited Washington only at the end of my tour and found it as usual to have a view of reality somewhat remote from that of the ordinary American a thousand or more miles away. Yet even in Wash-ington I did not find that people dif-fered from the view about America's critical problems which I found in the rest of the country.

Americans are worried about infla-tion, the Soviet Union and oil, in that order. A great number of Americans have been demaged by inflation in their private lives and expectations and the first shock of this has created the sort of anxiety that existed in Britain in 1974.

The Americans have been ex-tremely concerned since the war about the power of the Soviet Union, and are concerned about its expansion in the 1970s and about Russian angression in Afghanistan. They do not see war with the Soviet Union as of Aighanistan does seem to them to be an extremely dangerous and threatening event. It is important that the Russian leaders should realize that Afghanistan has primed the bomb of American public opinion;

Three American hostages attend mass against a background of posters villifying President Carter.

further aggression would be incalculably dangerous.

Compared to these two anxieties and to the further anxieties about the future of oil supplies, the question of the hostages was treated by those I met as important bur secondary; Russia matters more. They did not lack compassion for the prisoners themselves: they did not lack indignation against a government which could relerate the holding of diplomats as prisoners, but they saw the main threat to America and to the ing from Russian expansion. were entirely willing that the President should handle his relations with Iran in such a way as to avoid pushing Iran towards the Soviet Union.

in March and I would be surprised if this has changed in Aprilthe policy on the hostages was not the central issue of political dispute. At the lunch meeting of Governor Reagan's I attended there was no question about the hostages and no reference to the bostages in Governor Reagan's replies. There was, I think, one reference to the hostages in Vice President Moudale's Speech, which I had heard the day before, but it played only a minor part in the big meeting he arrended. There, is even some resentment of the cover age of the story on television, and I heard the comment that American television was miking the hostages story for all the sensation it was

President Carter may be worried that Governor Reagan will use the hostages to persuade the American electorate that the President has been weak. Of course the Americans would like to see the hostages released and will reward success with their support; to some extent they will blame the President for failure, but would be difficult for Governor Reagan to play up the issue without the risk of being seen as a man—too rash and aggressive to be made President. Governor Reagan knows perfectly well that this was the reputation which descroyed Sena-tor Barry Goldwarer over Vietnam in 1964 and he has no desire to fall into that trap over Iran in 1980.

should understand in Britain. They see the Russian invasion of Afghanistan as an intolerable act of aggres sion, a threat to all the free nations They do not understand that their allies should contemplate sending teams to the Olympic Games. If the Union Jack is paraded through Moscow by British athletes while the Russian helicopter gunships are killing Muslims in the mountains of Afghanistan, the American people will consider that a peculiarly shameful act-in my view rightly so.

It is this distinction which has to be borne in mind. American public. opinion tends in my view to be more realistic than Washington opinion. The Americans are at least as resilien and reasonable a people as the British They suffer, as we do from a sensational fringe in the media, and not all their politicians are as wise as Solomon. There are bad newspapers in America as well as in Britain there are foolbardy politicians in America us well as in Britain, but the mass of the American people and the mass of the American electorate are reasonable and thoughtful. That per-ticularly includes the mass of the black electorate, who though they are the least privileged in jobs, social conditions or education. Americans are not fools and not warlovers.

The American people see that the detention of the hostages is an outrage committed by an elderly religious fanatic and his followers in a country which risks losing its free-dom because it is a neighbour of the Soviet Union. They see that nothing should be done in dealing with this outrage which would add to the risk of Iran becoming enother satellite, or damage the cause of the independence

They feel the outrage, but very few of them want to take steps which would actually make the situation warse. The President is free to be parient, as he has been so far, and his patient, as he has been so tar, an its allies are free to continue to counsel patience. They must, however, recognize that they will have to pay a very heavy price in loss of American confidence if they are seen to condone Russian aggression in Afghani-

Lord Lane : oth edifying and entertaining.

The civil way to run a union election

Of all the unions whose political kiterally thousands of members, fortunes I have chronicled here over the years, none has had a more dramatic history in that time then the Civil and Public Services Association, the largest of all the Civil Service unions. Control has swung wiolently be-tween the moderates (of all sions) and a coalition of Com-Trotskyists, adherents of the Militant Tendency and fellow-travellers of these, grouped under the title of the Broad Left. Nor have changes in control reflected an almost evenly balanced membership, a slight shift in whose opinions has tilted the balance the other way; on the contrary, massive majorities on the national execu-tive committee have vanished almost completely, and the no less enormous majorities re-placing them have in turn found themselves wiped out at the next election.

The cause of this instability is not that the CPSA's membership consists of exceptionally volatile men and women, given to changing their minds en masse from election to election; it is not the result of hallotrizzing (though there have been serious irregularities, resulting in the calling on one occasion of fresh elections); it has little to do with the rival policies put forward by moderates and Broad Left. The reason lies in the extraordinary voting system the CPSA has bitherto had; it is probably the least democratic of any union that has elections at and it certainly makes possible, and indeed has repeatedly ensured in practice, the electon of caudidates to whom the overwhelming majority of the membership are implacably

worst effects of branch-meeting elections with the worst effects of the block vote. Some of the branches in the CPSA have

yet the votes of all those members were thrown, by a winner-takes-all system, behind candidates chosen by conference delegates who were in turn approved at a meeting that might be attended by as few as 50 members; and that was the only way voting for such offices as president and NEC was, or

At the head of the moderate

forces there has stood for some years now the remarkable figure of Kate Losinska (who, despite her surname—she mar-ried a Pole—is a Cockney fully deserving of the traditional adjective "indomitable"). She and her fellow-moderates have been the victims of some of the worst smear campaigns seen in the field of British trade unionism since the days when men like Cannon, Chapple and Byrne were trying to wrest the ETU from the hands of the Communist Party which had stolen it from its members. Undeterred, Kate Losinska and her colleagues have fought on, and are now close to a victory that may well put the CPSA beyond recapture by any group or political party that does not truly represent the views of the membership as a whole. By unrelenting labour in the field, drumming up every possible member to go to vital meetings (and aided, for once, by tactical blunders on the part of the Broad Left), they have suc-ceded in abolishing the block vote, at any rate for the election that is at this moment under way in the CPSA. I say at any rate for this election because if the Broad Left wins it, they will take every possible step to reverse that decision and return to the undemocratic

system. Unfortunately, although the block vote has been abolished, it has not been replaced by a direct postal ballot with

Mrs Kate Losinka : smear campaign

voting -papers sent to indivithat may follow in time. but for the moment the system is half-way between the totally undemocratic system and the sible opportunity for the mentbership. CPSA members will vote either at branch or subthose members who have cast moderates who truly represent their individual ballots will be the views of the members counted, and all of those will rather than of such bodies as

he counted individually, not dual members at their homes; aggregated, in a winner-takeif the moderates win now, all system. (It is worth pointing out that when a referen-dum was held among the entire membership of the CPSA, they voted by a majority of seven to two in favour of abolishing the block vote

system.) It naturally follows branch meetings, or at their every member of the CPSA place of work; but they will who wants control of the vote with individual ballot union to be in moderate hands, papers. Only the votes of and in particular the hands of every member of the CPSA who wants control of the

the Communist Party and the Socialist Workers Party, should be sure to cast his or her The ballot-paper itself is a

formidable document looking rather like a pools coupon, though perhaps that is a good augury; a nation used to the intricacies of the Treble Chance should have little difficulty in completing such a ballor-form. that there are two sections in which they should cast their votes. First, for president; the section for this vital election is at the top of the ballot-paper. There may be, barring withdrawals, as many as five candidates for the post, but, since the election is not by any form of proportional representation, one rote only should be cast with an X and moderate mem-bers should give it to Kate Second, for national execu-

tive committee. There are 28 places to be filled, and mem-bers therefore have up to 28 votes. Moderate members should ignore the four right-hand columns of the ballot-paper (the ones headed A, B, C. D), as these are for use in a pro-cedure that is not in practice relevant in this election; in the column immediately to the left of these, headed "Up to 28 votes, Mark X", they should yote for the following candidates, and for these only: John Barr Cliff Betton Mary Hickman George Holah John Billouin John Butcher Mary James Darryl Jones Kate Losinska Cyril Messider

Albert Carr Marion Peggy Mylward Sylvia Parry Chambers Ken Coope Sylvia frene Devenish Frank Pemberton Dave Dickins Ken Richards Liz Edge Mike Egan Charlie Elliott Sheila Scott-

Anderson Jemy Fosdal Jean Wilde Alan Gilhespie Par Womersley Ada Hepple

are being invited to vote twice for Kate Losinske once 45. president and once for the NEC That is quite correct; if she is defeated for the presidency her name then goes forward for the NEC, and if she is elected for

the presidency her NEC votes will neither invalidate the ballot-paper nor keep another moderate member off the NEC. I do not suppose that CPSA members, moderate CPSA members whatever their views and poli-

cies, will need extra reasons for voting for the moderate state. But in case any do, let me conclude by giving the faces about a recent vote in the present NEC, which is controlled by the Broad Left. On February 21, 1980, the NEC had before it, among other motions, one which read as

NEC strongly condemns the action against Prof Sakharov Afghanistan, which has resulted detente and increasing the arms race. NEC further condemns the actions against Prof Sakharov and his wife, for fighting repres sion and insisting on freedom of speech and other basic freedoms. The motion was defeated by

12 votes to four, with one abstention. With a single ex-ception, all the Communist, Trotskyist and Broad Left members of the NEC who were present voted against the motion, including Mr Peter Columan, Communist Party member and candidate for the presidency. All those who voted against criticizing the Soviet Union are candidates for the NEC. I think CPSA members the condemn the Soviet action in Afghanistan and against Dr Sakharov will have little difficulty in concluding that thos who do not condemn it should not get their votes for union

LONDON DIARY

In death as in life. Sir Cecil's certain style

The list of individual beneficiaries in Sir Cecil Beaton's will, which was published yesterday, reads like a roll call of the haut monde of an earlier and more glamorous age than our own. His careful choice of gifts also reveals a sense of style and chivalry that seems equally old-

Greta Garbo, to whom Sir Cecil once proposed, receives and Irene Worth, the actress, a Picasso engraving of a girl's head. The Countess of Avon gets a painting of a white standard rose, Lady Diana Cooper two candiesticks, Diana Vree-land, a former editor of Harper's Bazon and Vogue, two sketches, and Anne, the widow of Ian Fleming, a drawing of an apple by Lucien Freud.

Sir Cecil left his collection of press cuttings to the Victoria and Albert Museum, and all his own paintings, stage designs and photographs to his secre-

tary, Miss Joyce Hose. The oil portrait of him by Berard goes to the National Portrait Gallery.

The current issue of Fabian News contains the following "Wanted Urgently Socialism tomorrow - fresh thinking for the Labour Party. Members who have no jurther use for this pamphlet are urged to return it to the office. I know social democracy is going through a crisis, but surely things can't be that

Left of Labour?

A somewhat unlikely sounding event is taking place in Nottingham this weekend: a gathering of radical midwives. Although radicalism is not the first quality that one might associate with that splendid hody of women (and men now as well?), I suppose it is understandable view of the generally rather unglamorous image they have had since the days of Mrs

A spokesperson for the recently formed National Asso-

cistion of Radical Midwives trains is absolutely clapped told me that its main aim is to out" and there is simply not provide a support group for midwires who feel isolated and under-valued by doctors and other medical staff. The radical midwives also believe that women should be encouraged to take a more active role in the birth of their children, a commendably altruistic aim since it would presumably reduce the need for their own services.

SOB story

It was had enough when railway travellers to Brighton were deprived of their morning kippers a few years ago with the withdrawal of Pullman trains from the line. Now comes the news that from next month passengers to three other seaside resorts in the South-East will get no sustenance at all on their journeys because of the phasing out of buffet cars.

The services affected are those from London to Has-tings. Margate and Clarion. The trouble is that, in the words of British Rail, "the kitchen equipment on these

the money to replace it. Quite what kitchen equipment is needed to dispense

their cellophane-wrapped sandwiches and Maxpax coffee is something that mystifies com-muters on the Hastings line. They are mounting a vigorous campaign against the cut and have collected more than 450 signatures on a SOB (save our buffet) petition. An action committee is can-

vassing support from some of the many celebrities who use the line. So far Harry S. Steptoe fame) and Adam Faith have pledged their support and will presumably be seen tucking enthusiastically into pork pies and weeks to show how popular the buffer cars are.

If the campaign fails, and the Hastings buffet service is withdrawn as planned when the new timetable comes in on May 12, there is serious talk of a private catering company taking over the old cars and providing meals and drinks on the trains. It is a piece of

Not quite so blue Writing a history of the Labour Party in Bournemouth would, one might think, be a rather dispiriting experience only to be undertaken by someone with a fascination for

the underdog In fact, Mr Ian Taylor, a local Fabian and college lec-turer, who is rackling the task with considerable verve, has found evidence of surprising socialist stirrings in the truest of all true blue towns.

In the 1890s, it seems, the House of Commons and from presence of a group of Russian the recollections of a veteran

emigrés led by Count Talstoy (not, Mr Taylor is quick to point out, the Count Tolstoy) made Bournemouth something of a centre of Christian socia-

There were Independent Labour councillors in the town as early as 1909. The Bourne mouth Labour Party itself. dates from 1918, the same year in which a Nonconformist clergyman stood as the town's first. Labouc parliamentary candi-The golden age of socialism

in Bournemouth seems to have been the 1930s, when the town boasted a Labour Male Voice Choir and was regularly host to Labour Party conferences. Since then, the red flag has flown at rather less than half mast, akhough Lord Shackle ton came within 6,000 votes of pusting the Conservatives in 1945 and Dame Judith Hart scored the highest Labour vote in the fown in 1951.

tion, and those which are small enough not to need facturing facilities. These smaller countries will be quite happy to buy outright, and not require licence for production of equipment.

Back in Britain, the worries which many people had over manpower require-ments are now fading. Many of the large manufacturers have already had to deal with redundancies not so much because of System X as the loss of electromechanical equipment.

The Post Office Engineering Union (POEU) is negotiating with the Post Office over manning levels for Sys-tem X exchanges. The two to TXE4 standards, being a hard-wired grammable exchange, unios standard will be adopted for all System X exchanges.

Denise Clarke Electronics Weekly

One-third the cost of comparable facsimile machines.

If Nexos stands for anything it stands for communication in the office-not just in the office but also between offices. Communication is the key to a more effective, more productive and more fulfilling way of working

One aspect of office communication is the movement of documentation. Today that movement needs to be instantaneous. Modern business is hamstrung by the toil and

trouble and unreliability involved in using conventional means. Facsimile is the answer. But so far the facsimile

systems available are slow inconvenient to operate, and therefore expensive. This need no longer be the case!

The Nexos 6400 is here to provide RAPID. RELIABLE and ECONOMICAL document transmission via your ordinary telephone. From London a standard A4 letter could be copied in Aberdeen in 30 seconds for a cost of 6p. Only the Nexos 6400 provides all these features:

- * Top transmission speed of only 30 seconds. * Unique skipping white space (SWS) data compression. So you only pay for the content, not the white space.
- * Fully compatible with CCITT Group 2 equipment,
- * Incredibly sharp image. * Local copying.
- * Unattended reception.
- * Simple operation. * Automatic document feed (optional).
- * All solid state, modular construction.
- * Centralised fault reporting service. These features make the Nexos 6400 simply the fastest analog facsimile system in the world

It actually costs a fraction of the price of comparable machines.

If you would like to know more about the Nexos 6400 just complete the coupon below and . send to:

Nexos Office Systems, 27th Floor, Centre Point, London WCIA 1QA.

AXE: the best digital switching investment for telephone administration

Here are 23 considered opinions.

Argentina

One digital exchange, serving 7000 subscribers, ordered July 1979. Cut-over 1981.

Australia

A system choice for the modernization and extension of the Australian telephone network. Contract awarded September 1977.

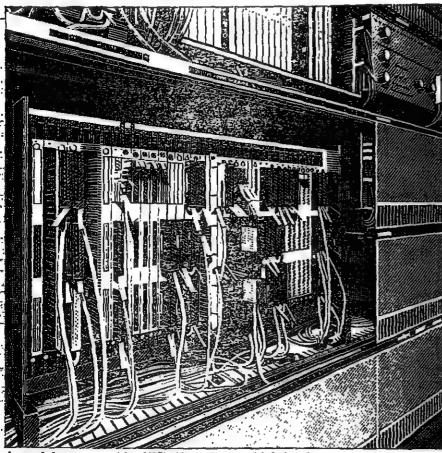

A first analogue exchange with a capacity of 4000 lines is on order. Future deliveries to be produced locally. About 1.5 million lines will be installed during the 80's.

Bahrain

AXE first ordered February 1979. On order: a combined exchange for 10,000 subscribers and 6000 trunks. Cut-over 1981.

Brazil

Tender issued by Telebras, in 1976, for an analogue switching system. AXE was one of three systems chosen for the development of the Brazilian telephone network. Five analogue local exchanges serving 50,800 subscribers are on order. Local production.

A special computer (the APZ 210) and a new high-level programming language were designed to meet the requirements of the AXE software package. As a result of this unorthodox approach, AXE software meets the need of telephony staff, rather than computer specialists.

Colombia

Following keen competition in international tenders, AXE digital exchanges serving 230,000 subscribers and 12,328 trunks have been ordered.

Denmark

First ordered AXE October 1977. Orders to date: three digital transit exchanges for 26,000 trunks; one exchange for 10,000 mobile subscribers; two local exchanges for 6000 subscribers. First exchange cut-over 1980.

Finland

First AXE ordered March 1975. In service: one local analogue exchange for 4000 subscribers (cut over 1977) and one digital transit for 480 trunks (cut over 1978). The following digital exchanges are on order: one exchange for 10,000 mobile subscribers; 19,000 local lines; and 1440 trunks for extensions.

France

In May 1976, after an international tender for analogue exchanges, the French PTT selected AXE as one of two systems. The first exchange, with an initial capacity of 12,900 lines, was handed over in June 1979. Local exchanges for 660,000 subscribers are on order. Local production.

Ireland

The digital AXE system has been chosen by the Department of Posts and Telegraphs, for an extensive expansion and modernisation of the telephone network of the Republic of Ireland.

lialy

First AXE, with a capacity of 960 lines, handed over in December 1978. In addition, two transit exchanges with a multiple capacity of 4800 inlets are now in service. On order: a further 7680 trunks—two exchanges with capacity of 6240 trunks and 1440 trunks for extensions.

Knwait
Three digital exchanges for 30,000 subscribers, ordered in June 1977 after an international tender. Another tender resulted in an order for an additional 40,000 subscribers.

Recently, extensions for 40,000 subscribers have been ordered, bringing the total to 110,000 subscribers.

Madagascar

One local exchange, serving 20,000 subscribers, ordered in 1978.

Malaysia

Three AXE local exchanges, serving 40,000 subscribers, are on order.

Mexico

Contract signed March 1979. On order: digital AXE equipment for 25,000 subscribers. Cut-over 1980.

Netherlands

International tender concerning a system choice. Late 1977 PTT announced their choice of AXE.

To date, orders placed for 16 local exchanges with a capacity of 42,496 subscribers. Original decision for analogue equipment has recently been changed to digital. First exchange will be cut over in 1980. Three districts in the Netherlands – Rotterdam, Breda and Goes – will be served by AXE.

Overall long-term economy was the main objective for the designers of AXE.

The language designed by Ericsson for man-machine communication is a good example. It has proved so effective that it is now accepted as an international standard.

Norway

First order September 1978: two digital exchanges for mobile subscribers with a total capacity of 25,000 lines. The Oslo exchange starts operation in 1981, the Bergen exchange in 1982.

Panama

First AXE ordered February 1978. On order: three digital local exchanges with a total capacity of 10,000 lines. First exchange cut-over 1980.

Saudi Arabia

The tender, issued in 1977, was the largest single contract in telecommunications history: an SPC system choice for the extension of the Saudi Arabian network. On the 25th January 1978 a consortium of L M Ericsson, Philips and Bell Canada was awarded the contract.

In addition to up-grading existing Crossbar exchanges, L. M. Ericsson will deliver 24 AXE digital exchanges for 183,000 subscribers and 66,720 trunks. To date, seven transit exchanges for 42,240 trunks and six local exchanges for 90,000 lines are in service. On order: 93,000 subscriber lines and 24,480 trunks.

Spain

First AXE ordered December 1977. Three digital local exchanges for 30,000 subscribers are on order. First exchange to be handed over in 1980.

Sweden

First exchange cut-over March 1977. On order digital local exchanges for 242,000 subscribers digital exchanges for 20,000 mobile subscriber

United Arab Emirates

Fully-digital AXE exchanges serving over 40,0 subscribers were ordered in January 1980.

Venezuela

One local AXE exchange serving 5000 subscril handed over December 1979.

Yugoslavia
First AXE ordered January 1979. On order: twe
exchanges for 76,000 subscribers and two trans
changes with a multiple capacity of 5135 inlets

production.

AXE was designed from the beginning to be completely modular in hardware and software. This means that functions can be added, do modified with minimum impact on other functions.

Today, the world's telephone administrations a with the need to make a rapid transition from a to digital telephony. The key investment decision choice of telephone exchange system, since the exchange, once installed, has an economic life years. The exchange contains the intelligence of network, and defines the possibilities for flexible long-term development.

The Ericsson AXE digital switching system is sidered exceptional in its ability to provide low term operating costs and outstanding versatility March 1980, just 37 months after its introduction been chosen by administrations in 23 countries.

Success like this is vital to any digital switchi system. It means that AXE will be continuously enriched and developed, making it even more a to telephone administrations all over the world.

These facts contribute to making AXE a soon term investment.

good intentions than It is sometimes said that the lementation, he fitted post-colonial armies have been the bane of independent Africa. e of African politics he had promised not They have rarely had a function another presidential except as an internal security a was not-on paper force; ill-disciplined and illy state, yet it was his managed they have been a drain the first manifestaon impoverished economies; and they have made possible a form of caesarism which at its worst opposition party, responding to the hat gave it a growing has degenerated into the terror hat finally brought and anarchy of Amin's regime, or into destructive civil wars like that in Chad. hana, Nigeria and

Yet in a one-party state, the army, reflecting the people, has been the surrogate opposition, the alternative government. African dictators can only survive if they control the army, which means they must give it-and not just its officers-fair pay and perks. Neglect of this, especially in depression and inflation, was an invitation to a coup. Those who have kept the army small and occupied (as in Kenya) or disarmed and productive (as in Ivory Coast) have fared best.

regime in Liberia will do more phone or francophone, have never succeeded in solving the basic economic problems which they inherited along with power taken at gunpoint, even though they relied on the same bureaucracies as their predecessors. That is why they have not lasted indefinitely. The processes whereby they have been removed have varied; the basic cause of their removal has been their growing unpopularity arising out of failure. It took a Tanzanian army to unseat Amin (and his own army's disloyalty); hut in Ghana and Nigeria, by contrast, the army has itself re-established constitutional rule -within a notably conservative framework. The question now is whether African politicians have learned from the abundant lessons of the past decade, and will curb a lust for wealth and power that uncurbed inevitably generates military envy and emulation, or makes the army the only recourse of oppressed

people wanting redress. Perhaps the most hopeful outcome would be armies that left politics to politicians, administration to officials and redress to the courts, but exercised a watchful censorship over all three, while standing as the symbol of national unity in fissiparous societies. Liberia shows that the cra of But the various military coups is not yet over.

IERS AND THE COMPARABILITY MACHINE

"ommission's report a "realistic" advance allowance lunch supervision, extra-curricusay might have been for the award, at a level unspecified but probably not far from bow up the limitathe actual amount. But some hasis on which the individual authorities, already refers to work. The thrown out in their calculations - ata bank of informaby not being able to impose work, for use as transport charges, are going to find their education budgets is for settling pay harder than ever to balance. am's more remote

The main thought behind the In several earlier report is that differentials should be widened—something ommission based its ready-made factor which is indeed desirable if the jy-point compariprofession is to attract appliared aspects of difcents of high quality and ambition. It also concludes that It was not easy to tory comparisons, shrinking demand for teachers Ats tended to be is an overrated factor in the context of pay-a judgment commission turned

which is more disputable. The attempt to make comparisons was also hampered in the case of the teachers by a and commissioned peculiarity in their bargaining factor plan. The customs. In most other employments it is normal for pay and conditions of work to be idence they had negotiated within the same machinery. The good sense of that is obvious, as pay cannot red to the oldof thumb. This efficiently be considered in isolation from the question of post parties. It what is being paid for. The parties per cent short teachers cherish the nebulous their duties, a measure of how as it enables them to apply induscan expand in in- trial sanctions while claiming . As for the local that they are still fulfilling their the rate support contractual responsibilities.
Int last year made Action of this kind, involving

lar activities with children, meetings with parents, and so on, bas become increasingly common.

The Houghton report of 1974 recommended that teachers should receive a professional salary in return for a professional commitment to their workwhich both sides agree (when it suits them) means much more than time-table duties. This year, the teachers' negotiators accused the management of acting improperly in asking them to make a statement about conditions of service to Clegg. The commission's terms of reference excluded such matters; so it did not consider them : it simply took the actual state of affairs for granted. It notes that the teachers themselves pointed out how much of their work must be done outside the classroom, and gives great weight to a study by the National Federation for Educational Research which shows that (contrary to rumour) teachers' actual hours of work through the year are similar to those commonly worked in whitecollar employment. It adds that its assessment is based throughout on the extra-curricular activities which are part of the "ohligation" of teachers to pupils, parents and schools. So they are; so they should always be regarded in future, both in pay bargaining and in disputes.

UCLEAR PROGRAMME

anne it announced d approval only ago, This had a British designed Cooled reactor s would be placed the first American ressurized Water built in the United aid be ordered in bination of a cash be Central Electring Board and an reduction in foreelectricity demand dle years of the he orders for the is in jeopardy. The Review Staff to ie effects of delay in of the AGRs on ndustry. The CPRS t still the decision ralance. After more e of hovering over 7, or indecision over design Britain

whether it should win design, or buy United States, it another change of ninent we for the British. unced yesterday is

few weeks the no more than common sense. As as seemed on the Mr David Howell, the Secretary ing drastically the of State for Energy, told the House of Commons, the continuation of the policy will not increase public spending. increase public spending. Allowance for both AGR stations has already been made within the White Paper on Public Spending and is included within the electricity authorities cash limits.

Cancellation or serious delay would have gone a long way to killing an independent nuclear industry. It would have meant many redundancies, particularly in the depressed Tyneside area. and could have placed the United Kingdom in the position of having to rely on an American design which has yet to receive final safety clearance or to pass successfully through the public. inquiry which the government

has promised. The British reactor has not had a happy past. Its develop-ment has been dogged by indifferent design, late delivery and poor reliability. Its chances of winning export orders are now. slim. The only chance of getting into the international market would be through licensing the American design. Powerful forces within government came to believe that rather than continue spending on a homegrown product which would forever he denied international success, the

gamble on the acceptance of the PWR should be taken. Such a gamble, however, would have risked the ending of Labour party support for the nuclear programme, and that would have risked a further change of policy and further uncertainty for the industry.

Since the accident at Three Mile Island doubts over the safety of the American design have made its acceptability to the British public less than assured. doubts have strengthened by expert evidence given to the Select Committee on Energy which has been considering the nuclear programme. Without a guarantee that the PWR would prove acceptable, cancelling the AGRs could have meant that Britain might have ended up without a nuclear programme at all, or trying to force through a programme that the public did not want. Future energy supplies remain uncertain. It is unsure whether either imported or home produced coal could make up for the expected fall in North Sea oil and gas production in the 1990s. It would have been foolish indeed to scrap the British designed nuclear option on the basis of revised demand forecasts subject to great uncertainty and cash difficulties the electricity authorities, which resulted largely from a mild winter.

. .

industry have all along had support in cash terms from both governments and also from the White Fish Authority and the FEOGA grants from the EEC. Many of the vessels at sea would not be there if the industry had not received that support. Any appeals from the industry. have been met as illustrated by the £3m which the Conservative Government has given as temporary aid for the next six months to tide the

industry over a difficult time. Mr Usher is forgetting that the fishing industry accepted the need for conservation and small quotas. particularly of herring. If a free for all had taken place the seas would have been fished out in a few years and where would that have landed the fishing industry. Let me assure Mr Usher that this Government is backing the fishing industry to the full. All ministers in Scotland and England who have responsibility for fishing matters are desperately trying to get the new Common Fisheries Policy out of the EEC which is acceptable to the industry. If many other industries had the tolerance, forbearance and trust

which the fishermen have in this Government the country would not

be in the position it is today. I would recommend Mr Usher to obtain copies of all the fishing debates and questions on fishing which have been made since this Government took office. He would see the determination which exists for the future of the fishing industry. Public opinion would not tolerate the demise of an industry the hands of those whom they have fought for centuries. We are not afraid of Brussels, and no part the fishing industry will be traded away in our negotiations with the EEC which has been confirmed time and time again by the Prime Minister, who has the full support the House in our determination for the successful conclusion of a new Common Fisheries Policy which will give the fishermen a living and a benefit to the nation long after the oil and gas have gone. Yours faithfully, ALBERT McQUARRIE,

House of Commons.

March 31.

Coming out of care

From Lord Ranfurly Sir, I feel that some attention needs to be drawn to the situation regarding housing accommodation in which young people coming out of care at the age of 18 find themselves.

A County Council Authority having a county-wide responsibility for social services does not have a responsibility for bousing. This respousibility is vested within the various. District Councils which come within the geographical county boundaries. Other authorifor example the London Boroughs, are responsible for housing and also social services. Some of the latter do in fact accept a

housing responsibility for young people who have been in the "care" of that particular borough and some do not. Regrettably, some authorities regard their responsibilities as having ceased on the day the young nerson reaches his or her eighteenth birthday and some others will contive to maintain varying degrees of

care. The London area presents social workers in incalculable problems regarding housing for young people leaving care. In the main they are not of high earning potential at 18 and the rents now being asked, even for minimal accommodation, are far above their means, Section-2 (1) (c) of the Housing (Homeless Persons) Act, 1977, stipulates a priority need for accommodation as "... vulnerceasing to be entitled to the residential aspect of care, automatically

becomes a virinerable person. Yours faithfully, RANFURLY. President, Shaftesbury Homes and <u>".Arethusa",</u> 3 Rectory Grove,

LETTERS TO THE EDITOR

Ulster and the Union

From Mr G. C. Attfield

Sir. Like Mr Brian Anson (April 11) I, too, am an Englishman, but I do not find his letter very helpful. In particular it seems to ignore that, although history is inescapable, what we are looking at now is a situation which, whatever its

historical causes, affects actual people living in 1980.

I doubt whether many English or other British people would be greatly averse to Northern Ireland becoming an independent state or to its being united with the Republic, if either of these courses were the wish of its people. Indeed, one the wish of its people. Indeed, one of the few objectives which can be said to be written into the constitution of the United Kingdom is the union of Northern Ireland with the Republic, if and when the people of Northern Ireland consent.

The wish of the Republic and of its people that Northern Ireland should join them is generally taken for granted, but what has seemed to me to be lacking is a reasoned argument for this union of peoples. Territorial tidiness can hardly make a case, and the view apparently held by Mr Anson, that the happy state of a united Ireland was marred by British oppression, until the even more arbitrary and cruel imposition of partition, just will not stand

It seemed possible that a reasoned statement might come out of the BBC Newsweek programme last Thursday evening, which was devo-ted to Republican views. But the only argument for unification seemed to be that it would fulfil the aspirations of certain Irish patriots, most of them long dead not a word about edvantages and disadvantages that might be expec-ted to accrue in the here and now, and in the future, to the generality of the inhabitants of the Republic-or of Northern Ireland. And although there were some references to the need to reconcile differences between the respective cultures of the two areas, there were no suggestions whatever as to how this

When thinking of these troubles (and some others around the world)
I am often reminded of Aeson's iable in which it was the kindly warmth of the sun, and not the blustering assaults of the north wind, which persuaded the man to remove bis cost.

I suggest that a decent and peaceful solution of this problem is de-pendent on the Republic of Ireland formulating and adopting a specific political programme (referring, if appropriate, to any cooperation expected from the United Kingdom) which would make the people of Northern Ireland, or at least a substantial majority of them, content to join those of the Republic. I submit that this is the only field

in which a "political initiative" of any value can lie, and that the United Kingdom Government should Yours faithfully,

GEORGE C. ATTFIELD, 1 Long Close. Farnham Common.

From Mr Dan Del-Rico Sir, You write of the people of Northern Ireland being expelled from the United Kingdom. Not the most extreme Nationalist would suggest that, but only that the six north-eastern counties of Ireland of which but two have Unionist majorities, should be reunited with the other 26 counties. It would then be a free choice for the inhabitants to leave or remain and one suspects that the majority of Unionists would not in fact leave their beloved Ireland.

Yours truly. DAN O'C DEL-RIVO, Wenlock, Wenhaston Halesworth, April 10.

Exodus from Cuba

From Mr Jeremy Bunt Sir, Graham Greene (April 12) accuses the West of hypocrisy in its attitude towards Cube's would-be emigrants and the Vietnam boat people, but he overlooks the macrupulousness of a government that suddenly encourages exodus on

It is no good Mr Greene talking this context. If, as he suggests, Russia were to open her frontiers to all who wish to leave, then Western governments would, quite rightly, limit the numbers they were prepared to receive. But one-way tickets are not "freedom of movement". What constructive Russian critics like Roy Medvedev ask of their own government is the right of Soviet citizens to travel abroad and return without hind-

If that genuine freedom of move If that genuine freedom of move-ment were granted by communis-regimes then the dammed-up flood of emigres would turn into a trickle of those able to find jobs and a welcome overseas—and the West would no longer appear hypocritical in the core of Caphan Greenie in the eyes of Graham Greene. Yours faithfully,

JEREMY HUNT, 18 St Michael's Road, SW9. April 13.

Allies' response to Carter plea

From Mr Alan Lec Williams and Mr Joseph Godson
Sir. In commenting on President
Carter's request of his allies to support him in taking economic and

diplomatic measures against Iran vou rightly state in your editorial (April 10) that solidarity does not necessarily require its friends "to give automatic support to all American policies". This imperative, we are sure, would also be shared by Carter. However, no sanctions will be effective if they are not supported by other major nations. Like the Soviet Union's invasion of Afghanistan, Iran's criminal action is of direct concern to all Western allies. Justice, human rights and adherence to diplomatic conventions, like genuine detente and respect for the sovereignty of nations, are indivisible.

After all these months of agony in the conventions of agony in the conventions of agony in the conventions.

in Iran it is no longer good enough for America's friends to keep on renerating that while they continue to support Carter's principles they do not uncritically agree with his policies. Except for expressions of sympathy, they have to date not tome forward with any set of policies which might possibly help

Your own suggestions, such as rallying opinion in the third world, returning to the United Nations and further use of the allies' diplomatic hannels, have all been tried but, so far, to no avail. Indeed, until now Carter has held firmly to moderation in the face of sharp criticism which has sometimes extended to ridicule on both sides of the ocean. How much longer can any selfrespecting nation, small or big, be expected to endure such humilia-

The truth is that the conflict between Washington and Moscow over the Red Army's invasion of Afghanistan and the conflict be-tween Washington and Tehran over the 50 hostages have revealed a very serious divergence in economic and political interests between the United States and its allies which cannot but bode ill for our freedom and way of life in the years ahead. This is an election year in the

United States and the American public is daily becoming more frustrated by the mtal failure of Carter's inexhaustible patience and the lack of visible support of America's friends abroad. Under such pressure one wonders how long Carter can delay taking those "other actions" he has threatened to force actions" he has threatened to force the release of the hostages. In that eventuality, the sufferers may not only be the unfortunate hostages but

America's allies and friends as well, in no small measure due to their own narrow and short-range business

as usual interests. Yours faithfully, ALAN LEE WILLIAMS JOSEPH GODSON, Reform Club, Pall Mail, SW1. April 11.

From Dr Walter Hauser Sir. In your issue of April 10, Pro-fessor Louis Halle argues from his staunch Eurocentric position that it was as a result of a decade of increasing weakness in the Atlantic societies, "that one of the bastions of containment, the Shah's Iran, collapsed", leaving an open breach in the containment wail, and that this sequence of events precipitated the invasion of Afghanistan. What a simple and comforting view of a complex world.

Presumably greater Western rigilance and strength in Ivan would have propped up the Shah's bastion for some time more, but surely there are more fundamental reasons for the Shah's collapse. Let us not presume in 1980 that complex be "won" or "last" by the West, or an one else quite so simply. The Shah's system came apart essen-tially because it failed to respond to the felt social, economic and political, and indeed cultural needs of a substantial segment of the

of a substantial segment of the Iranian people.

Our failure is to recognize that fact and to qualify our policies and actions accordingly in an increasingly plural world. Islamabad, Tehran, New Delhi and other states of the region and the non-European world, govern their internal and external relations by a logic determined by their self interest, which, we are finding with some pain. May we are finding with some pain, may not always be the same as ours. Finally, it is remarkable to bear Professor Halle place Russia's conquest of Afghanistan in historical perspective by suggesting that it is part of a "defensive expansion part of a "defensive expansion hased on the insecurity of a nation surrounded by enemies and lacking such natural geographic defences as are provided by coastlines or mountain ranges". From the perspective of South Asia, history and

Sincerely. WALTER HAUSER, Centre of South Asian Studies, University of Cambridge, Laundress Lane, Cambridge. April 11.

different view.

generaphy would suggest a rather

Extended studies

From Professor John Honey Sir, I hesitate to cross swords with the Master of Selvyn, but as a Regius Professor of Modern History he cannot be unaware of the already wider uses of the word "student" than the one he cites (April 11). His idea of the high-minded struggler. a thirst for knowledge, does not accommodate the rich layabouts so prominent in his own university in the eighteenth century, or the hard-drinking duellists (say) of the German universities in the nineteenth. Then think of the late 1960s in Paris, or on many American campuses, or at the LSE, and you have a whole new set of communions which bring us much closer to the captors of the

United States hostages in Tehran.
Until recently British English
tended to reserve the use of
"student" to persons outside formal
schooling, with "pupil" for those still at primary or secondary school

(who had frequently been termed "scholars" before World War II). Over the past decade the American use of "student" for those still at school has made significant headway in Britain, first for sixth-formers, then for secondary school pupils generally, and now evan for primary school pupils—as witness a BBC Radio 4 item, in the programme Today last month, on the "students" at a primary school in Bolton. It is thus fair to conclude that the crowd of rioters and looters in the recent fraces at Bristol cer-tainly contained many "students". admirable for their scholarship than the fanatics of Tehran. Yours faithfully, JOHN HONEY.

School of Education, Leicester Polytechnic, Scraptoft. Leicestershire. April 11.

The Wiener Library From Mr Peter Galliner

Sir, I am not writing as Director of the International Press Institute but as an individual who for more than 30 years has been actively engaged and concerned with Anglo-German relations. The recent correspondence regarding the fate of the Wiener Library makes and reading. Here a unique research centre was started by private initiative with no official backing in the post-war years. It has developed into a renowned centre of documentation on fascism, antisemitism and perse-cution during the Hitleric period. It has made a great contribution to research undertaken by social ientists, historians, politicians and others and has proved particularly useful to the younger generation— those who ultimately will form the

policy in our countries.

The Institute, started by the late Dr Wiener, continued under its present Director, Walter Laqueur, who has become a busy academic figure at universities such as Georgetown, Washington, Jerusalem and others in addition to being a prolific writer on many subjects. I was able to get his first book published in the Federal Republic years ago. No doubt he had given much consideration to the future of the Wiener Library, but perhaps, as the correspondence in your column shows, Dr Laqueur has not appreciated the concern held by many who wish to see the centre remain in the United Kingdom; if for no other reason than that nowhere else in the world such a centre would have been created at the time when Britain stood alone to combat the forces which ultimately led to

the Holocaust.

It should be possible to find a bome in one of the learned institutions such as Chetham House, the LSE, Cambridge, Oxford or any of the newly established provincial universities. Perhaps the City University in London, which in recent

years has shown so much initiative and enterorise, would take it under its umbrella. The amount of money needed appears to be small. What is needed is a new approach. An organizing committee based on private initiative should be set up to work out plans to make the Wiener Library financially viable in the United Kingdom. The cost of the microfilms could surely be re-cuperated by marketing copies to universities throughout the world for their libraries and to international research institutions and foundations. A publishing programme in conjunction with commercial publishers in the United Kingdom and the Federal Republic should be developed to sponsor studies suitable for a wider auditories and commercial to the control of th ence and easy access to the material should be the aim for those who need to use it in their studies.

The thirtieth annual Königswinter Conference has just taken place. What better tribute to the work of Dame Lilo Milchsack and all those many have a duty and responsibility to see that the irreplaceable documentation remains in this country, than to give support to such a new approach? I for one would be prepared to make a substantial contribution and feel certain many

others would do the same. It is a moral issue. Great Britain has a tradition of the defence of minorities and has given refuge to many who like myself have become ap integral part of the society which still believes in human freedom and in human rights. Only such a society was able to make Dr Wiener's work a reality. His work has become an essential part in the education of future historians in Britain and the Federal Republic of Germany. of Germany.

Sincerely yours, PETER GALLINER. International Press Institute, London Secretariat, City University, 280 St John Street, EC1.

able as a result of old age, mental illness or handicap or physical dis-ability or other special reason". I would suggest that a young person who has lived in a children's home, being anable to live in the parental home and who, by the present law, ceases to be the responsibility of the caring authority upon reaching his eighteenth birthday, and thus

Reaction to 'Death of a Princess?

From Sir Philip de Zulueta Sir, No one disputes that freedom from outside interference with television programmes is important in ensuring freedom of speech in general. But the apparently increasing use on television of the documentary style in what are essentially fictional plays raises difficult questions. Part fact variations difficult questions. Part fact, part fiction with invented dialogue, dramatized versions of events and actors portraying living persons, such programmes are presumably attractive to audiences but can be both distressing to individuals and

both distressing to individuals and misleading to the public.

The latest example is the film Death of a Princess. Based at best on hearsay, parts of this film were deeply distressing to the Muslim world in general and to Saudi Arabia in particular. Yet any suggestion of removing even some particularly offennive scenes were recovery were reularly offensive scenes were rebuffed with references either to the freedom of the media or to the artistic integrity of the producer.
Our television companies have to be ficensed and enjoy a monopoly in their areas; they are quite unlike

in their areas; they are quite unlike newspapers, among which there is still a wide choice. Television companies have therefore a special duty of responsibility, especially in the days of the video tape and, soon, the bouncing satellite. They may, perhaps, have some justification in portraying British life as they see it, but they ought surely to be extremely sparing in using their monopoly to show controversial and ostensibly factual programmes about ostensibly factual programmes about other countries through the medium

of the semi-documentary.

This is not a question of censorship, such as might arise, for example, regarding factual news broadcasts, but of good taste and public responsibility. Decisions in this field cannot be left to produ-cers or programme directors, but must lie with the management of the networks, whose sense of pro-priety should be the test of their fimess to soloy the undoubted financial benefits of our peculiar television licensing system. Yours faithfully, PHILIP DE ZULUETA,
Antony Gibbs Holdings Ltd,
3 Frederick's Place,
Old Jewry, EC2.
April 14.

From Mr G. R. Preston Sir, In this country, of course, only one of them would have been put death. A man committing adultery with a royal princess may be guilty of treason, and the punishment for treason is death by hanging. Yours faithfully,

G. R. PRESTON, 75 Burnfoot Avenue, Fulham, SW6. April 11.

Discrimination in evil From Mr Paul Sieghart

Sir, A disturbing confusion of values is becoming prevalent, and I wonder whether it troubles others of your readers, 100.

have spent much of my life fighting -discrimination---on grounds of race, colour, creed, sex or any other irrelevant factor. yield to no one in my contempt for racists, sexists or other discrimina-tors of a like kind. But that fight is only a means to an end; the true enemies are the cruelty, savagery and berbarism which some members of the human species inflict on their

No race, people, religion or sex can claim any special virtue here. even in our own times. Hitler's and Stalin's concentration camps were manned by whites, at least some of whom professed Christianity, and the Japanese prisoner of war camps by yellow Shintoists. Men and women are decapitated for adultery, drinkers flogged and thieves have their hands cut off, by brown Mus-lius. Amin and his henchmen were black. Diplomats are held hostage in Latin America and Iran—and torture is endemic in official interrogation centres throughout the black,

brown, vellow and white world. Surely, we must condemn without discrimination anyons who perpetrates savage, barbarous or cruel acts, whatever the colour of his or her skin, and regardless of whether they are perpetrated in the name of the Reich, the dictatorship of the proletariat, the Heavenly Emperor, Islam, Christianity, or any other justifying symbol.

If we ourselves discriminate over that central issue, what is the point of opposing discrimination at all? PAUL STEGHART.

6 Gray's Inn Square, WC1,

The cost of water From Mr E. J. Gilliland

Sir, I really must take issue with your correspondent Mr C. E. Carrington (April 10). Mr Carrington claims that his

water charge is eight times what it was in 1974. That year he paid £22.74 for water and £21.17 for sewerage and sewage disposal, a total of £43.91. This year we are asking him for 258.65 for water and £44.15 for sewerage, etc. a total of £102.80.

In short, he is to pay 2.34 times what he paid then, not eight. That

is considerably less than the impact of inflation. Yours faithfully, ERIC GILLILAND. Director of Finance, Thames Water, New River Head,

Rosebery Avenue, EC1.

Going to pieces

From Mr A. J. Greenaway Sir, I was fascinated by Mr Irving Wardle's review of The Three Sisters (April 9) in which he refers to " the solo drunk scene where (the Doctor) literally cracks into fragments".

Can he explain how this dramatic effect is achieved? It sounds much more exciting than sawing a woman Yours sincerely. A. J. GREENAWAY, Lynton Mead. Totteridge, N20.

COURT CIRCULAR

KENSINGTON PALACE April 14: The Duke of Gloucester this evening visited the Goldsmiths' Silversmiths' and Jewellers' Art Council of London Exhibition at the Goldsmiths' Hell and presented the prizes for the 1980 Competition of Craftsmanship and Design.

Lieutenant-Colonel Simon Bland was in attendance.

Princess Alexandra will attend a dinner at the Banqueting House. Whitehall, and will present the Krug Awards of Excellence instituted by the House of Krug to promote excellence in all fields of human endeavours on May 15.

Prince and Princess Michael of Kent will attend a Briush Red Cross (London branch) dinner at the Intercontinental Hotel, Park Lane, on May 8.

The Hon Mrs Nicholas Cavendish gave birth to a second son (William George) on April 13 in

A memorial service for Lady Margadate will be held in Salis-bury Cachedral on April 21 at 2.30 pm.

A memorial service for Mr Caradog Prichard will be held on April 17 at St Bride's, Fleet Street, at toom,

St David's Collage, Llandudno

Term begins today. Carlos Gonzalez remains head boy. Half-term will be from May 23 to 27. Term ends on July S.

Campion School. Athens

Campion, the British coeduca-tional public school in Athens, reassembled on April 14 with 1,450 pupils from 69 countries on the list, 850 in the senior school. 400 in the preparatory school and 200 in the kindergarten.

Campion has been honoured by an invitation to full membership of the Pan-Helicnic Association of Cricket Clubs—Somerset honorary coaches please note.

With Oxbridge and the Ivy Leagues warmly beckoning, the school looks forward with confi-dence to its 1981 move from Paleo Psychico to a new, heautiful home in Amaroussi, next door to Paradisos.

Royal Caledonian Ball

The Royal Caledonian Ball will he held at Grosvenor House. Park Lane, London, W1, on Monday. May 19. Tickets at £15 each (including light refreshments to be served at midnight) are now on sale. Please apply direct to the secretary to the hall. 16 St Michael's Close, North Waltham, Basingstoke. Hampshire (Tel: Dummer (025 675) 543).

Birthdays today

Sir Adrian Cadbury. 51: Lord Grey of Naunton. 70: Sir Peter Menzies. 68: Colonel H. E. Shortt, 93: Sir Leslie Smith, 61: Mr C. O. Stanley, 81: Dame Susan

Army Cadet Force Association Scotland

Scotland

The Army Cadet Force Association Scotland held a reception last night at the City Chamber, Glasgow, on the occasion of the premiere of the film, Army Cader. The Deputy Chairman of the City of Glasgow District Council and the General Officer Commanding the Army in Scotland, Lieutenant-General Sir Michael Gow, were the principal guests. Lieutenant-General Sir Derek Lang, president of the association, presided.

Royal Navy 25 years ago appointments

From The Times summary of the strike period for Friday, April 15, 1955. The following Supplementary List officers in the Royal Navy have been selected for transfer to the General List from May 1:

Austrian treaty

Sceners. Licument-Commenders T. E. O'Brien. M. J. Fuller, and J. A. Elberbock. Licuirusmis. C. C. Pell. N. J. F. C. Pell. N. J. Pell. N. J. C. Pell. N. J. P Moscow, April 14.-Russia and Austria today agreed on an Austrian stare treaty. A joint statement is to be issued later. The Austrian ambassador, Herr Bischoff, said after this morning's finel session of the negotiations in the Kremin; "I am absolutely sure the west will have nothing against the agreement. I hope so at least because it is in the west's interests." The negotiations Austrian delegation led by Herr Raab, she Chancellor, and Mr Molocov, the Soviet Foreign Minister, with the aim of reaching an agreement which would lead to the ending of the 10-year occupation of Austria. It was understood that during the negotiastons which have lasted three days the Austrians insisted that a fourthe Austrians insisted that a fourpower meeting to discuss the state
treaty should confine itself to the
Austrian question. This condition
which was expressed in the
Austrian Government maxement
handed to Mr Molotov by Herr
Bischoff lest month, would preclude the possibility of Russia's
making the Austrian treaty dependent on any settlement of the
German problem. The following officers have been selected for transfer to a madium career commission:

Chinese dish sold for £180,000

By Geraldine Norman Sale Room Correspondent A fourteenth-century Chinese dish which Christie's sold in 1941 for 120 guiness returned to the same sale room yesterday and made £180,300.

made £180,000.

The deep dish, 17 in in diameter, is decorated in underglaze copper red with a pattern of chrysantienums and lorus sprays. The Chinese potters encountered great difficulties with this copper red and the experimental please of the fourteenth-control are extrapolar face. century are extremely rare.

The colour is not wholly suc-

cessful on this dish and Christie's had estimated £50,000 to £80,000. In the event it was bought by Yanagi. a Japanese dealer, with a private collector from Singapore as a determined underbidder. Christie's sale was devoted to

the Montague Meyer family col-lection of Chinese ceramics and works of art, which totalled \$570,125, with 5 per cent unsold. The collection included a large are conection included a large group of Jun yao, the attractive larender glazed wares of the Sung dynasty. C. C. Lai, a Rong-kong dealer, paid the top price for a large censer at £21,000 (estimate £8,000 to £12,000).

Christie's had a second dis-

was best man.

A reception was held at the home of the bride and the honeymoon is being spent in Italy.

Lieut-Colonel J. W. R. Woodroffe and the Hon Mrs A. Elphinstone The marriage took place on April 14, in the Lady Chapel, Guidford Cathedral, between Lieut-Colonel J. W. R. Woodroffe, of Arnbarrow, Laurencekirk, Kincardineshire, and the Mrs Andrew Elphinstone, of Maryland, Worplesdon, Surrey. The Very Rev A. C. Bridge, Dean of Guildford, officiated. Christie's had a second distinguished private collection for sale, the Italian maiolica collected by Wing Commander John Scott-Taggart.

He was one of the pioneers of radio and had four careers before developing his passionate interest in maiolica in the early 1950s; he was in touch with leading maiolica scholars of his day and wrote a hook on the leading maiolica scholars of his day and wrote a book on the subject. He had consigned the collection to Christie's for sale a few weeks before his death at the age of \$4 last year.

A large Urbino dish from his collection, with a painting of Abraham receiving loaves and wine from Melchizedeck, priestling of Jerusalem, became the highest priced item of maiolica ever sold at auction when it went for \$65,000 to Paim Beach and Co, dealers from Hongkong. The dish was painted by Nicola Pellipario, one of the greatest pames in maiolica painting, and dates from about 1528.

and Co. dealers from Hongkong. The dish was painted by Micols Pellipario, one of the greatest names in maiolica painting, and dates from about IEM.

The collection brought a total of £212,010, with 4 per cent unsold. It contained another great rarity in an early Florentine cak-leaf jar, decorated in manganese blue and dating from about 1435. The jar has flat loop handles and is decorated with a panting hound among foliage; the price was £46,000 (estimate £16,000-£20,000) to Thomson Works of Art, of Toronto.

By a coincidence another of these jars was offered by Sotheby's on March 11; it was

detail from a maiolico dish which sold for a record £65,000, showing Abraham receiving loaves and wine from

not quite so well proportioned or decorated and made £25,000. No other examples had been on the market for many years. The collection included a third

mate of \$500.5500. The buyer had flown from America specially for the sale; the print, which was not in top condition, is apparently more rare than the anctioneers had realized.

The first day of Someby's sale of aliases and maps made £79,700, with 10 per cent unsold. Their works of art sale made £35,055, with 22 per cent unsold; three jewelry frems which had been estimated to reach the top prices failed to find buyers. At Sotbeby's Belgravia a two-session sale of oriental twortes and works of art made £145,504, with 9 per cent unsold.

In the saleroom report for April 12 it was incorrectly stated that Chimnery's " View of Macao" was bought by Leggatt : it was sold for £25,000 to MacConnal Mason, another Loudon design.

The new small-scale opera company, Opera 30, has made a suc-cessful start, with an initial tour capacity in 18 English towns and cities. Two more tours are being arranged.

arranged.

The company played to 21,000 people on the first eight-week tour and all the places visited have requested regular froum visits. However, the next tour starting its Movember, will wist new veitues, including possibly Paignton, Poole. Milton Keynes, Darlington and Northampton. Darlington and Northampton.

The company will tour the same pair of linked productions as on their first trip: The Barber of Seville and The Marriage of Figure. Two new productions are planned for the tour in February and March nixt year; Don Clorant and Die Fiedermans are the two opers being considered.

Stewart Trotter, who was responsible for the first two productions, has been appointed the ductions, has been appointed the company's director of productions.

The production was generally

well received by the critics and played to good houses in Leicester, but it is a rarely performed work in England and there was little likelihood of an impressario prowing any interest in presenting it in London.

So the cast of three are taking the financial risks themselves, with the help of the Haymarket company, which is lending them the set sud costumes. The play will open at the Theatre at New End, Hampstead, on Monday, for a month's run. month's run.

While such cooperative reg-tures are a method of bringing established shows to London, another form of do-it-yourself established shows to London. The show, based on two Wode-another form of do-it-rourself house short stories, Pig Hoory thearrical promotion is being and The Pumpkin, first saw the

Services awards

There are two such presenta-tions on a similar subject. Last Sunday at the Lyric Studio, Ham-mersmith, Edward Duke per-formed a one-man show which he has devised from P. G. Wode-house, Jeeves Takes Charge. He is repeating the show next Sunday, but Bernard Theobald, who is managing the presentation, said yesterday that they had been approached by several people interested in putting money behind a West End production.

On a larger scale, there will be two performances of a full-scale musical, Biomings Costis, at the Mestminster Theatre on April 30

the admittedly very small profits.

Another group is following in their footsteps. The cast of a new production of Strindberg's Creditors at the Haymarket Studio, in Laicester, have also formed a conceptative to present the play in London.

Like the transition from such the mount a full west End production.

Like the transition from such a venue to the West Bud sounds the mount a full west End production.

There are two mights as a showtage for the analmost impossible for t that it might have potential for a commercial production.

So the musical, by Anne Dewe and Philip Case, is being given a pilot showing at the Westminster, asing an all professional cast who are working just for expenses. The cost of the presentation is being met by friends and supporters who enjoyed the original ameteur production.

production.

If Nucley is to become a new springboard for West End musticals it must overcome a hardie in the minds of thestrical promoters, the memory of an earlier and dissertous attempt to mount a Wodehouse musical. Bespite being written by Alan Ayckbourn and Andrew Lloyd Webber, the musical leaves was a symmetrie musical leaves.

Immunology: Defence against cancer

Recent research on two patients with an extremely rare disease affecting their immunity to infec-tion may help to resolve the highly controversial question of whether there is such a thing as immunity to cancer. The patients in question are suffering from what is known as the Chediak-Higashi syndrome. There are several other known im-munodeficiency diseases, leading to different degrees and patterns of susceptibility to infection. A ream of scientists in Canada and America has investigated in detail the pattern of deficiency in the Chediak-Higashi syndrome and have found a defect in what is now

believed to be the natural defence system against cancer. What they were looking at was the behaviour of a particular kind of white blood cell, known as a natural killer cell. Natural killer cells, which were discovered only relatively recently, seem to specialize in attacking cancer cells. Im-munologists had speculated that the whire blood cells of the im-mune system might be able to recognize and destroy cancer cells in the same way that, for example, they recognize and destroy bacteria. But natural killer cells are different in a number of ways from the cells that protect against infec-

The tests on the patients were run by Dr John C. Roder, of Queen's University, Outario, with collaborators at the United States National Institutes of Health in Maryland. They took samples of blood from two brothers with

Chediak Higashi syndrome and compared the behaviour of their white blood cells with those in normal samples of blood taken from members of the research

They used a series of laboratory tests designed to demonstrate defi-ciencies in the response of the white blood cells to infection, as well as a specific test of the response to tumour cells. On most of the tests for response to infec-tion, the Chedlak-Higashi cells showed normal behaviour. But they were grossly deficient in their response to tumour cells.

Dr Roder and his colleagues con-cluded from the results of their tests that Chediak-Rigashi nations have a defect that specifically affects their natural killer cells. If, as many immunologists believe, natural killer cells play an important part in preventing the development of tumours, it follows that those patients should be particulariy prone to cancer.

Many of them, of course, die in childhood from infections. But records of 53 who survived to adulthood showed that more than adulthood showed that more than three-quarters of them developed a cancer-like disease. It may well be significant that the disease in those cases was a homour of white blood cells. On the face of it, that might suggest that the tumours reflect a further specific abnormality in the write blood cells rather than a sense of filters in the natural general failure in the natural defence against tumours. Or Roder and his collaborators are therefore anxious to extend their investigations and, for exam-

to cancer was first developed by the distinguished immunologist Skr McFarlane Burnett, who proposed that the bissues of the body were under what he called "immune surveillance". His theory was that the white blood cells of the imthe white blood cells of the immune system monitored issue cells for signs of change, and destroyed any ourtain cells they recognized. For a mutant cell to multiply successfully and develop into a tumour, it must find a way of evading that immune surveillance. The theory of immune surveillance was largely abandoned when immunosuppressant drugs came into use for treating transplant patients. Many transplant patients.

patients. Many transplant patients live for years on low doses of immunosuppressants, and while that makes them more susceptible to infectious, it does not seem to make them more prone to develop Drugs aimed at suppressing

transplant rejection, however, do not necessarily suppress natural killer cells, and they remain a possible candidate for a spontaneous defence against cancer. In establishing whether that is what what suppressible transplants will be a suppression of the control of the contr they really are, immunologists will be greatly helped by the recent discovery of a mutant mouse strain which, like human Chediak Higashi parients. has a deficiency of its natural killer cells. £200m turbines

contract in

The General Electric Company has won the world's lar-gest single contract for power

station turbine generators. The deal, said to be worth con-siderably more than \$200m, is for the supply of six generators to South Africa,

The contract, won despite competition from French and

West German manufacturers, gives a significant boost to GEC Turbine Generators, a member of the GEC Power Engineering

Group, and lifts its current order book to £850m.

and backed by the Export Credit

From Frank Vogi

Washington, April 14

No American dealing com-

found itself in financial diffi-

culties as a result of the recent turnoit in the silver markets, according to Mr Harold Wil-

liams, chairman of the United States Securities and Exchange

The statement came at a

committee of the House of Representatives investigating

the recent events, their causes

and consequences.

The markets were hurled into chaos in late March when

news spread that Mr Nelson Bunker Hunt and Mr William

Herbert Hunt were unable to meet \$100m (£45.87m) in silver

For a time it looked as if

Bache and Company, one of the top five United States

brokerage companies, could

face acute problems, but today

Mr Williams said specifically that Bache, Englehard Minerals

and other firms, appeared to

have come through their silver

dealings with the Hunt family heaval.

future margin calls.

hearing before a sub-committee be pressed to outline the steps of the governmental operations they intend to take to ensure

leaves no casualties

South Africa

won by GEC

Generators, said yesterday that without the contract—the largest ever placed with GEC—some of the turbine company's 8,500 workers would lose their jobs. Work on the South African Jephersters would everyley about

generators would employ about 1,000 workers for the next six

years at the company's Rugby, Manchester and Stafford

factories.

The units supplied to South Africa will be similar to the six already ordered for the country's

Duvha power station and to those being provided for Peter-

head power station for the North of Scotland Hydro Elec-tric Board, the Littlebrook power station for the Central

Electricity Generating Board, and the Torness station.

With the new order, GEC will have won 80 per cent of South

African contracts for turbine generators since 1975. The com-

pany said this was "a consider-able achievement when it is

recognized that there are 10 world competitors all competing for this business."

Depressed British demand for

generators in recent years has forced GEC to look abroad for the bulk of its business. In the

last five years it has won export entracts for 12,000MW

worth almost £1,000m, represent-

ing 95 per cent of United Kingdom exports of turbine

generators.

Less than £100m of the com-

pany's current order book is for business in Britain, most of it covering the supply of spares, repairs and rehabilitation work.

The last United Kingdom order

would get such a snerp increase
this financial year would have
a damaging effect.
One MP pointed out that
private employers were facing
new demands for higher wages
from their workers because of from their workers because of the big pay rises going to the public sector. Other MPs argued this was snother example of public sector workers doing much better during a recession than others in the rest of the economy. Sir Geoffrey stressed that

most of the large increases had been made to eliminate distortions caused by previous incomes policies. He said increases in public sector pay ought not to delude people into thisking that wage restraint thinking that wage restraint

was not essential. He also tried to show that the private sector was not per-forming conspicuously better

Government wage bill up by 25pc

current pay round.

After being quizzed on civil service pay, Sir Geoffrey attempted to reassure committee members that government plans based on a dramatic improvement. provement in nationalized in-

dustry finances were realistic.
He said that of the proposed turaround over the next four years, 25 per cent would come from raising prices for electricity and gas, 40 per cent would come from cutting out losses in industries such as steel, coal, shipbuilding and the railways and the ramainder railways, and the remainder would come from miscellaneous

improvement.
Sir Geoffrey's projections
were met with disbelief by
many members of the committee, including Mr Edward du Cann, the chairman. There is likely to be further questioning of the Government on its nationalized industry plans. Scepticism was also expressed by committee mem-

than the Government during the mates of likely Government current pay round.

After being quizzed on civil Most outside assessments sugsest that these are much too low.

Treasury officials seem to concede that their figures may be based on lower estimates of be based on lower estimates of likely future production than those made by most commentators. On this, and on the likely impact of Government plans on the corporate sector, the committee got little new detail, either from Treasury officials or from the Chancellor. Chancellor.

Treasury officials had earlier refused to give their own internal forecasts of unemployment, but did concede that the 1.8 million figure, assumed in the recent White Paper on public spending, was probably too low. They also confirmed their earlier estimates that manufacturing output might manufacturing output might also ex drop by 41 per cent this year tree mem- and another 1 per cent a year bers about the Treasury esti- in the years to come.

Grand Metropolitan declares Liggett bid plan-

To the dismay of many City institutions Grand Metropolitan, the £640m conglomerate whose interests include Watney Mann and Truman beers, Express Dairies, Berni Inns and Peter Dominic, has now declared that it plans to make an all-out bid for the 90.5 per cent of the stock in Liggett Group Inc that it does not already

Grand Metropolitan bought 9.5 per cent of Liggett's com-mon stock through the market between June. 1969, and March this year at a total cost, of about \$30.5m. The proposed tender offer of \$50 cash for every Liggett common share would involve Grand Metro-

the biggest takeover by Grand Metropolitan since the \$400m

stead, managing director and successor-elect to Mr Maxwell Joseph as chairman, said:

"Liggett is the United States distributor of our J & B Rare Scotch whisky, the biggest selling Scotch whisky in the United States. We want to protect our distributorship. distributorship.

"We estimate that even though we will have to borrow money dearly, we will still in-crease earnings a share at the indicated bid price. The bid

politan in an outlay of \$415m as a proportion of shareholders' future started at least a year or about 1191m.

This would make the offer but we do not envisage this were understood to be up for "We will keep an open mind

battle for the Watney brewing about what interests of Lig-combine in 1972 gett's we keep and what we will Last night Mr Stanley Grin-eventually sell." The tender offer will start on April 21 if Grand Metropolitan

can surmount various American legal hurdles. Its purchase of Liggett shares was blocked at 9.5 per cent by a court order in North Carolina on the ground that it had not met United States disclosure requirements. However yesterday it seemed that the way was clear for an offer when disclosure documents were taken to the North Carolina court.

the day. After touching \$2.2200, the pound slipped during the afternoon to close with a ner gain of just 40 points against the United States dollar at \$2.200. \$2,2030. Its trade weighted index also fell back during the afternoon, closing 0.1 higher at 72.7 after touching a high for

the day of 72.9. Conversely, the dollar re-covered part of some early losses agricer many important currencies. But it still finished slightly lower on the day in most centres, in spite of further central bank support.

Yesterday's selling mainly reflected increased nervousness over the Middle East. Some investors may feel less compelled to hold dollars on the view that United States incerest rates may now have peaked but many analysts feel that the prospect of falling interest rates in the United States during the summer may well bring substantially increased overseas investment in the American hand and equity markets. bond and equity markets.

seas buying of sterling for investment in gilts.

But like gilts sterling failed bave peaked should bring to hold on to its best levels of the day. After touching \$2.2200, the pound slipped during the afternoon to close with a ner sible for the Government to minimum lending rate from its record level of 17 per cent. The Government would obvi-

ously like to bring some relief to industrial borrowers as quickly as possible but it clearly sees the achievement of its monetary policy as of over-riding importance. It will be most reluctant to risk reducing MLR until it is absolutely convinced that there is no possi-bility that it might have to raise it again soon afterwards. Some City economists are looking for a small cut in interest rate by June as loan demand continues to decelerate and the recent tightness in money markets unwinds. Others doubt that the Government will dare to lower rates until it has seen how the banking system oper-ates for two or three months after the abolition of the bank-ing "corset" in mid-June.

While Rome crumbles Italians salvage Egyptian temples on the Nile

Latin engineers build a name for themselves

Rome is crumbling. Venice is sinking and the tower of Pisa is leaving more precariously each year so it is ironic that the most remarkable of all archaeological salvage tasks in Egypt should have been completed by Italy's leading civil engineering company.

Condotte Mazzi Estero is now negotiating the final payment for its removal of the ancient Egyptian temples from the sub-merged island of Philae in between the old and new Aswan dams and their reconstruction 600 yards away on a newly

levelled island on the Nile. The contract, worth about £4m at today's prices, has only been marginally profitable for Condotte, but in job satisfaction for its engineers and in international prestige the company says that its value has been

immeasurable. This success is causing certain voluble sectors of the Italian community to ask: "If Condotte can save these ancient Egyptian temples why can't it do something about Italy's own historic remains?"

Condotte agrees that the Philae contract has added archaeological skills to its existing technical expertise which would enable it to carry out such work in Italy, but it is anxious to avoid becoming involved in a political argument about Italian government and local authority attitudes towards the restoration of historical sites.

Signor Maurizio Foschi, Condotte's technical director of overseas operations, said:
"It is not for us as a company to come forward with proposals. We could cer-tainly carry out the work, but it is for the government, state and local, to decide

what is to be done." Condotte, which normally builds dams, railways, docks and harbours, power stations and office and housing complexes, won the contract for the rebuildthe Philae temples from Unesco and the Egyptian Government in the face

of international competition. Signor Foschi said "Despite the uniqueness of the contract we experienced no major problems. There were no accidents the site and the careful way the Egyptian labourers work meant that only two out of 40,000 blocks of stone that had to be removed, stored and then rebuilt in the original sequence were slightly

After the original island of Philae had been surrounded by a coffer-dam and pumped dry the Italian company first had to discover the techniques used by the Egyptians when the temples were first built by Pharaoh Nectanebo 1 in 380 BC. Professor Giovanni Ioppolo from the National School of Archaeology in Rome

joined Condotte. He devised a method of numbering the blocks of stone that could easily be understood by the Nubian workmen as well as Condotte's engineers. During the dismantling and storing of the blocks the new site on the Island of

Agilkia was prepared by blasting away thousands of tons of granite. Fluctuation of the water level caused by 1960s threatened Philae with erosion; it was Russian-built plant left over from the construction that enabled the work to be done with less effort, if not less care, than when the huge blocks of granite were

originally carved. As the final granite block was lowered into place on top of one of the four imposing pylon towers in the Temple of Isis the final margin of error was found to be less than one milkmetre. The temples have added to their remarkable history by becoming a monument to the skills of

the civil engineer. But Condotte, now in its centenary year and operating under the Italian state holding company umbrella, finds it has a far more lucrative contract under threat in

A \$50m contract for a new port complex at Bandar Abbas has suffered interruptions and delays which threatens profitability. Work has resumed, but if lobbying the Italian Government not to join the United States in economic sanctions against Iran fail, Condotte could eventually face a huge loss on the contract.

Signor Foschi and his colleagues at Condotte admit that the Philae contract and the Bandar Abbas project have noth ing in common in engineering or financial complexity. They also admit that the "Philae effect" being talked about in Italy (a reference to the prestige element of the Egyptian contract) will be of little benefit in Iran.

David Young

Flag of convenience likely to remain

By Michael Baily

Shipping Correspondent
The coup in Liberia is being watched closely by the world shipping community, which has turned this small West African state with virtually no shipping of its own into the world's larges; merchan; marine since

A decision by the new regime to close its open registry or flag of convenience facilities would cause a major upheaval as shipping lines of all nationalities-particulary Americanscrambled to put their vessels under some other rax-free flag. There were no immediate signs of this happening yesterday,

however. According to Liberia's New York office, it was business as usual in Monrovia following an interview by Mr Gerald Cooper, the United States Commis-sioner for Maritime Affairs, with the finance minister of the new government.

In Loudon, out of which many Liberian-registered ships operate, precipitate action by the new regime was regarded as unlikely. Since 1948 the Liberian fleet has grown from two ships of 800 tons to 2,470 ships totalling 82 million tons, representing a fifth of the world fleet of 413 million tons

or 14 per cent of Liberia's gnp. The question is whether the new regime will be prepared to sacrifice this benefit for the sake of keeping in with African neighbours which are opposed to flags of convenience. But a to flags of convenience. But a move by Uncted (United Nations Committee on Trade

and Development) to have these flags banished was post-poned earlier this year without reaching a conclusion.

If Liberia was to shut down on maritime activities there would be no question of confiscation, because shipowners fly-ing the Liberian flag do not have any assets there. The registration process normally takes place in New York.

Liberia is not only the largest but the most advanced of the flags of convenience, with five regional offices (New York, London, Rotterdam, Piraeus, and Hongkong) and 180 parttime inspectors in ports around the world. Panama would be the next choice of many owners Liberia closed down, with Bermuda, Hongkong and many other tax havens from which to

Liberia's biggest individual owner is Sir Y. K. Pao's Worldwide Shipping Group, with over 15 million deadweight tons registered in Monrovia. "Today world fleet of 413 million tons gross.

Revenue from this activity amounts to about \$12m a year registered in monovia. Loday it is not an issue," a London spokesman said. "If the need arose, we would study the various possible alternatives."

Ex-chairman | CBI team to Mr Robert McNamara, the World Bank president, held talks in Peking with Mr Gu Mu, the Chinese Vice Premise.

Mr Derek Barnes, former chairman and principal share-holder of Northern Develop-ment (Holdings), the housebuilding group now in the hands of a receiver, may face bankruptcy proceedings because he cannot pay a £1,780,000 judgment debt, The High Court was told yesterday.

The judgment was obtained in the High Court last month by Williams & Glyn's Bank, which claimed repayment of personal loans made to Mr. Barnes in 1972 and 1974.

Mr Barnes, 43, of Read, near Burnley, Lancashire, was yes-terday granted an extension until June 1 to lodge an appeal Mr Stanley Brodie, QC, for Mr Barnes, told Mr Justice Gibson that Mr Barnes could not afford to pay the debt. But if his appeal succeeded he would have sufficient assets to make an arrangement with his credi-

Mr Michael Crystal, for Williams & Glyn's, said the bank was anxious to preserve its rights under the Bankruptcy Act. Subject to this, if Mr Barnes lodged a notice of appeal by June 1, it would not resist an application by him to adjourn any pending bank-ruptcy proceedings until after the appeal had been heard. Mr Barnes continued an

undertaking not to dispose of personal assets and the bank agreed not to execute judgment

By Clifford Webb Midiand Industrial

Correspondent The Confederation of British Industry has set up a "rask force" of financial experts from big companies to investigate the budget of the West Midlands County Council after increasing criticism of the authority's

spending. Mr Stephen Rankin, the CBI's West Midlands regional direc-tor, said yesterday: "Councils have to realize that industry nationally pays £4,000m in races and it runs into hundreds of millions in the West Midlands

county. "Recent giant steps in rates have made life even more difficult for already hard-pressed companies and it is time to get to grips with each other's problems ".

He said that the team led by Mr David Richards, finance director of Delta Rod, wanted to be constructive in its approach, so it was also offering to put its expertise at the dis-posal of the county council. "We are hoping that both industry and the ratepayer will get something out of this." Local authorities had to

understand that industry's rate fund was not a bottomless pit.

Last night a CBI spokesman
said: "We understand that
the county council will be making facilities available to us to inspect the appropriate

Integrated System X promises a smoother telephone future

Two of the new facilities which the Post Office's forthcoming System X digital tele-phone network will provide were demonstrated in Lodon yesterday—abbreviated dialling and diversion of calls from one number to another. But the main significance of the new system, Post Office executives ndicated, lay in its integrated

nature. which the communications needs of society are changing, the new network of the 1980s and 1990s will be a single system able to carry voice or data or

facsimile, as required.

System X refers to the family of computer-controlled telephone exchanges, ranging in size from the very small to the very large; the overall network is now called the integrated services digital network (ISDN). Mr John Martin, director of System X development at the Post Office, said that the system offered three main

First, the digital System X exchanges, when coupled to digital transmission, would give better-quality speech reproduction and a "more noise-free" connexion. Secondly, with no moving parts in the switch-ing, there would be greater

ing, there reliability. Thirdly, since the system sed stored programme control intelligence" was (computer "intelligence" was available which again could be used to

The extra facilities for the user are the type of service that has begun to become familiar to business users of the new digital private automatic branch exchanges (PABNs). Abbreviated dialling enables a subscriber to call certain numbers by simply dialling one or two digits. Repeated calling of a number which might be engaged at the first attempt can also be done automatically by a short code. Numbers can be stored for later use. Prearranged reminder calls can be handled automatically. Call barring enables certain categories of calls to be unable to be dialled (exceptions

could be local calls and 999 calls. for example). Call diversion enables a sub-scriber to be "followed" telephonically to another number, after details have been keyed in by the subscriber concerned.
Call waiting enables a subscriber to be offered a second call while already engaged on an earlier call. Three-party servi-

ces enables three-way conversa-tions to be held.

The Post Office recognizes that some of these techniques will be strange to users accustomed to the fairly basic service which has been offered so far. Thus guidance through the new techniques is provided-and this guidance will be provided, step-by-step as the call-making progresses, by recorded voice instructions.

Cure for drill vibrations

Recent investigations by the British Hydromechanics Re-search Association (BHRA), at Cranfield, into the cause of

Cranfield, into the cause of drill-pipe vibrations on the British Gas drilling rig Offshore Mercury have led to the addition of helical strakes to eliminate vortex shedding as one element of the overall solution. The vibrations were experienced last year when the rig was operating 21 miles off the south coast of England in 61 metres of water. In tidal currents running at about three knots, the whole drilling mechanism was vibrating in synchroanism was vibrating in synchro-nization with the drill-pipe oscillation.

British Gas is the only con-tractor to drill in the English

Channel for hydrocarbons, Low-frequency ribrations Low-frequency ribrations occur in deeper water of 1,000 ft and can have the same effect as higher-frequency generated vibrations on shorter

drilling below 150 ft.
British Gas, together with
researches from other organizations such as Glasgow University and BHRA, produced the eventual solution (including a change in geometry of the 30-inch diameter drill), which was successfully tested on the drilling rig Dyribeta

Checking microwave monitors

The National Physical Laboratory at Teddington, Middle sex, is extending its industria services to include the calibra-tion and testing of microwave power meters. This will enable manufacturers and users of microwave equipment to have their exposure monitors checked against reliable and international standards, a facility which hos not previously een available in the United Kingdom.

The new microwave labora

tory at NPL is to be used officially tomorrow during a demonstration for users and makers of microwave equipment. It has two anechoic chambers, one of which is fully screened, inside which the instruments to be checked are subjected to precisely known microwave fields.

By checking the accuracy of the commercially available monitors, it will be possible to ensure that any leakage and stray fields from microwave ovens and other equipment lie within the various national and international health and safety

EEC contributions and French opinion

Sir, While I seldom agree with political pronouncements emanating from France, I do have a grodging agreement with President Giscard d'Estaing's

opinion of Britain's contention over EEC budget contributions. When Royal Assent was given to the European Com-1972, the United Kingdom ioined an economic and customs federation which, after transitional stages, is funded by a contribution of 1 per cent of the total VAT collection by member countries; and by the collection of excise duties on

agricultural products, which form part of CAP regimes, imported from third countries (ie, non EEC member countries). It is this latter contribution which has raised so much political steam in Britain over the past three years. Therefore it is worth considering what the United Kingdom can do about the situation, without changing

any of the EEC rules. Firstly, the United Kingdom could reverse its policy on in-direct taxation and reduce the VAT rate and hence its contri-bution to the EEC (a policy that I would not favour). Secondly, the United King-dom could import more of its needs for agricultural produce from the EEC, thus reducing the amount of excise duty pay-the amount of excise duty pay-able to the EEC, which would also have the effect of reducing the cost of support of some commodities that are in struc-tural surplus in the EEC. The main reasons for not so doing are historic trade hinks with Commonwealth countries (import of butter from New Zea-land and come sugar from the West Indies) and a British propensity for bread made with a high proportion of North
high proportion of North
American hard wheat. Thus a
large proportion of British
excise duty contributions to the
EEC can be regarded either as
a direct subsidy to Common-

From Mrs E. J. Forbes, wealth countries or as a payment to keep similar EEC pro-duced commodicies off the

European market. Lastly, let us review how of steel supplie government expenditure in sup-port of British agriculture has been affacted by EEC policies ments and as a since 1974. The following table recent strike is has been extracted from the March 27, 1980, issue of the Financial Times (figures quoted

some concern at Grand Met that the trading links with Liggert, which handles its important J & B whisky in the United States, could be severed.

Meanwhile, last year's £78m rights issue, which cut group gearing by a third to 42 per cent and which is still largely unused provides Grand Met with the balance sheet muscle to countenance a bid of this size, and despite the high cost of borrowing at the moment Grand Met maintains that there will be no earnings dilution either.

Bowring/M & M All friends

now

It is not surprising perhaps that Marsh & McLennan has not had to raise its sights by much to turn the open hostility of the Bowring board into positively beaming acceptance. After all Bowring's hopes of fending off the bid were all but dashed when the OFT decided against a Monopolies Commission reference.

The new offer is only 5p or 6p above the value of the original offer before dollar weakness and Wall Street performance began to erode the sterling equivalent, although Bowring shareholders will also be entitled to the final dividend of 61p gross.

Even so the 175p value of the offer, more than 12 times last year's earning, looks good price to accept at a time when the outlook for insurance brokers is far from bright. The cash element this time is nominated in sterling and so not exposed to the vagaries of exchange movements. But the M&M share price has been jumping all over the place in recent weeks and the market is probably not being over-cautious in marking Bowring 18p below the current value at 157p.

On a wider view Marsh's success will have dramatic repercussions on the London insurance market if not the banking scene, given that Marsh is likely to be forced by the Accepting Houses Committee to divest itself of Singer & Friedlander.

Marsh/Bowring will cut such a massive swathe in world markets that defensive transatiantic alliances involving other groups are certain to follow although few other American groups have the financial muscle to copy M&M's takeover style.

Meanwhile, with this bid the Americans

have a foot firmly in the door at Lloyd's, which in current world insurance conditions can seemingly do little to halt United States ascendancy.

Fierce domestic competition is already causing the flow of United States premiums into London to splutter and Lloyd's traditionally taking half its business from America is not in a good position to upset

leading purveyors like M&M.

American domination of Lloyd's is no longer just a long-term threat.

STC Up to expectations

Standard Telephones and Cables has proved a fine investment for those who obtained a slice of the action last June, when the group came to the market through the heavily over-subscribed offer for sale at 1600.

Yesterday's results showing a 24 per cent rise in pre-tax profits to £33.4m were broadly in line with expectations and the shares closed 7p higher at 271p. But yielding 4.2 per cent and selling on a fully-taxed multiple of almost 17, they look rather expensive on fundamental grounds.

STC beat its inevitably conservative forecast of £32m pre-tax by a comfortable margin, though with the help of a rather unxpected £1.7m credit relating to the upward revision of prices on past contracts, although the engineering dispute, which cut £4m off profits, was probably more than it had bargained for.

Most of the increase over 1978 profits came from the component manufacturing distribution division, which has benefited from rationalization, and which chipped in a further £4.2m at £9.4m before tax. The telecommunications and electronics division made only £2.3m more but the group is now busier in submarine cables.

With Post Office orders for the TXE4 telephone exchange, where STC has about two fifths market share, building up to a peak, and with the components side continuing to so well, the group should manage compound profits growth averaging

20 per cent over the next few years.

But the premium share rating is, in part at least, due to the tight market with much of the 15 per cent minority firmly held. So

Hugh Stephenson

A deceptively dangerous model for public sector disputes

period away, the main question mark over the medium term seems to concern the Governent's attitude towards pay. For the moment at least, last month's Budget has settled the outlines of fiscal and monetary policy. If the traditional pattern is anything to go by, this aspect of policy will not need looking at again until July or perhaps the autumn.

Meanwhile, those of any sort of ner-yous disposition will be forgiven for their continuing anxiety on the industrial front. It affects both the public and the private sector. It is in the public sector that the greatest difficul-ties seem to lie in producing a stable

The notion that employers should only agree to settle for sums that their organizations/companies can afford is beguilingly attractive. It promises to remove government from a whole scene where government has in the past been conspicuously unsuccessful. But the fact is that for the majority of public sector employers, with call upon government taxing, rating and borrowing powers, this is a concept with little practical relevance around collective hargaining table.

any one round of public sector wage claims. This winter that going rate has been about the 20 per cent plus mark, instead of the 10 per cent plus range of last winter. This is despite the fact that the real rate of growth of the economy in the last half-year nas been slower than the same period a year ago. What is more, the Government has shown a marked rejuctance to encourage public sector employers to take the sort of ultra-tough line that would tit their generally declared principles in

Indeed, the only nationalized industry which tried to get away with the proposition that it had no "new money to put on the table because it was broke—namely the British Steel Corporation—was laughed out of court by the public, the unions and the Government together.

The disastrous tone for this last round of highly inflationary public sector wage settlements was set when the Prime Minister felt constrained to half a 20 per cent plus settlement for the coal miners (admittedly in rejec-tion of a strike call to get three times as much; as a victory for moderation and common sense. The continuing assaults on the idea that a regime of free collective bargaining is producing

sensible results have continued to flow from the Clegg commission on pay comparability and from the Whitehall pay research unit.

Indeed with these researched pay findings one is reminded of nothing more than the obvious statistical nonsense that every diplomat and every foreign travelling business man seems to require a cost of living allowance in order to maintain his or her standard of living, no matter what country he or she starts from.

A government which really meant what it said about moving human resources from the unproductive public sector to the wealth creating sectors of the economy ought to have been are-pared to question seriously the whole basis on which these things are done. So long as the public sector continues

to get pay settlements that run ahead of the national average the relative price of public sector spending pro-grammes will continue to surprise those who prepare public spending White Papers. And the politicians concerned will continue to be confronted with the choice of allowing spending totals to rise or cutting the volume of the services provided. To an equal extent, the way in which

some sections of the Government are deriving satisfaction from the outcome

premature. The view is being expressed that it was, perhaps, an expensive but a necessary lesson to all concerned that the Government intends to stick by its policy of non-intervention in these issues.

But the steel strike would be a de-deceptively dangerous model for any of the public sector disputes with which the Government might be faced over the next year. It was led without great competence by Mr Bill Sirs of the Iron and Steel Trades Confederation in an industry where there is a world glut of the basic product. At the same time the union had no effective plans for preventing the effective deployment of massive pre-strike stocks, or of substan-tial imports while the strike was in progress.

Even so the Government from the Prime Minister downwards went through agonies and would have inter-vened, if they could have thought of any effective way of doing so. It is unlikely that in any future public sector strike the batting would be on such an easy wicket.

As a wise Frenchman once wrote, it is necessary to want the consequences of what one wants. It is by no means certain that the Government has yet thought through this aspect of its

Is the Government blundering around in the dark?

It is a principal objective of an absolutely essential part of employers and workers engaged the Government's economic the process by which it achieves in wage bargaining and wage-policy to slow down inflation—
its invended affect. It was inarguably the principal objective. Certainly other objectives such as keeping unemployment down seems to be totally sub-ordinated to it.

The means to this objective is to control and gradually reduce the rate of growth of the supply of money, using a definite quantitative target which is to be hit at all costs. There is also a target for the public sector borrowing requirement, calculated to be consistent with the money supply target as well or with a policy of tax reduction. In the background is a policy of securing, or at least accepting, a high exchange rate justified by its contribution to the anti-inflation objective. inflation objective. Let us focus on one key

element in this policy mix. The control of the growth of money supply and its bearing on inflation. How exactly would a reduction in the rate of growth of the money supply reduce the rate of price inflation?

Much stress is laid on inflationary expectations as a factor tending to keep inflation going because it condi-tions the behaviour of workers tions the behaviour of workers and of managers, especially in relation to wage bargaining. In my view too much is made of this; but on any view it seems plain that price expectations are not plucked out of the air, but are based mainly on recent experience. Thus if inflationary expecta-

tions are to be got down, actual inflation has to be got down first. (If anyone thought that the mere announcement by the Government of a firm monetary target would of itself reduce inflationary expectations substantially, he must surely have changed his opinion in the last six months. Is it not obvious that the increase in the value added tax rate did more to raise infla-tionary expectations than the monunced target did to reduce them?) How, then, does the control

of the growth of money supply reduce actual inflation before reduce action initiation before expectations themselves have been reduced? It must be by reducing demand for goods and services—how else? And how, then, does it reduce demand? Mainly, of course, by raising interest rates.

It is sometimes argued that there are other and more direct rouses by which changing the growth of money supply will affect demand but none of them seem likely to be very power-ful especially when realistic account is taken of the way in which the quantity of money is in fact controlled, that is, by interest rates and operations in the debt markets.

Thus the rise in interest rates is not an accidental and incon-

its intended effect. It was indeed predictable from the outset of the Government's term that there would be a sharp rise in interest rates as soon as the money supply target came into conflict with the inflation-driven demand for money: and the extreme reluctance and apparent surprise with which ministers undertook the operation suggests that they do not clearly realize the nature of their own policies.

So far, then, the policy in-volves reducing the level of demand (compared with what it would have been), mainly through higher interest rates. The next step is from reducing demand to reducing inflation. This step may seem simple

enough to anyone who has absorbed the idea that prices are set by a balance between supply

In fact, in a modern industrial

society it is not that simple.

Most prices are not set by a

supply and demand in a marker (though some are). They are

set as an "administrative" act by the manufacturers and dis-tributors, on the basis mainly set as an "administrative

of experienced costs of produc-

To get these prices down (or rather, to check their rate of rise), you have to get costs down: it is not enough to get

demand down. The immediate

effect of reducing demand in most sectors is not to reduce

prices but to reduce output, that is, to cause stagnation and

We are thus brought to con-

sider wages and salaries and the role they play in the movement

of costs. The essential step that must be taken if the Govern-

ment's policy is to work is that

add to unemployment.

Since the level of unemployment, which we have had in the past few years, is plainly not enough to bring about a marked deceleration of wage increases, we must infer that more unemployment is required to make the necessary impact in the labour market.

So, just as a rise in interest rates is inherent in Government policy, so is a rise—a substantial rise—in unemployment. Without such a rise, there is no reason to think that the labour market will generate substantially lower increases in wages and salaries than we have had in this winter's wage-round. Without such a reduction there is no reason to expect any large fall in the rate of inflation, even if the Government is successful in bringing about a lower level of

To summarize, then, the

mean that the crete terms, how high interest policy should be given up en-tirely? If so, will we be laft without any defences against accelerating inflation? My he-lief certainly is that the policy needs to be drastically changed, and I am certain that it will be.

I believe that the fixed target for the growth of the money supply should be given up, as too the fixed target for the public sector borrowing requirement. These are simply unsuitable entities to be fixed quantitatively in advance as central and unalterable objectives of policy. No one can know in advance what will have to be done in order to achieve such objectives over a period of time, nor what the sconomic effects will be if they are achieved. This does not mean that

there is to be no defence against accelerating inflation. But it has to be recognized that the chances of effecting a

reduction in the rate of infla-

tion depend to a great extent on the states of mind—the views and objectives—of those engaged in bargaining about

Policy on fiscal and monetary

instruments must take account of the atmosphere and pros-

pects in that sector, and the refusal to do this properly is one of the great errors of present policy. Nor is it beyond hope that the Government should exercise some helpful

influence on that atmosphere

so as to decelerate the scale of wage and salary increases. A refuest even to try to do so is

refusal even to try to do so is an abnegation of responsibility.

being over-ambitious. It may well be that in present circum-stances a fairly high rate of inflation has to be accepted. What is reasonable as an objec-

tive in regard to inflation must

take account both of the strength of the forces making for inflation in the labour

market and of the situation that

will be produced elsewhere in

Next, there is no sense in

wages and salaries.

The Select Committee on the Treasury and the

cellor of the Exchequer on the Government's

approach to economic management. In this

article Sir Bryan Hopkin (left), who was Head

of the Government Economic Service and

Chief Economic Adviser to the Treasury from

1974-1977, says that the present policies are

ill-conceived and argues for measures aimed at

holding down unemployment.

Government has embarked on a

policy of making unemployment high enough, for long enough,

of wage and salary increases and in this way eventually get the rate of inflation down and

so change inflationary expecta-

The first thing that needs to be said is that if this is indeed the policy it would be better if it could be stated frankly to the

public. The second is to recognize that nobody knows how

much unemployment will be

required to achieve any defined deceleration of inflation, nor how long it will go on.

The knowledge to enable one

to work out a balance of the costs and benefits of the policy

simply does not exist. The Government is blundering about in the dark, for all its stance of firm and informed

purpose. It is a matter of judg-ment what the costs in high

interest rates and unemploy-ment of a given benefit will be.

break down the present scale

rates would have to go and how much unemployment would have to increase.

You do not get a deceleration of inflation for nothing: any policy that will produce it will have costs. The policy chosen should make sense as a whole taking all its effects together. Then what is right to do vis-àvis inflation must take account of what is stready happening in the economy generally. In my view it is a more important priority in present circumstances to minimize the coming increase in unemployment than to make a sharp reduction in: the rate of inflation.

Finally there is the question of the exchange rate, that is standing at a level which is despetitiveness.

Perhaps I can outline the approach which seems to me to make the best sense inthe light of the arguments above. The general idea would be to frame a set of objectives for the next 12-18 months which seemed the lesst unattractive available combination employment, price inflation and international competitiveness, taking into account the prospective state of the world economy and the potential developments in the wage and salary system.

Fiscal policy and monetary policy should be set so as to promote these objectives. A number of policies or policy attitudes need to be worked out together in mutual consistency; of course in practice some of bility than others and can be more easily redirected as time goes on and circumstances

The budget would be aimed at a certain combination of real and monetary flows, believed mutually consistent, and from this budget would emerge a forecast of the public sector borrowing requirement. But this would simply be a forecast, and the public sector borrowing requirement. not a policy target to be monitored and treated as an over-riding objective. Similarly there would be a forecast of the increase in the money supply which would have the same

In the present circumstances would not promise under this policy any marked reduction in the near future either of the rate of inflation or of the level of unemployment. Indeed, given the world situation it seems hardly possible to avoid.

But at least we would have got back to thinking of production and activity as objectives of policy, not merely as quanti-ties which emerge from the working out of a policy whose sights have been set on the growth of the money supply and which would be mercilessly the economy by any particular redirected as necessary anti-inflation policy—in con-schieve the pre-set result.

the increase in wages and salar-les must be brought down com-pared with what they would otherwise have been. If this happens it will come from the My judgment is that if the policy continues to be operated venient side-effect of the Gov-ernment's monetary policy: it is discouraging effect of unem-gloyment and trade recession on be heavy and prolonged. on a one year view the shares may do no better than run with the market Business Diary: Government health warning • Zurich ponders

• Changes are afout at the directorate of the Swiss mational directorate of the Swiss national bank, the three-man body that makes all the key decisions governing the well-being of the Swiss franc.

Leo Schurmenn will be leaving the national bank to head the Swiss Broadcasting Company next march and leaved Turich bankers are Con-

fident that his place will be taken by Markus Lusser, at present chief executive of the Swiss Banking Federation. Aithough nobody in Switzer land doubts that Lusser is

supremely qualified for the job, the prospect of his being appointed as one of the deputies of Fritz Leutwiler, the esident of the Swiss National Bank, has raised the hackles of the Swiss Social Democratic Party. The Social Democrats are

waging a political war against the Swiss banking industry and claim that Lusser's appointment to the directorate of the national bank will undermine its inde-pendence when it comes to dealing with the gnomes from the commercial banks in Zurich's

Rahnofstrasse. But the gnomes themselves have reservations about the appointment. They are certain that Lusser will show a sturdy independence once he is established at the national bank—in which case his immuste knowledge of the inside world of Swiss banking could become an embarrassment for them.

"They are not asking for more pay, but they insist on a 26-hour week with treble rates for overtime."

 Wherever Mr X of Bristol is at the moment, he need only look at the latest copy of the Midland Bank staff newspaper to discover how Mary feels

The manager of the bank's Corn Street, Bristol, branch, Mr A. H. Davies, has reproduced in the newspaper a cheque which the aforesaid Mary has sent to this anonymous gentle-

It reads: "Pay Mr X eight pounds only—not a penny more, with a big kiss, Mary". The manager has dutifully blanked out the identities of those concerned but cannot restrain him-self from commenting, "while I have no idea to what it relates, Mr X is obviously a very lucky gentleman ".

• Eric Waterhouse, one-time Rank Hovis McDougall, Procter and Gamble and Trust Houses Forte marketing executive in London, has been invited to help China improve its hotels.

Now managing director of the posh Mandarin hotel chain and based in Hongkong, Waterhouse will be advising Peking on how to modernize: what is generally considered one of the greatest barriers to attract badly-needed tourism.

built in China since 1950, the country can only handle about 100,000 people 2 With few new hotel rooms 100,000 people a year, says Waterhouse. He estimates the country could step into the big tourist league in three years.

 Hollywood legend has it that
 Does Sir Keith Joseph really many years ago a man named know what he has let himself Goldfish met a man called Selwin for by accepting an invitation to visit the Invicta Plastics a joint company. After rejecting the name "Selfish Films shre on Friday? ing the name "Selfish Films shire on Friday?

Inc" they settled upon "Goldwyn Film Company", and so a famous name was born. Next month will see the start of a of cerebral cruelty, are doubtbusiness and now it has decided

to split itself into two separate publicly beld companies. The final decision to create the Metro-Goldwyn Mayer Film Company and MGM Grand Hotels Incorporated will be voted on by shareholders next

Both new companies look set for exciting times. The MGM Grand Hotels group plans spending \$100m to add 750 rooms to its 2,076-room palace in Las Vegas and another 980 rooms to its 1,015-room hotel in Remo, Nevada. There are also plans for a new 1,000 room hotel in the new American gambling centre of Atlantic City, not far from New York.

MGM Films has all sorts of bright ideas, many of which include British talent. Laurence Olivier, Maggie Smith and Claire Bloom are starring in Clash of the Titans, which is made Pinewood

mew era in the Goldwyn annals.

Metro-Goldwyn Mayer Inc tary of State for Industry openhas been making films for years. It has also been rapidly developing in the hotel-casino

With Invicta's arms now stretching into America, West

Germany, Italy and Japan the form of local subsidiaries the company will no doubt meet with Sir Keith's approval. How Sir Keith Invicta's plan to test his mental skills against the company's creations is another matter.

"Is Sir Keith Joseph really such a Master Mind?" asks a letter from the Invicta headquarters. "Who knows, you could well find another side to this mysterious man." "A growing number of pet

owners are turning to prepared pet foods which are cheaper and offer a more convenient form of balanced nourishment than fresh foods", claims Pedigree Petfoods publicity department. FINANCIAL NEWS AND MARKET REPORTS

Stock markets

Interest rate worries slow gilts

The stock market opened the new account with the expected shift upwards as gilts made the running and equities followed.

The day started with heavy demand for Government stock and although trading began late, giving dealers time to catch up with the paperwork created by the issue of a new tap on Friday afternoon, Fresh buying of Exchequer 131 per cent 1985 tap quickly exhausted remaining official supplies which are estimated at about

The response to the new £1,000m Treasury 2004/08 stock was also favourable, coming as something of a surprise to some gilts dealers. It is suggested that Thursday's tender will be a sellout with only £200m required on application.

Both shorts and longs went better all morning until rumours that interest rates would remain at present levels through the summer tem-porarily halted the improvement. Longs, which had been up to £11 better, closed from £1:£11 up, while shorts finished at the top £1 higher.

Equities also reacted to the interest rate rumours and the index up to its highest point of tthe day at 440.6, up 5.0 by lunchtime, it slipped back to close 2.6 better at 428.7

companies reporting results, Glazo started the list and disappointed the market with its £35m. Despite this, there was no heavy selling in the stock. The price closed at 226p down at 16p. Unilever also fell sharply by 13p to 395p as it went ex-dividend yesterday, while to the state of the sta while ICI which went up to 37Sp at one point after annual meeting, finished the day unchanged at 372p, as did Fisons at 274p. Renk gained 2p to 198p, while Reed put on 17p 79p with another paper group. Bowater which reported results last week, gaining 7p to 182p. Pilkington went up 2p while BAT gained 3p to 238p and Turner and Newall, after weekend press comment, rose

Currys down ICI faces stern test this year 2 pc as competition grows

By Peter Wilson Smith

Currys, the High Street retailer of electrical appliances, recorded a 2 per cent fall in profits to £11.9m before tax in the year to January 23. Profits included a lower surplus from the sale of properties—£488,000 against £603,000—but was after a near doubling of net interest receivable from £960,000 to £1.88m. Group turnover rose by 15 per cent to £221m including

Following the ending of dividend control, the group has decided to restore the rate of dividend to the 1972 level, adjusted for inflation. Accordingly, the year's dividend has been increased by 47 per cent to 10.7p gross.

Currys first-half profits were 24 per cent higher at £4.57m. but following the General and the increase in VAT, demand eased and competition intensified in the third quarter of the year. There was some pick up for a late-starting Christmas period, but not enough to prevent profits from falling in the second half of 1979-80.

The group's credit trading balances at the year end, after the provision for unmatured profit, were a fifth higher at £17.7m. The total provision £17.7m. The total provision carried forward was £10.7m against £9.81m, giving rise to a charge against the current year group profits of £911,000. Higher stock relief and capital allowances reduced the 1979-80 tax charge from £4.11m m £2.58m, so after-tax profits were 15 per cent higher at £9.32m. The group has transferred £5.81m to current cost reserve, reflecting the differreserve, reflecting the difference between profit on an historical cost basis, and on a current cost basis.

Joint managing director Mr T. R. Curry reckons that the current year wil be a difficult one, and price competition in the High Street is tough. But he says that, so far, the group is shead of its sales targets. At 162p the shares yield 6.6

By Philip Robinson
Imperial Chemical Industries' chairman Sir Maurice
Rodgson warned shareholders
yesterday that the biggest
United Kingdom company,
which he heads, is in for a

tough time this year. meeting, Sir Maurice said that although the first three months. of this year had started better than the board might have expected, there is now-some slackening

He said that while the pre-dicted recession was slow in coming it is becoming clearer that it is going to be difficult to obtain the further price increases urgently needed to offset increased costs. The current high level of

chemical and man-made fibre imports are an additional problem which the group faces in the United Kingdom, he added.

Barclays chief on bad debts

The classification of bank advance into risk and risk-free categories for general bad debt provision purposes is called into question by Sir Ambony Tuke in his annual statement in the 1979. 1979 report and accounts of Barclays Bank.

He argues that those edvances which used to be considered free of risk could no longer be considered as safe as they used to be following the events in

Under the old Leach/Lawson rules governing bank account-ing banks were only required

ing banks were only required to make general provisions against those advances considered to be at risk.

For perspective Barclays points out that of fix total advances of £20,517m, some £5,100m — including £4,142m placed with banks for mora than 30 days £1,000m in finance provided under fixed rate schemes—would normally be considered to be risk five under the old would normally be considered to be risk free under the old conventions. Sir Anthony suggests that the old formula whereby general provisions were set at 1-11 per cent of advances may have to be reconsidered but he assures shareholders that the £145m set aside be Rarriags is a number to meet

by Barclays is ample to meet ell contingencies.

Barclays has also followed National Westminster in provid-ing shareholders with more details of its gross income and expenditure.

Hoffnung spurns Burns Philp

S. Hoffmung has rejected a second and final £17.9m take-over offer from Australian con-glomerate Burns Philp in the latest round of the hotly-contested bid battle. While Burds was buying

more Hoffnung shares in the Stock Market yesterday at the new hid price of 88p, the Hoffnung board, claiming asset backing of 125p a share, announced its continued oppo-sition and said it would be to shareholders writing shortly.

The United Kingdom-based trading group which earns the bulk of profits from Australia, was expected to reject the second offer. It said the first, of 80p, was "totally inadequate".

*Accounts prepared under provision of SSAPI:

million pounds of retained profit did before and each year inflation

The impact of inflation on a business dealing only in money.

The Annual General Meeting of Barclays Bank Limited will be held in London on May 8th, 1980. ng are extracts from the address to the Stockholders by the Chairman, Sir Anthony Tuke, for the year 1979.

Our profits of £529.4 million show an increase of 42% over last year's figures, but one must set is increase the impact of inflation on a business dealing entirely in money. In order to stand still, match the year on year rate of inflation and, if we were to add 18% to last year's profit, we would figure of about £440 million. In fact we have done rather better than that, but we have been operating of the year against a background of very high interest rates and this has been of considerable benefit faring Bank which has provided by far the largest part of the increase in our profits. When rates m, as they surely will, the branch banking system will inevitably face a challenge to control its costs continue to produce a major contribution to the profits of the Group. On the international side, a and and the narrow spreads in the Eurodollar market have made profits harder to earn. Nevertheless, Bank International has shown a satisfactory increase mainly due to a general growth of business it the world. The table below puts the Group's profits since 1975 in true perspective, and one can ect of the falling value of the pound on our figures.

Pre-Tax Profit & million Pre-Tax Profit at constant value of money (1979 £million) 1975 1976 1977 1978 1979

ad achts

For the first time this year we are setting out our general and specific provisions for bad and debts separately. Provisions are not an exact science as they depend on individual judgement, but case for providing Stockholders with more information. The specific provision, as its name implies, d to a particular debt and each of our Managers throughout the world has the responsibility of , all or part of a debt to the doubtful category as soon as he has reason to believe this debt will not in full. Exactly how much of a debt is relegated in this way must be a matter of judgement and it nes said that human nature encourages a conservative attitude. We are, however, most careful to that over-provision is not taking place and our specific provisions are calculated on a basis of

General provisions are in a different field. We know from experience that a bank or, in our case of banks, has within its portfolio debts which though not identified as such may well turn out to olitical risks are an obvious example of this and one can think of others; for instance, the strike in industry will almost certainly bring with it problems amongst borrowings already in our books. therefore that Stockholders, who after all own the business, should be advised that in the opinion irectors there is a clear line to be drawn between the reserves of the Bank, which are part of their "id a prudent sum to be set aside for problems unidentified as yet. Under the convention known as 1/Lawson Rules, formulated in 1969 for the Clearing Banks before they became fully international, maintained our general provisions within a band of 1% to 11/2% of advances and, in recent years, we been defined by the authorities as excluding advances regarded as risk-free. We continue to follow vention in this year's Accounts, but the time has surely come to look into the arbitrary distinction advances at risk and those considered to be risk-free, particularly as the latter category includes and deposits placed with banks outside this country and clearly some of these funds are not free c. The present position in Iran and the understandable American reaction in freezing deposits are s of a situation that makes this classification less and less realistic. It is the duty of the Directors to judgement on the correct general provision on a world-wide basis as we have great responsibilities this country. The existing formula will, I believe, need to be reconsidered but, in the meantime, lders can feel reasonably satisfied that we have about £145 million set aside for these contingencies.

Our long-term Stockholders naturally pay more attention to the dividend they receive than to ket price of the stock on any particular day as this is affected by all sorts of matters outside our The amount of the dividend, however, is now within our control and any holder of a Bank share will it hope that his dividend will at least keep up with inflation. If we go back to 1961, the date of our last ssue, this hope has been fulfilled but, if we start in 1973, we have fallen slightly behind. This year, ve our Stockholders should get a little bit ahead of the current inflation rate and the Board therefore iends a dividend of 10.25p per £1 Ordinary stock. We also propose later in the year to make a one-forip Issue and, subject to any unforeseen circumstances, we hope to pay the same rate of dividend for 1980 on the increased capital; although a Scrip Issue does no more than divide the cake into more number of our Stockholders have told us this would be welcome to them.

Banking trends

The 1970's opened with high hopes for domestic banking, partly as a result of the abolition of ceilings. In money terms, the banks appear to have done well; sterling deposits have just about though the rate of growth has slowed since 1974. The endowment element in high interest rates has he unrecovered cost of our money transmission services and has taken some of the sting out of the it the foreign banks have acquired a larger share of domestic lending and, in addition, margins have ed. The period has also been associated with a remarkable growth in wholesale lending markets.

Unfortunately this decade is opening with a recession and prospects for economic growth cannot n until three main features of our life change. First, we must raise our comparatively low productivity; , we must shift our industrial base from old declining industries to those of new technology; and, we must improve our industrial relations which have suffered so much from the strains of inflation.

The incipient recession and the likely change of balance from older manufacturing industry to ctivities, including services, may restrain the rate of growth of corporate lending for some years. heless, corporate profits in real terms are at present very low and this must strain liquidity and force nies to maintain their bank borrowing, however involuntarily. But, if Britain can obtain a much needed vement in industrial profitability, a larger share of industry's financial needs may be met from retentions more active new issue market. Until this happens the burden will remain with the banks who must se still more responsive to the needs of their corporate customers for skilled services.

Over the next ten years, the banks should be able to expand their personal sector business both in money transmission and credit, but competition will be sharp from the public institutions and the building societies. The single most important question for the Clearers in the personal sector is whether they will be able to attract on a profitable basis that part of the population which does not at present have a bank account. Our success will depend upon our ability to persuade Government, the Unions and employees to move away from cash wages and this depends to a great extent upon whether we can provide members of the public with cash where they want it, at all hours of the day, seven days a week, and also upon the development of electronic funds transfer and plastic card technology. Changes in our banking systems that will allow all our customers to meet more of their needs away from the bank counter seem an essential prerequisite for a breakthrough in the personal field.

At the same time, we will have to take greater advantage of our existing resources including our branch network. We need to strengthen our share of the market in personal lending and as collectors of savings, where we have lost ground to the building societies in particular.

International

Turning to the international banking field, the predominant feature of the 1970's has been the expansion of the Eurocurrency deposit market, which grew tenfold in money terms far outstripping the growth of deposits raised locally in individual countries. The supply of OPEC deposits and the liquidity they have given the international banking system have reduced margins even in lendings to high risk developing countries, which have become the major borrowers. This could well continue into the 1980's even though the international political scene is much less stable than it has been for some years. Part at least of the world's economic problems has arisen from the roughly twentyfold increase during ten years in the dollar price of oil and one effect has been a similar increase in the price of gold. Unless the dollar strengthens its appeal as a reserve currency, it may be that the movement to non-dollar currencies will continue and this, coupled with the recent abolition of exchange control, should give British banks a chance to expand their share of the international market, particularly as their exposures to risky areas are probably less than many of their international competitors. However, all banks will look to wider margins if only because of the need to maintain capital ratios in an era of continued inflation and uncertainty.

The international side of the Group's business has been transformed from oversees banking in former colonial territories into that of a fully international bank. In 1971, we acquired the minority interest in Barclays Bank DCO. Since then, we have developed our business rapidly in a number of financial centres -Europe, Australia, the Far East, South America and, most of all, the United States where we now have 464 branches and where our purchase of BarclaysAmericanCorporation was the largest foreign acquisition we have ever made. We have also built up a strong position in the wholesale sterling and Eurocurrency markets in London itself.

Other developments

At home, we have developed a number of our services to the corporate market including those of our Merchant Bank, the introduction of our Business Advisory Service to help small and medium size companies in their financial management problems and the substantial growth of medium term lending. We have also increased considerably our wholesale deposit base from negligible figures to more than a quarter of our deposits, the majority of which come from our own customers.

Important in the personal field was the acquisition of Mercantile Credit Company which, in addition to expanding its share of the market in consumer credit, has become our leasing arm and is now amongst the largest leasing companies in this country. Its business in this field continues to provide growing support for industrial investment.

The development of consumer credit in branches and through Barclaycard has been a significant feature which we expect to continue, including perhaps a modest entry into the home loan market as soon as conditions permit.

If I were to prophesy the main areas of growth for us in the next ten years, I would say that in our corporate business the need for the development and finance of world resources will provide further scope for the services of multi-currency medium term lending, foreign exchange, energy and project finance and export credits. In the domestic field, further expansion of a wide range of consumer credit will continue to be a buoyant area on which the future prosperity of our operations will depend. The real challenge to us over the next few years will be our ability to create the necessary modern banking systems and facilities to attract profitably the 11 million wage and salary earners who today have no active clearing bank account.

In 1970, we employed 75,000 men and women in 42 countries; today, we employ over 110,000 and we now cover 75 countries. These figures illustrate the expansion of the Group over the last decade, progress which would not have been achieved without the whole-hearted support of our staff; this has made it possible for us to grow and yet maintain the high standard of service we offer to customers.

In the past year, their work has not always been easy - for example, during the fighting in Uganda there was only one day when we were not able to offer some sort of service to our customers: in Dominica and St. Vincent, natural disasters caused havoc. At home, the threat of violent robbery, once almost unknown, is ever present.

Unless our customers are provided with a high standard of service, we shall fall behind our competitors. There is no danger of that while we have such a keen, loyal and efficient staff and I know that Stockholders will wish to give them the thanks they so fully deserve.

Legal Appointments

COMMERCIAL **LAWYER**

NAME OF THE PARTY OF THE PARTY

GEISCO Limited requires a second lawyer for its European Headquarters located in Kingston-upon-Thames, Surrey. The position will report to the European Counsel and applicants, male or female, should have four years' commercial legal experience in industry or private practice since qualifying.

The lawyer appointed will work with the European Counsel in advising eleven European companies engaged in the data processing and computing services industry on all aspects of their businesses. All eleven companies are subsidiaries of General Electric Company, U.S.A.*

Since the position will involve work of an international nature some overseas travel will be necessary. Fluency in German would be an advantage, although this is not an absolute requirement.

Salary is negotiable at about £10,000 a year and other company benefits are available.

Please write giving details of age, qualifications and experience to:-S. P. Hayward

GEISCO Limited 2 Manorgate Road Kingston-upon-Thames Surrey KT2 7AR

'Not connected with The General Electric Company Limited of England.

SOLICITOR

Career Opportunity in the Oil Industry

London Based

Amoco Europe Incorporated is responsible for co-ordinating the petroleum exploration and production activities of the European subsidiaries of Standard Oil Company (Indiana), one of the world's larger oil companies. As a result of a promotional transfer to the United States, a vacancy has arisen in our European Law Department which offers substantial opportunity and scope within the frame-work of the oil industry. We invite applications from Solicitors with at least four years' commercial experience. Oil industry experience is desirable but not necessary. The work is varied and interesting and will involve some foreign travel. An excellent salary commensurate with experience will be offered to the successful applicant.

Applications, enclosing a curriculum vitae which will be treated with the strictest confidence, should be submitted to B. S. McLintock, Employee Relations Department, Amoco Europe Incorporated, 33 Cavendish Square, London W1M 9HF.

£6,000 plus Appointments are featured every Thursday

ecretarial,

The Enigma Files (BBC-2, 9.30) e who rarely go to the cinema are likely to take assing interest in the annual Academy Awards—in who got the Oscars? Movie buffs, of course, care wards—song, art direction, short subject if so on—but for most of us the actor and ep up to receive that kitsch statuette are what the out . . . and tonight (ITV, 11.0) the whole schmaltzy se there for us to wallow in or tut-tut at, ersonal taste. We may know the results before out there is still a horrid fascination in watching registering sporting acknowledgment that the best imphed while undoubtedly wondering privately t should not have been rewarded this year. deed, the prize really does seem merited: no one le Emil Januings and Janet Gaynor the Oscars 28 and from a purely chauvinistic standpoint it lenda Jackson winning the thing every few years.

The Dorothy Chandler Pavilion at the Los Angeles will be a second and the control of will be a super-colossal production and it remains the fascinating titbit that the statuette may have name by a former librarian of the Academy of a Arts and Sciences because it reminded her of ir, a statement that cries out for elaboration. Files (BBC 2, 9.30)—no connexion with the broken by Oxbridge dons and crossword solvers World War—is a series by Derek Ingrey about a "ID man put in charge of the Prisoners' Property London: this, apparently, is where the police prisoners' effects, forensic evidence and en property, and quite often one thing leads to consternation of the criminal classes. Anyway, how it will be in the 15-week run of the series, also prove ample time for something cosy to en Detective Chief Inspector Nick Lewis (Tom ate Burton (Sharon Mughan), the lady who was O until he arrived. They don't like each other a sure sign in a TV series that a passionate relationship is just around the corner. ly is not what it was, hence the dear old Hancocks vs that keep popping up out of the archives, but to have come up with a winner: a series of eight ach an hour long, full of recordings made by edians on and off stage and presented by o mean ad libber in his own right. In the first .02) comparisons will be made between American mour but the difference is obvious—we laugh at
